

Exam ZDTA Dump - Reliable ZDTA Braindumps Ppt

P.S. Free 2025 Zscaler ZDTA dumps are available on Google Drive shared by PDFDumps: <https://drive.google.com/open?id=1iVBDSMR6GGIKTz2xw9dBx69VQ8zO-Z0z>

Nowadays, all of us are living a fast-paced life and we have to deal with things with high-efficiency. We also develop our ZDTA practice materials to be more convenient and easy for our customers to apply and use. The most advanced operation system in our ZDTA Exam Questions which can assure you the fastest delivery speed, and your personal information will be encrypted automatically by our operation system. Within several minutes, you will receive our ZDTA study guide!

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.
Topic 2	Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.

Topic 3	• Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 4	• Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 5	• Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS • SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.
Topic 6	• Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.
Topic 7	• Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.

Reliable Zscaler ZDTA Braindumps Ppt & Exam ZDTA Passing Score

Don't you want to make a splendid achievement in your career? Certainly hope so. Then it is necessary to constantly improve yourself. Working in the Zscaler industry, what should you do to improve yourself? In fact, it is a good method to improve yourself by taking Zscaler certification exams and getting Zscaler certificate. Zscaler certificate is very important certificate, so more and more people choose to attend ZDTA Certification Exam.

Zscaler Digital Transformation Administrator Sample Questions (Q103-Q108):

NEW QUESTION # 103

When configuring an inline Data Loss Prevention policy with content inspection, which of the following are used to detect data, allow or block transactions, and notify your organization's auditor when a user's transaction triggers a DLP rule?

- A. Index Tool
- B. Hosted PAC Files
- C. VPN Credentials
- D. DLP engines

Answer: D

Explanation:

The inline DLP engines are responsible for inspecting content, identifying sensitive data matches, enforcing allow-or-block actions, and generating notifications (e.g., to your auditor) whenever a DLP rule is triggered.

NEW QUESTION # 104

What transport mechanism will Zscaler Client Connector use to forward traffic to the Zero Trust Exchange when configured for Tunnel 2.0?

- A. Zscaler Client Connector will encapsulate the user's traffic in dTLS/TLS tunnels to the ZTE.

- B. Zscaler Client Connector will encapsulate the user's traffic in HTTP Connect tunnels to the ZTE.
- C. Zscaler Client Connector will encapsulate the user's traffic in IPSec tunnels to the ZTE.
- D. Zscaler Client Connector will encapsulate the user's traffic in GRE tunnels to the ZTE.

Answer: A

Explanation:

Zscaler Client Connector's Tunnel 2.0 encapsulates user traffic in DTLS (or TLS) tunnels to the Zero Trust Exchange, providing both transport security and protocol flexibility before handing off to Zscaler's inspection and enforcement engines.

NEW QUESTION # 105

Does the Access Control suite include features that prevent lateral movement?

- A. No. The endpoint firewall will detect network segments and steer access.
- B. Yes. The Cloud Firewall will detect network segments and provide conditional access.
- **C. Yes. Controls for segmentation and conditional access are part of the Access Control Services.**
- D. No. Access Control Services will only control access to the Internet and cloud applications.

Answer: C

Explanation:

Yes, the Access Control suite includes controls for segmentation and conditional access, which are designed to prevent lateral movement within networks. These features allow organizations to restrict access between different segments and enforce policies that limit the spread of threats or unauthorized access within internal environments.

NEW QUESTION # 106

Which are valid criteria for use in Access Policy Rules for ZPA?

- A. Username, Trusted Network Status, Password, Location
- **B. Group Membership, ZIA Risk Score, Domain Joined, Certificate Trust**
- C. Department, SNI, Branch Connector Group, Machine Group
- D. SCIM Group, Time of Day, Client Type, Country Code

Answer: B

Explanation:

Valid criteria for Access Policy Rules in ZPA include Group Membership, ZIA Risk Score, Domain Joined, and Certificate Trust. These attributes allow granular policy decisions based on user identity, device posture, and risk context.

Options including password are invalid as passwords are not used as policy criteria; similarly, SNI and Branch Connector Group are more relevant to other controls. The study guide lists these user and device attributes explicitly as policy criteria within ZPA access policies.

NEW QUESTION # 107

Which of the following is an unsupported tunnel type?

- A. HTTP Connect Tunnels
- **B. Secure Socket Tunneling Protocol (SSTP)**
- C. Proprietary Microtunnels
- D. Generic Routing and Encapsulation (GRE)

Answer: B

Explanation:

Secure Socket Tunneling Protocol (SSTP) is not supported as a tunnel type by Zscaler. Zscaler supports GRE, HTTP Connect tunnels, and its own proprietary Microtunnels for traffic forwarding and secure connectivity, but SSTP is not among the supported tunnel protocols.

NEW QUESTION # 108

.....

Our website is considered to be the most professional platform offering ZDTA practice guide, and gives you the best knowledge of the ZDTA study materials. Passing the exam has never been so efficient or easy when getting help from our ZDTA Preparation engine. We can claim that once you study with our ZDTA exam questions for 20 to 30 hours, then you will be able to pass the exam with confidence.
