Pass Guaranteed Splunk - Trustable Exam SPLK-2003 Fees

Full refund is available if you fail to pass the exam in your first attempt after buying SPLK-2003 exam bootcamp from us, and we will refund your money, In addition, SPLK-2003 exam dumps contain both questions and answers, and it's convenient for you to check the answers after practicing. SPLK-2003 exam botcamp cover most of the knowledge points of the exam, and you can

master the major knowledge points as well as improve your professional ability in the process of training. We have online and offline chat service for SPLK-2003 Exam Dumps, and if you have any questions, you can consult us.

Splunk Phantom Certified Admin Sample Questions (Q91-Q96):

NEW QUESTION # 91

Which of the following is a best practice for use of the global block?

- A. Declare outputs which will be selectable within playbook blocks.
- B. Execute custom code after each run of the playbook.
- C. Execute code at the beginning of each run of the playbook.
- D. Import packages which will be used within the playbook.

Answer: D

Explanation:

The global block within a Splunk SOAR playbook is primarily used to import external packages or define global variables that will be utilized across various parts of the playbook. This block sets the stage for the playbook by ensuring that all necessary libraries, modules, or predefined variables are available for use in subsequent actions, decision blocks, or custom code segments within the playbook. This practice promotes code reuse and efficiency, enabling more sophisticated and powerful playbook designs by leveraging external functionalities.

NEW QUESTION # 92

Without customizing container status within Phantom, what are the three types of status for a container?

- A. New, In Progress, Closed
- B. Low, Medium, High
- C. New, Open, Resolved
- D. Low, Medium, Critical

Answer: A

Explanation:

Within Splunk SOAR, containers (which represent incidents, cases, or events) have a lifecycle that is tracked through their status. The default statuses available without any customization are "New", "In Progress", and "Closed". These statuses help in organizing and managing the incident response process, allowing users to easily track the progress of investigations and responses from initial detection through to resolution.

NEW QUESTION # 93

How is it possible to evaluate user prompt results?

- A. Set `action_result.summary.status` to required.
- B. Add a decision Mode
- C. Set the user prompt to reinvoke if it times out.
- D. Set `action_result.summary.response` to required.

Answer: D

Explanation:

In Splunk Phantom, user prompts are actions that require human input. To evaluate the results of a user prompt, you can set the response requirement in the action result summary. By setting `action_result.summary.response` to required, the playbook ensures that it captures the user's input and can act upon it. This is critical in scenarios where subsequent actions depend on the choices made by the user in response to a prompt. Without setting this, the playbook would not have a defined way to handle the user response, which might lead to incorrect or unexpected playbook behavior.

NEW QUESTION # 94

A user wants to use their Splunk Cloud instance as the external Splunk instance for Phantom. What ports need to be opened on the

Splunk Cloud instance to facilitate this? Assume default ports are in use.

- A. TCP 8088 and TCP 8099.
- **B. TCP 80 and TCP 443.**
- C. Splunk Cloud is not supported.
- D. TCP 8080 and TCP 8191.

Answer: B

Explanation:

To integrate Splunk Phantom with a Splunk Cloud instance, network communication over certain ports is necessary. The default ports for web traffic are TCP 80 for HTTP and TCP 443 for HTTPS. Since Splunk Cloud instances are accessed over the internet, ensuring that these ports are open is essential for Phantom to communicate with Splunk Cloud for various operations, such as running searches, sending data, and receiving results. It is important to note that TCP 8088 is typically used by Splunk's HTTP Event Collector (HEC), which may also be relevant depending on the integration specifics.

NEW QUESTION # 95

After enabling multi-tenancy, which of the following is the first configuration step?

- A. Select the associated tenant artifacts.
- B. Configure the default tenant.
- **C. Change the tenant permissions.**
- D. Set default tenant base address.

Answer: C

NEW QUESTION # 96

.....

Our SPLK-2003 study quiz is made from various experts for examination situation in recent years in the field of systematic analysis of finishing, meet the demand of the students as much as possible, at the same time have a professional staff to check and review SPLK-2003 practice materials, made the learning of the students enjoy the information of high quality. Due to the variety of examinations, the SPLK-2003 Study Materials are also summarized for different kinds of learning materials, so that students can find the information on SPLK-2003 guide torrent they need quickly.
