## Exam SK0-005 Tutorials, Reliable SK0-005 Exam Tutorial

The PDF version of our SK0-005 study tool is very practical, which is mainly reflected on the special function. As I mentioned above, our company are willing to provide all people with the demo for free. You must want to know how to get the trial demo of our SK0-005 question torrent; the answer is the PDF version. You can download the free demo form the PDF version of our SK0-005 exam torrent. Maybe you think it does not prove the practicality of the PDF version, do not worry, we are going to tell us another special function about the PDF version of our SK0-005 Study Tool. If you download our study materials successfully, you can print our study materials on pages by the PDF version of our SK0-005 exam torrent. We believe these special functions of the

PDF version will be very useful for you to prepare for your exam. We hope that you will like the PDF version of our SK0-005 question torrent.

## CompTIA Server+ Certification Exam Sample Questions (Q27-Q32):

### NEW QUESTION # 27

An administrator is wiring some Cat 5 cable into a serial cable. Which of the following wiring types should the administrator use?

- A. EIA 568A on both ends
- B. Straight-through
- **C. Rollover**
- D. Crossover

**Answer: C**

### NEW QUESTION # 28

A systems administrator needs to back up changes made to a data store on a daily basis during a short time frame. The administrator wants to maximize RTO when restoring data. Which of the following backup methodologies would best fit this scenario?

- A. Differential backups
- **B. Incremental backups**
- C. Off-site backups
- D. Full backups

**Answer: B**

### NEW QUESTION # 29

Users cannot access a new server by name, but the server does respond to a ping request using its IP address.

All the user workstations receive their IP information from a DHCP server. Which of the following would be the best step to perform NEXT?

- A. Run the tracert command from a workstation.
- B. Update the workstation hosts file.
- C. Correct the missing DHCP scope.
- **D. Examine the DNS to see if the new server record exists.**

**Answer: D**

Explanation:

If users cannot access a new server by name, but the server does respond to a ping request using its IP address, it means that there is a problem with name resolution. The DNS (Domain Name System) is a service that maps hostnames to IP addresses and vice versa. Therefore, the best step to perform next is to examine the DNS to see if the new server record exists and matches its IP address. If not, the DNS record needs to be added or updated accordingly. Running the tracert command from a workstation would not help with name resolution, as it only shows the route taken by packets to reach a destination by IP address. Correcting the missing DHCP scope would not help either, as DHCP (Dynamic Host Configuration Protocol) only assigns IP addresses and other network settings to clients, but does not resolve names. Updating the workstation hosts file would be a temporary workaround, but not a permanent solution, as it would require manually editing every workstation's hosts file with the new server's name and IP address. ### NEW QUESTION # 30

A global organization keeps personnel application servers that are local to each country.

However, a security audit shows these application servers are accessible from sites in other countries. Which of the following hardening techniques should the organization use to restrict access to only sites that are in the same country?

- A. Disable unneeded services.

- B. Close the unneeded ports
- **C. Configure a firewall**
- D. Install a HIDS

**Answer: C**

Explanation:

Monitors Network Traffic

### NEW QUESTION # 31

Which of the following is an example of load balancing?

- **A. Active-active**
- B. Active-passive
- C. Round robin
- D. Failover

**Answer: A**

Explanation:

Active-active clusters use a load balancer device to distribute server requests between the nodes.

This design provides high availability and also increases performance. The load balancer distributes the workload among the cluster nodes.

There are many scheduling types for load balancers. Three of them are round robin, most recently used, and weighted scheduling.

### NEW QUESTION # 32

.....

If you want to pass the SK0-005 exam, our SK0-005 practice questions are elemental exam material you cannot miss. It is proved by our loyal customers that our passing rate of SK0-005 practice materials has reached up to 98 to 100 percent up to now. Besides, free updates of SK0-005 Exam Torrent will be sent to your mailbox freely for one year, hope you can have a great experience during usage of our SK0-005 practice materials.
