## Latest SK0-005 Study Notes | 100% Free High Hit-Rate CompTIA Server+ Certification Exam Hottest Certification

Once the user has used our SK0-005 test prep for a mock exercise, the product's system automatically remembers and analyzes all the user's actual operations. The user must complete the test within the time specified by the simulation system, and there is a timer on the right side of the screen, as long as the user begins the practice of SK0-005 quiz guide, the timer will run automatic and start counting. If the user does not complete the mock test question in a specified time, the practice of all SK0-005 valid practice questions previously done by the user will automatically uploaded to our database. The system will then generate a report based on the user's completion results, and a report can clearly understand what the user is good at. Finally, the transfer can be based on the SK0-005 Valid Practice Questions report to develop a learning plan that meets your requirements. With constant practice, users will find that feedback reports are getting better, because users spend enough time on our SK0-005 test prep.

## CompTIA Server+ Certification Exam Sample Questions (Q58-Q63):

### NEW QUESTION # 58

A company has implemented a requirement to encrypt all the hard drives on its servers as part of a data loss prevention strategy.

Which of the following should the company also perform as a data loss prevention method?

- **A. Encrypt all network traffic**
- B. Implement MFA on all the servers with encrypted data
- C. Implement port security on the switches
- D. Block the servers from using an encrypted USB

**Answer: A**

Explanation:

The company encrypted data "at rest", so they need to encrypt data "in transit".

#### NEW QUESTION # 59

A technician is tasked with upgrading 24 hosts simultaneously with a Type 1 hypervisor. Which of the following protocols should the technician use for this upgrade?

- A. SSH
- B. HTTP
- C. VPN
- **D. TFTP**

**Answer: D**

Explanation:

Explanation

TFTP (Trivial File Transfer Protocol) is a simple and lightweight protocol that can be used to transfer files over a network. TFTP is often used to upgrade firmware or software on network devices, such as routers, switches, or servers. TFTP can also be used to install a Type 1 hypervisor, such as VMware ESXi, on multiple hosts simultaneously<sup>12</sup>.

#### NEW QUESTION # 60

An administrator is only able to log on to a server with a local account. The server has been successfully joined to the domain and can ping other servers by IP address. Which of the following locally defined settings is MOST likely misconfigured?

- **A. DNS**
- B. DHCP
- C. TCP
- D. WINS

**Answer: A**

Explanation:

Explanation

This is the most likely misconfigured setting because DNS is the service that resolves hostnames to IP addresses and vice versa. If the DNS server is incorrect or unreachable, the administrator will not be able to log on to the server with a domain account because the server will not be able to authenticate with the domain controller. #### NEW QUESTION # 61

A server administrator recently installed a kernel update to test functionality. Upon reboot, the administrator determined the new kernel was not compatible with certain server hardware and was unable to uninstall the update. Which of the following should the administrator do to mitigate further issues with the newly installed kernel version?

- A. Set a BIOS password to prevent server technicians from making any changes to the system.
- **B. Edit the bootloader configuration file and change the first Kernel stanza to reflect the file location for the last known-good**

kernel files.

- C. Perform a complete OS reinstall on the server using the same media that was used during the initial install.
- D. Edit the bootloader configuration file and move the newest kernel update stanza to the end of the file.

**Answer: B**

Explanation:

The bootloader configuration file is used to specify which kernel version and options to use when booting the system. The first kernel stanza in the file is the default one that is loaded automatically. By editing this stanza and changing it to point to the last known-good kernel files, the administrator can boot the system with a working kernel and avoid any compatibility issues with the new kernel update. #### NEW QUESTION # 62

An administrator needs to disable root login over SSH. Which of the following files should be edited to complete this task?

- A. /etc/ssh/sshd\_config
- B. /root/.ssh/ssh\_config
- C. /root/.ssh/config
- D. /etc/ssh/ssh\_config

**Answer: A**

Explanation:

Explanation

To disable root login over SSH, the server administrator needs to edit the SSH configuration file located at /etc/ssh/sshd\_config. This file contains various settings for the SSH daemon that runs on the server and accepts incoming SSH connections. The administrator needs to find the line that says PermitRootLogin and change it to no or comment it out with a # symbol. Then, the administrator needs to restart the SSH service for the changes to take effect. References: <https://www.howtogeek.com/828538/how-and-why-to-disable-root-login-over-ssh-on-linux/>

#### NEW QUESTION # 63

.....

All SK0-005 test prep is made without levity and the passing rate has up to 98 to 100 percent now. We esteem your variant choices so all these versions of SK0-005 exam guides are made for your individual preference and inclination. We know that tenet from the bottom of our heart, so all parts of service are made due to your interests.
