Salesforce Certified OmniStudio Consultant Sample Questions (Q59-Q64):

NEW QUESTION # 59

A customer needs to create an OmniScript to capture payment Information. In the first step of the process, it user selects a payment type such as credit card, debit card, or direct bank account payment. Each payment t should display with a different icon. The process should check to see if the customer has any saved payment information of that type, and if there is, no further action is required. If there is no saved payment informatic then the user should be allowed to enter the information, and the process should save It.

Which three OmniScript elements should be used to meet these requirements?

Choose 3 answers

- **A. Select**
- **B. DataRaptor Post Action**
- C. DataRaptor Extract Action
- **D. Radio**
- E. DataRaptor Transform Action

Answer: A,B,D

Explanation:

Explanation

The three OmniScript elements that should be used to meet these requirements are: Select, DataRaptor Extract Action, and DataRaptor Post Action. A Select element can display a dropdown list of options for the user to choose from, such as payment type. A DataRaptor Extract Action can retrieve data from a Salesforce object, such as saved payment information, and store it in an Interface object or a JSON object. A DataRaptor Post Action can write data to a Salesforce object, such as new payment information, and perform insert or update operations

NEW QUESTION # 60

What is the purpose of Step elements in OmniScript?

- A. Enables the use of repeatable blocks
- B. Groups elements that extract data
- C. Allows the user to input data
- **D. Organizes the script into one or more pages**

Answer: D

NEW QUESTION # 61

A company has a process that requires minimum age to purchase. Potential customers must fill in an application form. Rather than have someone fill in the entire form and be denied at the end, 2 consultant recommends using an Omniscript that will ask users to input their birthdate. If the user is younger than

18 years, then the Omniscript needs to display a message stating "You must be 18 years or older to purchase" and also prevent users from continuing. If the user is 18 or older, then the Omniscript should allow them to proceed without any message.

Which two Omniscript components should the using to meet this validation requirement?

Choose 2 answers

- **A. Alert**
- **B. Formula**
- C. Calculation
- D. Messaging

Answer: A,B

Explanation:

* Formula (C) - The Formula element calculates whether the user is 18 years or older based on the birthdate they input.

* It performs a real-time calculation using the current date minus the birthdate to determine the age.

* Alert (A) - The Alert element is used to display an error message when the user does not meet the age requirement.

* It prevents the user from proceeding until the condition (age >= 18) is met.

* B. Calculation - Calculation is used for business logic and rules processing, but a Formula element is more suitable for real-time validation within an OmniScript.

* D. Messaging - The Messaging element displays information but does not prevent further progress, while an Alert stops the user from continuing.

Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:

* OmniScript Formula Element

* OmniScript Alert Element

NEW QUESTION # 62

Which three functions are performed by Action elements in OmniScript?
Choose 3 answers

- A. Display error messages to the user
- B. Send DocuSign emails for signature
- C. Get and update data through APIs
- D. Get and update data in Salesforce
- E. Organize data into multiple pages

Answer: B,C,D

Explanation:

Explanation

The three functions that are performed by Action elements in OmniScript are get and update data through APIs, send DocuSign emails for signature, and get and update data in Salesforce. Action elements are used to perform various operations on data within an OmniScript. Display error messages to the user is not a function of Action elements, but of Error elements. Organize data into multiple pages is not a function of Action elements, but of Page elements.

NEW QUESTION # 63

A company implements an integration procedure that is invoked from an OmniScript. The integration procedure includes a very long-running process that makes users impatient.

Which feature should the consultant recommend to Improve performance and address users' concerns?

- A. Try Catch
- B. Chaining
- C. Batch jobs
- D. Conditions

Answer: B

Explanation:

The feature that the consultant should recommend to improve performance and address users' concerns is chaining. Chaining is a property that allows an Integration Procedure Action element to run asynchronously in the background, without blocking the user interface. The consultant can use chaining to execute the long-running process in parallel with other actions or steps in the OmniScript, and notify the user when it is completed. This will improve the user experience and reduce waiting time

NEW QUESTION # 64

.....
