With our ANVE exam questions, you can pass the ANVE exam and get the dreaming certification.

Axis Network Video Exam Sample Questions (Q230-Q235):

NEW QUESTION # 230

Which of the following causes the image to get black corners?

- A. The lens is intended for a larger image sensor
- B. WDR is disabled and image is underexposed
- C. WDR is disabled and image is overexposed
- D. The lens is intended for a smaller image sensor

Answer: A

Explanation:

"When a lens intended for a larger sensor is used on a smaller sensor camera, the projected image circle does not fully cover the sensor area, causing vignetting or black corners in the image."

- Axis Lens Guide White Paper

"Black corners or vignetting often result from a mismatch between lens and sensor size."

NEW QUESTION # 231

A convenience store needs a camera to cover the entrance. Identification is needed at 80 pixels per face.

Given that the scene is 2 m (6 ft 7 in) wide, which of these resolutions is the minimum one needed?

- A. 800 X 600
- B. 640X480
- C. 1280 X 720
- D. 1920 X 1080

Answer: C

Explanation:

To achieve identification at 80 pixels per face for a scene that is 2 meters (6 feet 7 inches) wide, a minimum resolution of 1280 x 720 is needed. This calculation ensures that each face captured in the frame meets the pixel density requirement for clear identification purposes.

NEW QUESTION # 232

A PoE+ device has been connected to a switch with Class 3 PoE ports and is experiencing power issues. How can the issue be resolved?

- A. Connect a PoE extender between the switch and the device
- B. Connect a midspan between the switch and the device
- C. Connect a hub between the switch and the device
- D. Connect a splitter between the switch and the device

Answer: B

Explanation:

"A midspan (PoE injector) can provide the necessary power level for PoE+ (Class 4) devices when the existing switch only supports standard PoE (Class 3). The midspan is placed between the switch and the device."

- Axis PoE Solutions Overview

"A midspan is recommended when extra power is needed but the switch does not support the higher class."

- Axis Communications Academy, Network Video Fundamentals, 2022

NEW QUESTION # 233

When installing a network camera with PoE, which best practices should be taken into consideration?

(Choose two)

- A. The correct cabling standards are being used
- B. The camera has multiple video streams in H.264
- C. The correct PoE standards are being used
- D. The camera is configured for continuous recording
- E. The camera has the correct software version

Answer: A,C

Explanation:

When installing a network camera with PoE, the following best practices should be considered:

* C. The correct PoE standards are being used. This ensures compatibility between the camera and the PoE switch or injector, preventing power issues.

* E. The correct cabling standards are being used. Category 5e or higher cabling is recommended to ensure reliable power delivery and data transmission over PoE.

Following these practices helps in achieving a stable and efficient PoE camera installation.

NEW QUESTION # 234

Which of the following will allow a customer to have a PTZ camera automatically change between three predefined positions?

- A. Switch between the predefined positions using a joystick
- B. Use the auto tracking capability to switch between the preset positions
- C. Configure the camera's I/O ports to control the preset positions
- D. Use the Guard Tour capability to switch between the preset positions

Answer: D

NEW QUESTION # 235

.....
