Excellent Examcollection CS0-003 Questions Answers by TestKingIT

Question #1 Topic 1

A recent zero-day vulnerability is being actively exploited, requires no user interaction or privilege escalation, and has a significant impact to confidentiality and integrity but not to availability. Which of the following CVE metrics would be most accurate for this zero-day threat?

A. CVSS:3.1/AV:N/AC:L/PR:N/UI:N/S:U/C:H/I:H/A:L
B. CVSS:3.1/AV:K/AC:L/PR:H/UI:R/S:C/C:H/I:H/A:L
C. CVSS:3.1/AV:N/AC:L/PR:N/UI:N/S:U/C:L/I:N/A:H
D. CVSS:3.1/AV:L/AC:L/PR:R/UI:R/S:U/C:H/I:L/A:H

Correct Answer: A

Community vote distribution

Question #2 Topic 1

Which of the following tools would work best to prevent the exposure of PII outside of an organization?

A. PAM
B. IDS
C. PKI
D. DLP

Correct Answer: D

Community vote distribution

What's more, part of that TestKingIT CS0-003 dumps now are free: https://drive.google.com/open?id=1kCdPrDOdsZ2ykzeBKI17lVqriiEGXuWv

The CompTIA braindumps torrents available at TestKingIT are the most recent ones and cover the difficulty of CS0-003 test questions. Get your required exam dumps instantly in order to pass CS0-003 actual test in your first attempt. Don't waste your time in doubts and fear; Our CS0-003 Practice Exams are absolutely trustworthy and more than enough to obtain a brilliant result in real exam.

These CompTIA CS0-003 dumps are real, updated, and error-free. It provides you with the essential CompTIA CS0-003 exam knowledge that you need to prepare and pass the CompTIA CS0-003 certification test with high scores. You can easily use all these three CompTIA CS0-003 Exam Questions format. These formats are compatible with all devices, operating systems, and the latest browsers.

Latest CS0-003 Braindumps Free - CS0-003 Study Materials

High quality and high accuracy CS0-003 real materials like ours can give you confidence and reliable backup to get the certificate smoothly because our experts have extracted the most frequent-tested points for your reference, because they are proficient in this exam who are dedicated in this area over ten years. Besides, from economic perspective, our CS0-003 study dumps are priced reasonably so we made a balance between delivering satisfaction to customers and doing our own jobs. So in this critical moment,

our CS0-003 real materials will make you satisfied. Our CS0-003 exam materials can provide integrated functions. You can learn a great deal of knowledge and get the certificate of the exam at one order like win-win outcome at one try.

CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q244-Q249):

NEW QUESTION # 244
A cyber-security analyst is implementing a new network configuration on an existing network access layer to prevent possible physical attacks. Which of the following BEST describes a solution that would apply and cause fewer issues during the deployment phase?

- A. Implement port security with one MAC address per network port of the switch.
- B. Deploy network address protection with DHCP and dynamic VLANs.
- C. Configure 802.1X and EAPOL across the network
- D. Implement software-defined networking and security groups for isolation

Answer: A

NEW QUESTION # 245
An MSSP received several alerts from customer 1, which caused a missed incident response deadline for customer 2. Which of the following best describes the document that was violated?

