Latest Examcollection JN0-637 Dumps - How to Download for PDF Free Valid JN0-637 Cram Materials

To get all these benefits you must have to pass the Security, Professional (JNCIP-SEC) (JN0-637) certification exam which is not an easy task. It is a difficult task but you can make It-Tests simple and quick. To do this you just visit Exams. Solutions provide updated, valid, and actual JN0-637 Exam Dumps that will assist you in Security, Professional (JNCIP-SEC) (JN0-637) exam preparation and you can easily get success in this challenging Security, Professional (JNCIP-SEC) exam with flying colors.

Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q98-Q103):

NEW QUESTION # 98
You want to test how the device handles a theoretical session without generating traffic on the Junos security device.
Which command is used in this scenario?

- A. show security match-policies
- B. request security policies check
- C. show security flow session
- D. show security policies

Answer: B

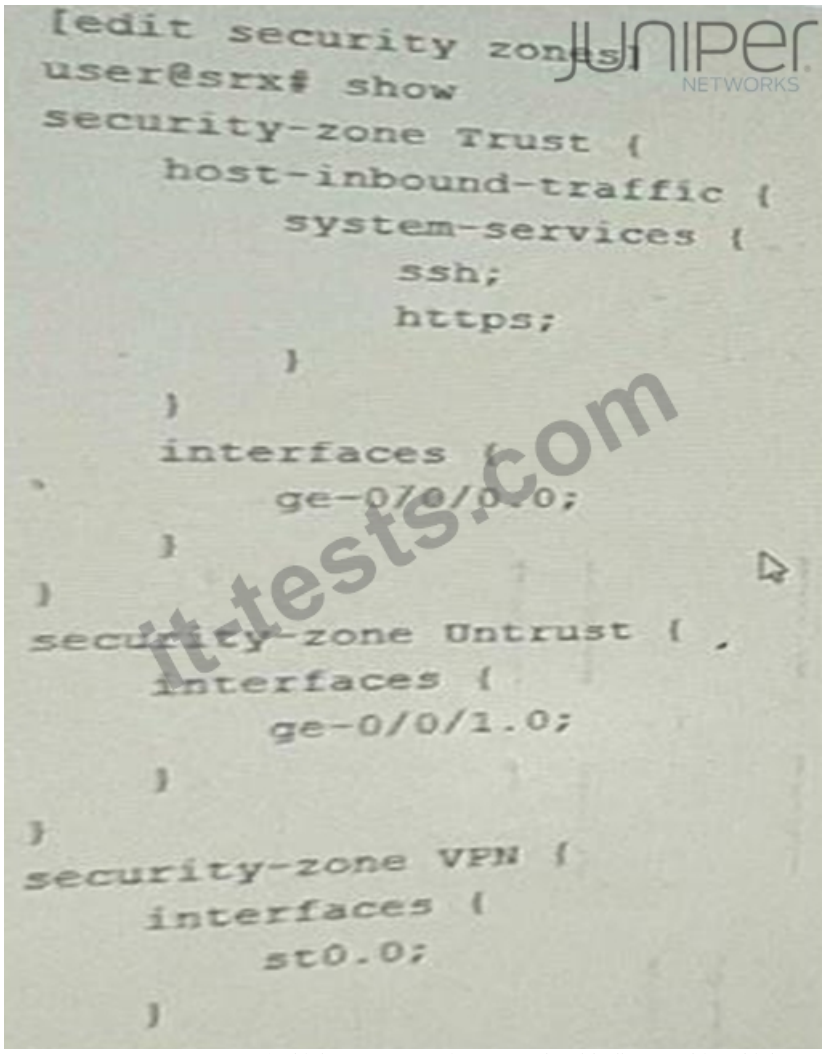
Explanation:
The request security policies check command allows you to simulate a session through the SRX device, checking the security policy action that would apply without needing to send real traffic. This helps in validating configurations before actual deployment. For more details, see Juniper Security Policies Testing.
The commandrequest security policies checkis used to test how a Junos security device handles a theoretical session without generating actual traffic. This command is useful for validating how security policies would be applied to a session based on various parameters like source and destination addresses, application type, and more.
* Explanation of Answer A (request security policies check):
* This command allows you to simulate a session and verify which security policies would be applied to the session. It's a proactive method to test security policy configurations without the need to generate real traffic.
* Example usage:
bash
Copy code
request security policies check from-zone trust to-zone untrust source 10.1.1.1 destination 192.168.1.1 protocol tcp application junos-https Juniper Security Reference:
* Security Policies Check: This command provides a way to simulate and verify security policy behavior without actual traffic.
Reference: Juniper Security Policy Documentation.

NEW QUESTION # 99
Which two statements are correct regarding tenant systems on SRX Series devices? (Choose two.)

- A. Each tenant system runs its own instance of the routing protocol process
- B. A maximum of 500 tenant systems can be configured on a physical SRX device.
- C. All tenant systems share a single routing protocol process.
- D. A maximum of 32 tenant systems can be configured on a physical SRX device.

Answer: A,D

NEW QUESTION # 100
Referring to the exhibit, you are attempting to set up a remote access VPN on your SRX series devices.



However you are unsure of which system services you should allow and in which zones they should be allowed to correctly finish the remote access VPN configuration Which two statements are correct? (Choose two.)

- A. You should add the host-inbound-traffic system-service tcp-encap statement to the VPN zone
- B. You should add the host-inbound-traffic system-service tcp-encap statement to the Untrust zone
- C. You should add the host-inbound-traffic system-service ike statement to the Untrust zone.
- D. You should add the host-inbound-traffic system-service ike statement to the VPN zone.

Answer: B,C

NEW QUESTION # 101
After downloading the new IPS attack database, the installation of the new database fails. What caused this condition?

- A. The new attack database no longer contained an attack entry that was in use.
- B. The new attack database was too large for the device on which it was being installed.
- C. Some of the new attack entries were already in use and had to be deactivated before installation.
- D. The new attack database was revoked between the time it was downloaded and installed.

Answer: A

NEW QUESTION # 102
In a multinode HA environment, which service must be configured to synchronize between nodes?

- A. PKI certificates
- B. IDP
- C. IPsec VPN
