The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q110-Q115):

NEW QUESTION # 110
Which of the following is a benefit of organization mapping?

- A. An organization map can be reused for training and employee development.
- B. An organization map highlights inefficiencies and reduces operational costs.
- C. An organization map improves the ability to consume, process, and deliver information.
- D. An organization map improves strategic planning.

Answer: D

Explanation:
Organization mapping is a technique used to represent the structure and relationships within an organization. Here's a detailed explanation of its benefits, particularly for strategic planning:
Organization Mapping:
Organization maps visually represent the hierarchical structure of an organization, including departments, teams, and reporting relationships. They provide insights into how the organization is structured and how different parts interact.
Benefits for Strategic Planning:
Alignment with Strategy: An organization map helps in aligning organizational structure with strategic goals. By understanding how the organization is structured, leaders can ensure that resources are allocated efficiently and that the organizational design supports the strategic objectives.
Identifying Gaps and Overlaps: Organization maps highlight areas where there might be gaps or overlaps in roles and responsibilities. This information is crucial for making strategic decisions about restructuring or reallocating resources.
Improving Communication: By clearly depicting the organizational structure, these maps improve communication and collaboration within the organization. This is particularly important for strategic planning, as it ensures that all parts of the organization are aligned and working towards the same goals.
TOGAF Reference:
Phase B: Business Architecture: Organization mapping is a key activity in this phase, where the current organizational structure is analyzed to ensure it supports the business strategy and architecture vision.
Strategic Planning: TOGAF emphasizes the importance of aligning the business architecture with strategic planning. Organization maps are tools that facilitate this alignment by providing a clear representation of the organizational structure.
In summary, organization mapping improves strategic planning by providing a clear, visual representation of the organizational structure, helping to align resources and design with strategic goals.

NEW QUESTION # 111
Which of the following is guidance for creating value streams?

- A. Create an initial set of value streams that provide a one-to-one mapping to existing capabilities.
- B. Include operational levels of detail.
- C. Clearly define the triggering stakeholder.
- D. Identify the top-level value streams from components of capabilities.

Answer: C

Explanation:
Value streams represent the series of steps an organization takes to deliver value to a customer or stakeholder.
A key principle in defining value streams is clarity about who initiates the value stream and what triggers it.
This is essential for several reasons:
* Understanding customer needs: Identifying the triggering stakeholder helps to understand their specific needs and expectations, which drives the design and optimization of the value stream.

* Defining scope and boundaries: Knowing the trigger helps to define the starting and ending points of the value stream, ensuring that it encompasses all the necessary activities to deliver the desired value.
* Measuring effectiveness: With a clear trigger, it becomes possible to measure the effectiveness of the value stream by tracking how well it meets the needs of the triggering stakeholder.

NEW QUESTION # 112

Which of the following are used for structuring a business capability map?

- A. Stratification, Leveling
- B. Mapping, Sorting
- C. Aligning, Layering
- D. Categorizing, Grouping

Answer: D

Explanation:
A Business Capability Map is structured by categorizing and grouping capabilities into high-level clusters that align with business objectives. This approach aligns with TOGAF principles for clarity and simplification in business capability representation, enabling a coherent view of business abilities.
Reference:
Business capability maps provide a structured view of what an organization does to achieve its objectives. To create a clear and understandable map, capabilities need to be organized effectively. Categorizing and grouping are the primary methods used for this purpose:
Categorizing: This involves classifying capabilities into different types or categories based on their characteristics or purpose.
Common categories include:
Core capabilities: Essential for the organization's core business.
Supporting capabilities: Enable or enhance core capabilities.
Customer-facing capabilities: Directly interact with customers.
Operational capabilities: Focus on internal operations.
Grouping: This involves grouping related capabilities together to create a hierarchical structure. This helps to visualize relationships between capabilities and understand how they contribute to broader business functions

NEW QUESTION # 113

Consider the following business capability map. where cells of a model are given different colors to represent desired maturity levels (Green (G) = level achieved, yellow (Y) = one level away, red (R) =two or more levels away, purple (P) = missing capability):

Which of the following best describes what this shows?

- A. Agent Management needs immediate attention. Market Planning. HR Management and Government Relations Management need attention. Customer Management. Training Management and Partner Management need attention but are of lower priority.
- B. Policy Management. Government Relations Management, and HR Management need immediate attention. Partner Management. Account Management, and Training Management have issues but are of lower priority Agent Management Is a new business capability that does not exist
- C. Agent Management needs immediate attention. Market Planning. Government Relations Management, and HR

Management have Issues but are of lower priority Partner Management. Customer Management, and Training Management are new business capabilities that do not exist.

- D. The Strategic capabilities need more attention in two areas. Policy Management, and Government Relations Management. Agent Management is missing as a Core capability Information Management needs attention as a Supporting Capability.

Answer: B

Explanation:
The business capability map provided uses color coding to represent the maturity levels of various business capabilities in strategic, core, and supporting functions. The colors indicate the current state or priority for development, with red indicating capabilities that are significantly below desired maturity levels and thus require immediate attention. In this case, Policy Management, Government Relations Management, and HR Management are marked as red, signaling the need for urgent improvement. Yellow indicates capabilities that are closer to the desired state but still need attention, while green shows capabilities that have achieved the desired maturity level. Purple indicates a missing capability that does not currently exist in the enterprise, which is the case for Agent Management.

NEW QUESTION # 114
Where are business scenarios used most prominently in the TOGAF ADM?

- A. They are used in the Phase A to discover and document business requirements.
- B. They are used as part of the lessons learned activity at the end of Phase F.
- C. They are used as part of a business transformation readiness assessment in Phase E.
- D. They are used to resolve impacts across the Architecture Landscape in Phases B, C, and D.

Answer: A

Explanation:
Business scenarios are most prominently used in Phase A (Architecture Vision) of the TOGAF ADM. In this phase, they help in discovering and documenting business requirements by providing detailed and realistic descriptions of business situations. Business scenarios help in identifying the key business drivers, goals, and challenges, ensuring that the architecture development is aligned with the actual needs of the business.
