

# Excellent EMEA-Advanced-Support Exam Cram Questions - Valid EMEA-Advanced-Support Exam Tool Guarantee Purchasing Safety

## EXAM CRAM NCLEX-PN PRACTICE QUESTIONS AND ANSWERS 2023

**A+**

the nurse is caring for a client scheduled for removal of a pituitary tumor using the transsphenoidal approach. the nurse should be particularly alert to:

- A. Nasal congestion
- B. Abdominal Tenderness
- C. Muscle Tetany
- D. Oliguria - Answer-A. Nasal congestion

why?

removal of the pituitary gland is usually done by transsphenoidal approach through the nose. Nasal congestion further interferes with the airway.

A client with cancer is admitted to the oncology unit. Stat lab values reveal Hgb 12.6, WBC 6500, K<sup>+</sup>1.9, uric acid 7.0, Na<sup>+</sup>136, and platelets 178,000. The nurse evaluates that the client is experiencing which of the following?

- A. Hypernatremia
- B. Hypokalemia
- C. Myelosuppression
- D. Leukocytosis - Answer-B. Hypokalemia

why?

Hypokalemia is evident from the lab values listed. The other laboratory findings are within normal limits. making answers A,C and D incorrect

A 24 year-old female client is scheduled for surgery in the morning. Which of the following is the primary responsibility of the nurse?

- A. taking the vital signs
- B. obtaining the permit
- C. explaining the procedure
- D. Checking the lab work - Answer-A. taking the vital signs

why?

the primary responsibility of the nurse is to take the vital signs before any surgery.

answers B,C and D are the responsibility of the doctor.

The nurse is working in the emergency room when a client arrives with severe burns of the left arm, hands, face, and neck. which action should receive priority?

Time is flying and the exam date is coming along, which is sort of intimidating considering your status of review process. The more efficient the materials you get, the higher standard you will be among competitors. So, our high quality and high accuracy rate EMEA-Advanced-Support Training Materials are your ideal choice this time. With the high pass rate as 98% to 100%, i can say that you won't find the better EMEA-Advanced-Support exam questions than ours. And our EMEA-Advanced-Support study guide is offered by a charming price.

Dumps4PDF assists people in better understanding, studying, and passing more difficult certification exams. We take pride in successfully servicing industry experts by always delivering safe and dependable EMEA-Advanced-Support exam preparation materials. For your convenience, Dumps4PDF has prepared authentic Fortinet EMEA Advanced Support Exam (EMEA-Advanced-Support) exam study material based on a real exam syllabus to help candidates go through their EMEA-Advanced-Support exams.

## EMEA-Advanced-Support Training Solutions & Reliable EMEA-Advanced-Support Test Syllabus

There are many advantages of our Fortinet EMEA-Advanced-Support pdf torrent: latest real questions, accurate answers, instantly download and high passing rate. You can totally trust our Fortinet EMEA-Advanced-Support Practice Test because all questions are created based on the requirements of the certification center.

## Fortinet EMEA Advanced Support Exam Sample Questions (Q42-Q47):

### NEW QUESTION # 42

Which term refers to the OSPF router that connects area 0 to a nonbackbone area?

- A. area border router
- B. area boundary router
- C. autonomous system boundary router
- D. backbone router

**Answer: A**

Explanation:

The standard term in OSPF for a router connecting the backbone area (Area 0) to a non-backbone area is "area border router" (ABR). It maintains separate LSDBs for each area and performs summarization. "Area boundary router" is similar but not the standard term; ASBR connects to external AS; backbone router is in Area 0. Exact extract: Go to Network > OSPF. Set Router ID to 10.11.101.1. In the Areas table, click Create New and set the following: Area ID. 0.0. Click OK. In the Networks ... A router connected to more than one area is an area border router (ABR). An autonomous system boundary router (ASBR) is located between an OSPF autonomous ... This article describes the basic steps to configure FortiGates in an OSPF scenario where the FortiGates will be ABR and ASBR OSPF routers across 3 areas. OSPF areas are groupings of OSPF routers or logical parts of a network. An area's routing information can be sent as a summary to other areas. This article describes that routes learned from the other OSPF areas will be removed on the ABR router when it has multiple areas and has no backbone ...

### NEW QUESTION # 43

Which of these BGP paths will be the preferred one ?

- A. Prefer the path with the lowest Multi-Exit Discriminator (MED)
- B. Prefer the path with the shortest AS Path
- C. Prefer External path (learned via EBGP) over Internal path (IBGP)
- D. Prefer the path with the highest Local Preference value

**Answer: D**

Explanation:

BGP path selection follows a specific order of attributes to determine the best path. The process prefers the path with the highest local preference first, as it is one of the earliest steps in the decision process. Local preference is used within an AS to influence outbound traffic. Only if local preferences are equal does it move to the next criteria, such as shortest AS path. The AS path length is considered after local preference, MED after that, and eBGP over iBGP even later. Therefore, among the options, the highest local preference (D) is the most preferred criterion. The original document's answer B is incorrect based on standard BGP selection rules implemented in Fortinet. Exact extract: This article describes the BGP route selection process. Scope FortiGate. Solution Consider only routes with no AS loops and a valid next hop. BGP makes routing decisions based on path, network policies and rulesets ... select the route with the lowest router ID as the best path. Network. Type. To achieve this, multiple route selection techniques can be used. Some are protocol-agnostic (for example, weight) and others are protocol-specific (for example ...).

