H19-102_V2.0 Exam PDF, H19-102_V2.0 Free Brain Dumps

We promise to provide a high-quality simulation system with advanced H19-102_V2.0 study materials. With the simulation function, our H19-102_V2.0 training guide is easier to understand and have more vivid explanations to help you learn more knowledge. You can set time to test your study efficiency, so that you can accomplish your test within the given time when you are in the Real H19-102_V2.0 Exam. You will be confident if you have more experience on the H19-102_V2.0 exam questions!

Huawei H19-102_V2.0 (HCSA-Sales-Transmission & Access V2.0) Certification Exam is an important certification for individuals who want to pursue a career in the telecommunications industry. HCSA-Sales-Transmission & Access V2.0 certification validates the skills and knowledge needed to succeed in sales and transmission roles within the industry. With the right training and preparation, candidates can pass the exam and demonstrate their expertise in this field.

Huawei HCSA-Sales-Transmission & Access V2.0 Sample Questions (Q56-Q61):

NEW QUESTION # 56

The main components of the POL network are OLT, ODN, ONU.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

A Passive Optical LAN (POL) network, as per HCSA-Sales-Transmission & Access, consists of:

OLT (Optical Line Terminal): The central device managing the network.

ODN (Optical Distribution Network): Passive infrastructure (e.g., fibers, splitters) connecting OLT to ONUs.

ONU (Optical Network Unit): The endpoint device at customer premises.

These are the core components of Huawei's POL (e.g., Campus OptiX), making the statement TRUE.

NEW QUESTION # 57

PON is short for Passive Optical Network. It is a point-to-point (P2P) access mode.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

PON is Passive Optical Network, but it uses a point-to-multipoint (P2MP) topology, not P2P, per HCSA- Sales-Transmission & Access. P2P dedicates a fiber per user, while PON shares via splitters, making the statement FALSE.

NEW QUESTION # 58

POL (OLT & ONU) can be sold independently in office scenario.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

Passive Optical LAN (POL) is an all-optical enterprise networking solution comprising Optical Line Terminals (OLT) and Optical Network Units (ONU). In office scenarios, Huawei's Campus OptiX POL solution allows flexibility in deployment. Official HCSA- Sales-Transmission & Access documents confirm that OLTs and ONUs can be sold independently based on customer needs, such as upgrading existing infrastructure or deploying specific components in a phased approach. For example, an office might procure an OLT to centralize management while adding ONUs later to expand coverage. This modularity supports tailored solutions, making the statement TRUE.

NEW QUESTION # 59

How many OLT models are there in Huawei's OLT family?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

Huawei's OLT family (SmartAX series) includes models like EA5800-X17, X7, X2, and others, totaling at least 4 variants, per HCSA-Sales-Transmission & Access, making A correct.

NEW QUESTION # 60

One single fiber can support multiple services (Wi-Fi, Internet, Telephone, TV) in the Campus OptiX solution.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

Huawei's Campus OptiX (POL) solution uses a single optical fiber to carry multiple services simultaneously, including:

#Wi-Fi - Fiber backhaul for wireless access points.#Internet - High-speed broadband access.#Telephone (VoIP/POTS) - Voice services over optical fiber.#TV (IPTV, CATV) - Video transmission over the same infrastructure.
 Since optical fiber has high bandwidth and low latency, it can efficiently transmit all these services using different wavelengths or logical VLANs.
 Thus, the correct answer is TRUE.

NEW QUESTION # 61
