If you are worry about the coming C_TS422_2023 study materials, our study materials will help you solve your problem. In order to promise the high quality of our C_TS422_2023 study materials, our company has outstanding technical staff, and has perfect service system after sale. More importantly, our good C_TS422_2023 guide questions and perfect after sale service are approbated by our local and international customers. If you want to pass your practice exam, we believe that our learning engine will be your indispensable choices. More and more people have bought our C_TS422_2023 Guide questions in the past years.

SAP C_TS422_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	- Demand Management in SAP S 4HANA: This section covers a comparison of production methods in various manufacturing environments.
Topic 2	- Introduction to SAP S 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S 4HANA, its main components, business applications, and user experience strategy.

Topic 3	• Material Requirements Planning in SAP S • 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.
Topic 4	• Introduction to SAP S • 4HANA Production Planning: This section covers an overview of production planning components, functions, and planning approaches. Exploration of emerging trends.
Topic 5	• Production Orders in SAP S • 4HANA: This section covers BOM item categorization, order status management, availability checks, routing selection, order type setup, and material handling processes.
Topic 6	• Lean Manufacturing in SAP S • 4HANA: This section covers repetitive manufacturing master data, line load planning, and Kanban systems.
Topic 7	• Capacity Planning in SAP S • 4HANA: This section covers a discussion of SAP S • 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.
Topic 8	• Master Data in SAP S • 4HANA: This section covers the exploration of crucial production-related master data elements, with emphasis on bill of material, routing, and production version.
Topic 9	• Process Orders in SAP S • 4HANA: This section covers an introduction to process order components, processing, and relevant master data objects. Overview of Good Manufacturing Practices (GMP) features.

C_TS422_2023 Latest Exam Answers - Latest C_TS422_2023 Test Report

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q42-Q47):

NEW QUESTION # 42
What time element of midpoint scheduled operations can be reduced by reduction strategy settings while dispatching? Note: There are 2 correct answers to this question.

- A. Queue time
- B. Setup time
- C. Teardown time
- D. Move time

Answer: A,D

NEW QUESTION # 43

How would you define pegging in the context of Advanced Planning?

- **A. An evaluation that is ordered according to the billofmaterial structure of all related products represents the relationship between the receipt the issue elements**
- B. An evaluation that is ordered according to the network structure of all related products represents the coverage of issue elements with receipt elements stock
- C. An evaluation to identify overstock situations in the balance between the receipt the issue elements after the production planning run
- D. An evaluation to identify material or capacity shortages in the billofmaterial structure after the production planning run

Answer: A

NEW QUESTION # 44

What is a work center hierarchy?

- A. A group of work centers in a parallel sequence that is used to split production quantities and work on them in parallel
- B. A group of alternative work centers for production structured in hierarchy levels by priorities
- C. A group of work centers in a production line being used in sequence for production
- **D. A group of alternative work centers providing a cumulative available capacity for production**

Answer: D

Explanation:
In SAP S/4HANA, a work center hierarchy(transaction CR21/CR22) organizes work centers for capacity planning and evaluation:
* A group of alternative work centers providing a cumulative available capacity for production(B): A work center hierarchy groups multiple work centers (e.g., CR01-defined centers) into a tree structure (e.
g., a top node with sub-nodes). The system aggregates their capacities (visible in CM01) into a cumulative total, allowing planners to evaluate or assign production across the group as a single capacity pool, often used in bottleneck analysis or reporting.
Hierarchy levels by priorities(A) isn't correct-priorities are set in routings or PP/DS, not hierarchies, which focus on capacity aggregation.Work centers in a production line sequence(C) reflects routing (CA01) or REM line hierarchy (LDM1), not a work center hierarchy.Parallel sequence for splitting quantities(D) is a routing concept (Parallel Sequence), not a hierarchy function. This is per SAP's capacity planning documentation.

NEW QUESTION # 45

You want to create a production order. What methods can you use? Note: There are 2 correct answers to this question.

- **A. Create in Kanban process**
- B. Convert a purchase requisition
- C. Create by order release
- **D. Create without material**

Answer: A,D

Explanation:
In SAP S/4HANA, production orders can be created using various methods depending on the business scenario:
* Create without material(B): Using transaction CO07, you can create a production order without referencing a material master. This is useful for one-off production (e.g., rework or testing) where no standard material is involved, requiring manual entry of components and operations.
* Create in Kanban process(D): In a Kanban-controlled environment (configured via PKMC), a production order can be created automatically when a Kanban bin is set to "Empty." The system uses the production supply area and control cycle to generate the order (e.g., order type PP01), supporting lean manufacturing.
Convert a purchase requisition(A) applies to procurement, not production order creation-planned orders from MRP are converted (CO40/CO41), not purchase requisitions.Create by order release(C) is not a method-release is a subsequent step (CO02), not a creation process. This aligns with SAP's production order creation options.

NEW QUESTION # 46

Mode selection is one of the scheduling options available with Advanced Planning in SAP S/4HANA Cloud Private Edition. When can you use mode selection?

- A. When several production versions are maintained for one product
- B. When multiple planned orders are scheduled in parallel on one resource
- C. When alternative resources are used within one operation
- D. When several operations are maintained for one product

Answer: C

NEW QUESTION # 47

......

Why we let you try our C_TS422_2023 exam software free demo before you purchase? Why we can give you a promise that we will fully refund the money you purchased our software if you fail C_TS422_2023 Exam with our dump? Because we believe that our products can make you success. As the C_TS422_2023 exam continues to update, our software will be always updating with it.
