## Latest 1Z0-1122-25 Exam Pass4sure - 1Z0-1122-25 Test Questions Vce

To practice for a Oracle Cloud Infrastructure 2025 AI Foundations Associate in the software (free test), you should perform a self-assessment. The Oracle 1Z0-1122-25 practice test software keeps track of each previous attempt and highlights the improvements with each attempt. The Oracle 1Z0-1122-25 Mock Exam setup can be configured to a particular style & arrive at unique questions.

## Oracle Cloud Infrastructure 2025 AI Foundations Associate Sample Questions (Q22-Q27):

### NEW QUESTION # 22

What is the main function of the hidden layers in an Artificial Neural Network (ANN) when recognizing handwritten digits?

- A. Directly predicting the final output

- B. Providing labels for the output neurons
- C. Storing the input pixel values
- **D. Capturing the internal representation of the raw image data**

**Answer: D**

Explanation:

In an Artificial Neural Network (ANN) designed for recognizing handwritten digits, the hidden layers serve the crucial function of capturing the internal representation of the raw image data. These layers learn to extract and represent features such as edges, shapes, and textures from the input pixels, which are essential for distinguishing between different digits. By transforming the input data through multiple hidden layers, the network gradually abstracts the raw pixel data into higher-level representations, which are more informative and easier to classify into the correct digit categories.

### NEW QUESTION # 23

Which statement describes the Optical Character Recognition (OCR) feature of Oracle Cloud Infrastructure Document Understanding?

- A. It enhances the visual quality of documents.
- **B. It recognizes and extracts text from a document.**
- C. It provides real-time translation of text.
- D. It converts audio files into text.

**Answer: B**

Explanation:

The Optical Character Recognition (OCR) feature of Oracle Cloud Infrastructure (OCI) Document Understanding recognizes and extracts text from documents. This capability is fundamental for converting printed or handwritten text into a machine-readable format, allowing for further processing, such as text analysis, search, and archiving. OCI's OCR is an essential tool in automating document processing workflows, enabling businesses to digitize and manage their documents efficiently.

### NEW QUESTION # 24

Which capability is supported by Oracle Cloud Infrastructure Language service?

- A. Converting text into images
- B. Translating text into speech
- **C. Analyzing text to extract structured information like sentiment or entities**
- D. Detecting objects and scenes in images

**Answer: C**

Explanation:

Oracle Cloud Infrastructure (OCI) Language service is specifically designed to analyze text and extract structured information such as sentiment, entities, key phrases, and language detection. This service provides natural language processing (NLP) capabilities that help users gain insights from unstructured text data. By identifying the sentiment (positive, negative, neutral) and recognizing entities (like names, dates, or places), the service enables businesses to process large volumes of text data efficiently, aiding in decision-making processes.

### NEW QUESTION # 25

What is the primary benefit of using Oracle Cloud Infrastructure Supercluster for AI workloads?

- A. It offers seamless integration with social media platforms.
- **B. It delivers exceptional performance and scalability for complex AI tasks.**
- C. It provides a cost-effective solution for simple AI tasks.
- D. It is ideal for tasks such as text-to-speech conversion.

**Answer: B**

Explanation:

Oracle Cloud Infrastructure Supercluster is designed to deliver exceptional performance and scalability for complex AI tasks. The primary benefit of this infrastructure is its ability to handle demanding AI workloads, offering high-performance computing (HPC) capabilities that are crucial for training large-scale AI models and processing massive datasets. The architecture of the Supercluster ensures low-latency networking, efficient resource allocation, and high-throughput processing, making it ideal for AI tasks that require significant computational power, such as deep learning, data analytics, and large-scale simulations.

#### NEW QUESTION # 26

In machine learning, what does the term "model training" mean?

- A. Analyzing the accuracy of a trained model
- B. Writing code for the entire program
- C. Performing data analysis on collected and labeled data
- **D. Establishing a relationship between input features and output**

**Answer: D**

Explanation:

In machine learning, "model training" refers to the process of teaching a model to make predictions or decisions by learning the relationships between input features and the corresponding output. During training, the model is fed a large dataset where the inputs are paired with known outputs (labels). The model adjusts its internal parameters to minimize the error between its predictions and the actual outputs. Over time, the model learns to generalize from the training data to make accurate predictions on new, unseen data.