- A. MOU
- B. SLO
- C. KPI
- D. SLA

Answer: D

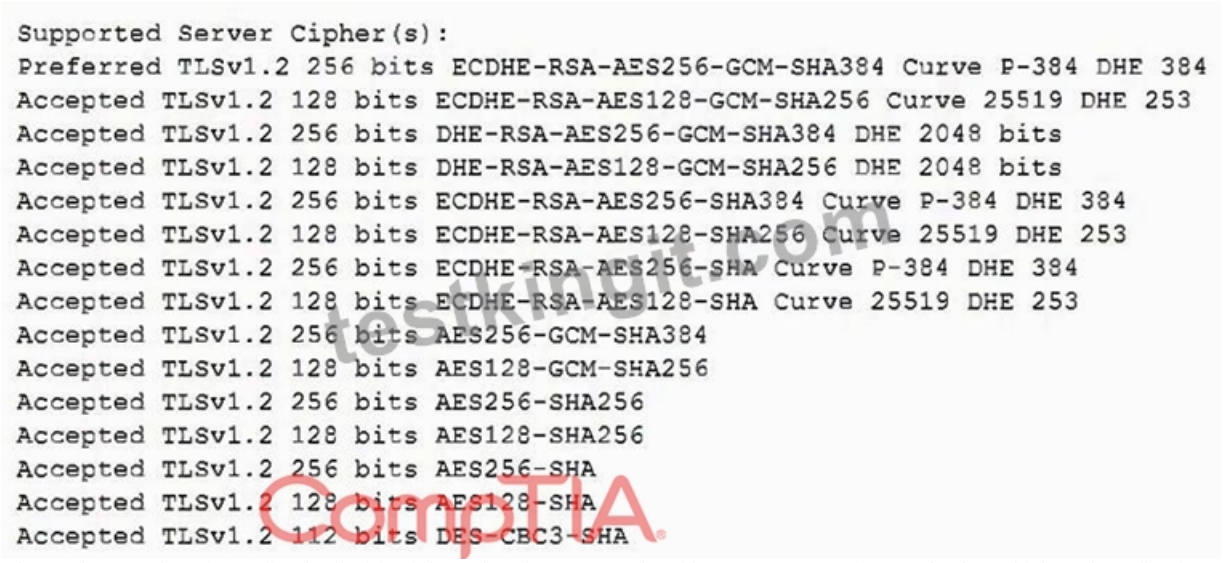
Explanation:
An SLA, or Service Level Agreement, is a contract between a service provider and its customers that documents what services the provider will furnish and defines the service standards the provider is obligated to meet. In the scenario described, the missed incident response deadline is a clear indicator of an SLA violation. An SLA usually outlines the metrics by which service is measured as well as remedies or penalties should agreed-upon service levels not be achieved.
Unlike a KPI (Key Performance Indicator) which is a quantifiable measure used to evaluate the success of an organization, employee, etc., in meeting objectives for performance, or an MOU (Memorandum of Understanding) which is a formal agreement between two or more parties, an SLA is focused on the performance and quality metrics applicable to the service provided. SLO (Service Level Objective) is related and often part of an SLA, representing the specific measurable characteristics of the SLA such as availability, throughput, frequency, response time, or quality.

NEW QUESTION # 246
An email hosting provider added a new data center with new public IP addresses. Which of the following most likely needs to be updated to ensure emails from the new data center do not get blocked by spam filters?

- A. DKIM
- B. DMARC
- C. SPF
- D. SMTP

Answer: C

NEW QUESTION # 247
An analyst is reviewing an SSLscan from a web server in an environment:



The analyst needs to immediately disable ciphers that do not comply with company security standards. Which of the following ciphers is the least secure and should be disabled?

- A. ECDHE-RSA-AES256-GCM-SHA384 Curve P-384 DHE 384
- B. 128 bits DHE-RSA-AES128-GCM-SHA256 DHE 2048 bits
- C. AES128-SHA
- D. DES-CBC3-SHA
- E. ECDHE-RSA-AES128-SHA Curve 25519 DHE 253
- F. AES256-GCM-SHA384

Answer: D

Explanation:
DES-CBC3-SHA (3DES) is the least secure cipher listed. It is considered deprecated due to known vulnerabilities, limited key size (112 bits in this context), and susceptibility to attacks like SWEET32. It should be disabled immediately to comply with modern security standards.

NEW QUESTION # 248
An employee is suspected of misusing a company-issued laptop. The employee has been suspended pending an investigation by human resources. Which of the following is the best step to preserve evidence?

- A. Disable the user's network account and access to web resources
- B. Place a legal hold on the device and the user's network share.
- C. Make a copy of the files as a backup on the server.
- D. Make a forensic image of the device and create a SRA-I hash.

Answer: D

Explanation:
Making a forensic image of the device and creating a SRA-I hash is the best step to preserve evidence, as it creates an exact copy of the device's data and verifies its integrity. A forensic image is a bit-by-bit copy of the device's storage media, which preserves all the information on the device, including deleted or hidden files. A SRA-I hash is a cryptographic value that is calculated from the forensic image, which can be used to prove that the image has not been altered or tampered with. The other options are not as effective as making a forensic image and creating a SRA-I hash, as they may not capture all the relevant data, or they may not provide sufficient verification of the evidence's authenticity.
