

Excellent 300-420 Reliable Dump & Passing 300-420 Exam is No More a Challenging Task

P.S. Free & New 300-420 dumps are available on Google Drive shared by ExamsReviews: https://drive.google.com/open?id=1-7bwG3tlq8_Maurnr6lhbu85B1oGkMnA

ExamsReviews is a professional IT certification sites, the certification success rate is 100%. This number is proved by candidates through practice. Because ExamsReviews has a strong IT team of experts, they are committed to study exam questions and answers, and serve the vital interests of the majority of candidates. They use their own professional mind and experience to meet the needs of the candidates. According to the needs of the candidate, they consider the issue from all angles, and manufacturing applicability exam training materials. This material is Cisco 300-420 Exam Training materials, which including questions and answers.

Cisco 300-420 exam is a part of the Cisco Certified Design Professional (CCDP) certification. It is designed to test an individual's knowledge and skills in designing Cisco enterprise networks. 300-420 Exam focuses on various design considerations such as addressing and routing protocols, WAN technologies, network security, and network services.

100% Pass Quiz Efficient Cisco - 300-420 - Designing Cisco Enterprise Networks Reliable Dump

ExamsReviews is a leading platform in this area by offering the most accurate 300-420 exam questions to help our customers to pass the exam. And we are grimly determined and confident in helping you. With professional experts and brilliant teamwork, our 300-420 practice materials have helped exam candidates succeed since the beginning. To make our 300-420 simulating exam more precise, we do not mind splurge heavy money and effort to invite the most professional teams into our group.

Cisco Designing Cisco Enterprise Networks Sample Questions (Q153-Q158):

NEW QUESTION # 153

An engineer is creating a design to enable IPv6 to run on an existing IPv4 IS-IS network. The IPv4 and IPv6 topologies will match exactly, and the engineer plans to use the same router levels for each protocol per interface. Which IS-IS design is required?

- A. multi topology without enabling transition feature
- B. single topology with transition feature enabled
- C. single topology without enabling transition feature
- D. multi topology with transition feature enabled

Answer: B

Explanation:

https://www.cisco.com/c/en/us/td/docs/ios-xml/ios/iproute_isis/configuration/xr-3s/irs-xe-3s-book/ip6-route-isis-xe.html#GUID-04990BCF-8228-459E-AFAA-9FAF1E2136E9 For single-topology IS-IS IPv6, routers must be configured to run the same set of address families. IS-IS performs consistency checks on hello packets and will reject hello packets that do not have the same set of configured address families. For example, a router running IS-IS for both IPv4 and IPv6 will not form an adjacency with a router running IS-IS for IPv4 or IPv6 only. In order to allow adjacency to be formed in mismatched address-families network, the adjacency-check command in IPv6 address family configuration mode must be disabled.

NEW QUESTION # 154

Drag and drop the characteristics from the left onto the Yang model they describe on the right.

Select and Place:

independent of the underlying operating system	Open Model
specific to the underlying operating system	
vendor neutral	Native Model
provided by the vendor for device management	

Answer:

Explanation:

independent of the underlying operating system	Open Model
specific to the underlying operating system	
vendor neutral	Native Model
provided by the vendor for device management	

NEW QUESTION # 155

Which two functions are provided by the Cisco SD-WAN orchestration plane? (Choose two.)

- A. Zero Touch Provisioning
- B. troubleshooting and monitoring
- C. NAT traversal facilitation
- D. centralized provisioning
- E. primary authentication point

Answer: C,E

NEW QUESTION # 156

Which command is needed to enable DHCP snooping if a switchport is connected to a DHCP server?

- A. ip dhcp snooping
- B. ip dhcp trust
- C. ip dhcp snooping information
- D. ip dhcp snooping trust

Answer: D

Explanation:

When configuring DHCP snooping, follow these guidelines:

DHCP snooping is not active until you enable the feature on at least one VLAN, and enable DHCP globally on the switch.

Before globally enabling DHCP snooping on the switch, make sure that the devices acting as the DHCP server and the DHCP relay agent are configured and enabled.

If a Layer 2 LAN port is connected to a DHCP server, configure the port as trusted by entering the "ip dhcp snooping trust" interface configuration command.

If a Layer 2 LAN port is connected to a DHCP client, configure the port as untrusted by entering the no ip dhcp snooping trust interface configuration command.
