If your answer is yes then you are at the right place and you do not need to go anywhere. Just download the TestValid VMCE_v12 Questions and start VMCE_v12 exam preparation without wasting further time.

Veeam Certified Engineer v12 Sample Questions (Q89-Q94):

NEW QUESTION # 89
A Veeam administrator has been tasked to create a backup that will automatically relocate data after a specified period time to a different media type, while also being off site, without creating additional backup or backup copy jobs. The administrator has determined that a Scale-out Backup Repository can be used as part of the solution. How can this be accomplished?

- A. Add a Capacity Tier to the Scale-out Backup Repository and enable the "Move" option.
- B. Add an Archive Tier to the Scale-out Backup Repository and enable the "Copy" option.
- C. Add a Capacity Tier to the Scale-out Backup Repository and enable "GFS Tiering".
- D. Add a Capacity Tier to the Scale-out Backup Repository and enable the "Copy" option.

Answer: A

Explanation:
It states the job will "automatically relocate data" that is move not copy.

NEW QUESTION # 90
Which of the following statements are true regarding backup copy jobs in Veeam Backup & Replication?
(Choose two.)

- A. During the backup copy job process, a VM snapshot is created for consistency
- B. The backup copy job creates a forever forward incremental backup chain
- C. The backup copy job creates a single file with multiple restore points included within for archival purposes
- D. Backup copy jobs copy entire VBK, VIB, or VRB files from the source backup repository to the target backup repository
- E. Retention settings maintain the desired number of restore points as well as offer optional GFS for archival purposes

Answer: B,E

Explanation:

NEW QUESTION # 91
You want to deploy an On-Demand Sandbox. While creating the application group, which sources can be used to add virtual machines to the Application Group? (Choose three.)

- A. Backup in Cloud Repository
- B. Backup Copy in Backup repository
- C. Replica on non-Cloud Connect VMware vSphere host
- D. Replica on Cloud Connect VMware vSphere host
- E. Backup on Backup Repository
- F. Storage Shapshot

Answer: C,E,F

NEW QUESTION # 92
An auditor for a company requires reports per quarter on the status of the backups. Veeam Backup to used for the backups. What veeam component will provide the best reporting?

- A. Veeam Backup e-mail notifications
- B. Veeam Explorer for Microsoft SQL Server reporting
- C. Veeam Enterprise Manager reporting
- D. Veeam ONE Web Client

Answer: D

Explanation:
Explanation

https://helpcenter.veeam.com/docs/backup/em/reports_on_backup_servers.html?ver=120

NEW QUESTION # 93

An engineer has used a Linux Hardened Repository as the backup repository. The immutability period is set to
60 days.
The backup settings are:
Retention Policy: 14 days
GFS Weekly full backup: 1 week
GFS Monthly full backup: 6 months
If a full backup is created on 27th May 2023 with a monthly GFS flag, when will this restore point be automatically deleted?

- A. 28th November 2023
- B. 28th July 2023
- C. 2V June 2023
- D. 5th August 2023

Answer: A

Explanation:
The immutability period set on a Linux Hardened Repository prevents deletion of backup files for the duration of the immutability
period. In this case, it is set to 60 days. However, the GFS (Grandfather-Father-Son) retention policy specifies that a monthly full
backup is to be kept for 6 months. Since the full backup was created on 27th May 2023 and flagged as a monthly GFS backup, it
will be retained for 6 months irrespective of the retention policy or the immutability setting. Hence, the restore point will be
automatically deleted after 6 months, which would be on the 28th of November 2023.References:
