SSE-Engineer Exam Test | SSE-Engineer Exam Flashcards

As the saying goes, to sensible men, every day is a day of reckoning. Time is very important to people. People often complain that they are wasting their time on study and work. They do not have time to look at the outside world. Now, SSE-Engineer exam guide gives you this opportunity. SSE-Engineer test prep helps you save time by improving your learning efficiency. With our study materials, you can efficiently use all your fragmented time to learn. You can use your mobile phone to practice whether on the bus or at the time you are queuing up for a meal or waiting for someone. SSE-Engineer learning question helps you to enjoy the joy of life while climbing the top of your career. What are you hesitating? Come and buy it.

Palo Alto Networks Security Service Edge Engineer Sample Questions (Q12-Q17):

NEW QUESTION # 12

During a deployment of Prisma Access (Managed by Strata Cloud Manager) for mobile users, a SAML authentication type and authentication profile in the Cloud Identity Engine application is successfully created.

Using this SAML authentication, what is a valid next step to configure authentication for mobile users?

- A. Perform a full commit to Strata Cloud Manager so the Cloud Identity Engine profiles get synchronized from the application.
- **B. Create a SAML authentication profile in Strata Cloud Manager and link it to the Cloud Identity Engine profile.**
- C. Permit the Cloud Identity Engine service account RBAC access to the mobile user folder in Strata Cloud Manager.
- D. In Strata Cloud Manager, create a new authentication type of "Cloud Identity Engine."

Answer: B

Explanation:

After successfully creating a SAML authentication type and authentication profile in Cloud Identity Engine, the next step is to configure a corresponding SAML authentication profile in Strata Cloud Manager and link it to the Cloud Identity Engine profile. This ensures that Prisma Access (Managed by Strata Cloud Manager) can authenticate mobile users using the configured SAML identity provider (IdP), enabling seamless user authentication and access control.

NEW QUESTION # 13

Which Cloud Identity Engine capability will create a Security policy that uses Entra ID attributes as the source identification?

- A. Entra ID Cloud Group
- **B. Cloud Dynamic User Group**
- C. Attribute Group Mapping
- D. Entra ID Group Attribute

Answer: B

Explanation:

The Cloud Dynamic User Group capability in Cloud Identity Engine enables the creation of Security policies that use Entra ID (formerly Azure AD) attributes for user identification. This allows Prisma Access to dynamically apply user-based security rules based on real-time Entra ID attributes, ensuring that access policies adapt to user changes such as group membership, device compliance, or role updates.

NEW QUESTION # 14

Which policy configuration in Prisma Access Browser (PAB) will protect an organization from malicious BYOD and minimize the impact on the user experience?

- A. One that blocks file exchange
- B. One for session recording
- **C. One that allows access to applications with data masking or watermarking**
- D. One that blocks elements such as screen scrapers

Answer: C

Explanation:

In Prisma Access Browser (PAB), allowing access to applications while enforcing data masking or watermarking provides security for BYOD (Bring Your Own Device) users without heavily impacting the user experience. Data masking ensures that sensitive information is obscured, reducing the risk of data leakage, while watermarking can deter unauthorized screenshots or data exfiltration. This approach balances security and usability, allowing users to work efficiently while protecting corporate data.

NEW QUESTION # 15

Where are tags applied to control access to Generative AI when implementing AI Access Security?

- **A. To Generative AI applications for identifying sanctioned, tolerated, or unsanctioned applications**
- B. To user devices for identifying and controlling which Generative AI applications they can access
- C. To Generative AI URL categories for classifying trusted and untrusted Generative AI websites
- D. To security rules for defining which types of Generative AI applications are allowed or blocked

Answer: A

Explanation:

When implementing AI Access Security, tags are applied to Generative AI applications to classify them as sanctioned, tolerated, or unsanctioned. This allows organizations to enforce policy-based access control over AI tools, ensuring that only approved applications are accessible while restricting or monitoring usage of untrusted or high-risk AI platforms. This classification helps security teams manage AI-related risks and compliance effectively.

NEW QUESTION # 16

Which two statements apply when a customer has a large branch office with employees who all arrive and log in within a five-minute time period? (Choose two.)

- A. Maximum number of TCP DNS retries is 3.
- B. Maximum pending TCP DNS requests is 64.
- C. DNS results are only cached for frequently used hostnames.
- D. DNS results are cached for 300 seconds.

Answer: A,B

Explanation:

When a large branch office experiences a high volume of employees logging in within a short time frame, the following apply:

* Maximum pending TCP DNS requests is 64- This means that Prisma Access can queue up to 64 pending DNS requests over TCP before dropping additional requests. If more requests are received simultaneously, some may fail or experience delays.

* Maximum number of TCP DNS retries is 3- If a DNS request fails over TCP, Prisma Access will attempt to retry the request up to three times before failing over to another method or returning an error.

NEW QUESTION # 17

.....

As job seekers looking for the turning point of their lives, it is widely known that the workers of recruitment is like choosing apples--viewing resumes is liking picking up apples, employers can decide whether candidates are qualified by the SSE-Engineer appearances, or in other words, candidates' educational background and relating SSE-Engineer professional skills. Knowledge about a person and is indispensable in recruitment. That is to say, for those who are without good educational background, only by paying efforts to get an acknowledged SSE-Engineer Certification, can they become popular employees. So for you, the SSE-Engineer latest braindumps compiled by our company can offer you the best help.

SSE-Engineer Exam Test: <https://www.examcollectionpass.com/Palo-Alto-Networks/SSE-Engineer-practice-exam-dumps.html>

In addition, we provide you with free demo for one year for SSE-Engineer exam braindumps, and the update version for SSE-Engineer exam materials will be sent to your email address automatically, Palo Alto Networks Exam SSE-Engineer Simulator Free Our experts have analyzed exam outline and take notice of every little changes to update our materials, We are known by others because of our high passing rate so many users recommend our SSE-Engineer test questions to their friends and colleagues.

Part V: Next Steps, Instructor's Supplements A variety SSE-Engineer of supplemental materials are available to qualified instructors from the Pearson Instructor Resource Center.

In addition, we provide you with free demo for one year for SSE-Engineer Exam Braindumps, and the update version for SSE-Engineer exam materials will be sent to your email address automatically.

Reliable SSE-Engineer training materials bring you the best SSE-Engineer guide exam: Palo Alto Networks Security Service Edge Engineer - ExamcollectionPass

Our experts have analyzed exam outline and SSE-Engineer 100% Exam Coverage take notice of every little changes to update our materials, We are known by others because of our high passing rate so many users recommend our SSE-Engineer test questions to their friends and colleagues.

Will you feel that the product you have brought is not suitable for you, You don't need to enroll yourself in expensive SSE-Engineer exam training classes.