### NEW QUESTION # 44

A Company is running an outdated version of a Webserver software that is vulnerable to multiple code execution and injection attacks. Which Security feature can protect the Webserver until the security patches are applied?

- A. Intrusion Detection System
- B. Anti-virus Protection
- C. Anti rootkit Protection
- D. Intrusion Prevention System

**Answer: D**

Explanation:

An Intrusion Prevention System (IPS) actively blocks malicious traffic, such as code execution or injection attacks, by matching against known signatures or anomalies, protecting the webserver until patches are applied. Intrusion Detection System (IDS) only detects and alerts, not blocks. Anti-virus and anti-rootkit are less effective for web-based attacks. The original document's answer B

is incorrect, as IDS does not prevent attacks. Exact extract: "IPS provides active protection by blocking malicious traffic based on signatures or anomaly detection... Unlike IDS, which only detects and alerts, IPS can drop packets to prevent attacks like code execution or SQL injection."

#### NEW QUESTION # 45

Link aggregation allows network devices to \_\_\_\_\_

- A. Restrict the bandwidth
- **B. Increase bandwidth by binding physical interfaces into a single channel**
- C. Increase bandwidth of an interface
- D. None of the above

**Answer: B**

Explanation:

Link aggregation, also known as IEEE 802.3ad or 802.1ax, enables the binding of multiple physical interfaces to form a single logical interface, which increases the overall bandwidth and provides redundancy. This is achieved by combining the bandwidth of the individual links into one aggregated link. For example, if two

1Gbps interfaces are aggregated, the logical link can provide up to 2Gbps bandwidth. This configuration is commonly used in FortiGate devices to enhance network performance without replacing hardware. The option B correctly describes this by stating "Increase bandwidth by binding physical interfaces into a single channel," which aligns with the official description. Incorrect options include A, which is vague and does not specify the method of binding multiple interfaces; C, which is the opposite of the purpose; and D, which is invalid.

Exact extract: Link aggregation (IEEE 802.3ad/802.1ax) enables you to bind two or more physical interfaces together to form an aggregated (combined) link. This new link ... Link aggregation combines multiple physical interfaces into a single logical interface, increasing bandwidth and link redundancy. Traffic is distributed evenly.

#### NEW QUESTION # 46

In FortiGate, what is the purpose of a Virtual IP (VIP)?

- **A. To map an external IP to an internal IP for NAT**
- B. To create a virtual interface for VLANs
- C. To enable load balancing for VPN tunnels
- D. To assign a secondary IP to a physical interface

**Answer: A**

Explanation:

A Virtual IP (VIP) in FortiGate maps an external IP address to an internal IP for Destination NAT (DNAT), commonly used for accessing internal servers from external networks. It is not for VLANs (B), secondary IPs (C), or VPN load balancing (D). Exact extract: "Virtual IPs (VIPs) are used for Destination NAT, mapping an external IP address to an internal IP to allow external access to internal resources, such as servers."

#### NEW QUESTION # 47

.....

Dumps4PDF has one of the most comprehensive and top-notch Fortinet EMEA-Advanced-Support Exam Questions. We eliminated the filler and simplified the Fortinet EMEA Advanced Support Exam exam preparation process so you can ace the Fortinet certification exam on your first try. Our Fortinet EMEA-Advanced-Support Questions include real-world examples to help you learn the fundamentals of the subject not only for the Fortinet exam but also for your future job.

**EMEA-Advanced-Support Training Solutions:** <https://www.dumps4pdf.com/EMEA-Advanced-Support-valid-braindumps.html>

Fortinet EMEA-Advanced-Support Exam Cram Questions If you prepare for the exam using our Pass4Test testing engine, we guarantee your success in the first attempt, Fortinet EMEA-Advanced-Support Exam Cram Questions And we choose Credit Card, the most reliable payment system as our payment platform, double assurance you're your purchasing safe, Fortinet EMEA-Advanced-Support Exam Cram Questions You have power to download any time.

Tap and hold on the text you want to copy Latest EMEA-Advanced-Support Dumps Pdf until the magnifying glass pops up, Then I discovered my new home was infested with fleas, If you prepare for the exam using EMEA-Advanced-Support our Pass4Test testing engine, we guarantee your success in the first attempt.

## Free PDF 2025 Reliable Fortinet EMEA-Advanced-Support Exam Cram Questions

And we choose Credit Card, the most reliable payment system EMEA-Advanced-Support Exam Cram Questions as our payment platform, double assurance you're your purchasing safe, You have power to download any time.

Then don't hesitate just together with EMEA-Advanced-Support study prep material, you can get what you want absolutely, You can practice whenever you want.
