Please contact us if you have any questions in purchasing Salesforce-Media-Cloud Exam Prep.

## Salesforce Salesforce-Media-Cloud Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Discovery: This section of the exam measures the skills of a Salesforce Solution Architect and covers the ability to assess business and technical requirements for implementing Media Cloud applications. It includes determining the technical scope for a statement of work (SOW), mapping use cases to Salesforce Media Cloud components, understanding how third-party systems integrate with the Media Cloud ecosystem, outlining system flows based on the existing business environment, and identifying relevant non-functional requirements based on customer needs.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Implement: This section of the exam measures skills of a Salesforce Solution Architect and focuses on implementing the Media Cloud solution based on business and technical requirements. It includes supporting CI</li><li>CD deployment processes, planning data migration with an understanding of the data model, selecting appropriate integration approaches for media-specific contexts, applying security settings to control data access, and ensuring performance outcomes align with defined KPIs and non-functional expectations.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Design: This section of the exam measures the skills of a Salesforce Media Cloud Consultant and covers the process of designing scalable and efficient Media Cloud solutions. It focuses on creating solution flows using ASM capabilities, applying best practices in solution architecture, recommending product model and pricing strategies, and aligning designs with the Media Cloud data model. It also evaluates the candidate's ability to set up sharing and permission sets, identify integration points, assess reporting needs, and determine deployment strategies that fit within a CI</li> <li>• CD environment.</li> </ul>

## **Latest updated Salesforce Salesforce-Media-Cloud Exam Format Are Leading Materials & Top Salesforce-Media-Cloud: Salesforce Media Cloud Accredited Professional (AP) Exam**

Compared with the education products of the same type, some users only for college students, some only provide for the use of employees, these limitations to some extent, the product covers group, while our Salesforce-Media-Cloud research material absorbed the lesson, it can satisfy the different study period of different cultural levels of the needs of the audience. For example, if you are a college student, you can study and use online resources through the student column of our Salesforce-Media-Cloud Study Materials, and you can choose to study in your spare time.

### **Salesforce Media Cloud Accredited Professional (AP) Exam Sample Questions (Q54-Q59):**

#### **NEW QUESTION # 54**

A CTO of a B2B advertising publishing company asked an Administrator who worked on making the Media Cloud application live, for their help in monitoring the real-time information on system performance and security.

Where can the Administrator find this information?

- A. monitor.salesforce.com
- **B. trust.salesforce.com**
- C. media.salesforce.com
- D. system.salesforce.com

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

trust.salesforce.com is the official Salesforce Trust site that provides real-time information on system status, performance, security incidents, and maintenance notifications. Administrators use this site to monitor org health and planned outages. Other options either do not exist or are not official Salesforce system status portals.

Salesforce Trust Site

<https://trust.salesforce.com/en/>

#### **NEW QUESTION # 55**

A company is planning to adopt Media Cloud and has requirements around the relationship between clients and their advertising agencies, where they want to capture the role of each agency so they can identify clearly what is the Agency of Record. They also have requirements to map contacts within the agencies.

How should the Media Cloud data model be used to represent these relationships?

- A. Advertisers and agencies should be created as Accounts, with agencies listed as child Accounts to the client Accounts, with Contacts related to those.
- **B. Advertisers and agencies should be created as Accounts and contacts as Contacts, and the Party Model should be adopted to define the relationships between them**
- C. Advertisers and agencies should be created as Accounts, and a custom lookup field should be created to represent the

client/agency relationship. Contacts should be created under the Accounts.

- D. Advertisers should be created as Accounts, and agencies should be represented by a custom field added to the Contact object. Contacts should then be assigned to the Accounts.

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Party Model in Media Cloud is designed to represent complex relationships between entities such as Advertisers and Agencies. Both are Accounts, and relationships between them (including roles like Agency of Record) are defined via the Party Model, which also supports mapping Contacts within those Accounts. This model provides flexibility and best practice for relationship management over custom lookups or hierarchical Account structures.

**NEW QUESTION # 56**

A customer has the necessary licenses and dependent packages installed and would like to install the Advertising Sales Management (ASM) package.

Which step needs to be taken in order to do this?

- A. Install by using a release package installation link from Salesforce Industries success community, selecting the industries applications package that is generally available (GA) for the target sandbox.
- B. Find the installed package of Salesforce Industries Communications, Media, and Energy managed package in the setup of the sandbox instance and enable ASM.
- C. Go to the Vlocity CMT administration tab in the production org, search for the ASM app, and select enable. Then refresh the target sandbox.
- D. Request a trial org of the ASM package in the Salesforce Industries Media and Entertainment Process Library. Use the trial org requested as the source org for the target sandbox.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The official way to install ASM is via the release package installation link provided in the Salesforce Industries Success Community. This ensures installing the latest GA version for the target sandbox. Other options refer to trial orgs or enabling existing packages but do not follow the official installation path.

**NEW QUESTION # 57**

A client is looking to adopt a new CRM solution to sell advertising products, starting with their Digital Content line of business. They sell standard digital ad products (digital banners, video inserts).

Using Media Cloud Advertising Sales Management (ASM), what is the most efficient approach for modeling these products?

- A. Create a new Salesforce object for the Digital Ad Products specifications, link that object to the Product2 object, and configure the required products using the Product page layout.
- B. Create the required characteristics of the products in the Product object and configure the required products using the Product page layout.
- C. Configure an OmniScript that will retrieve the products from Google Ad Manager and will be used in sales processes.
- D. **Configure a product using Product Designer and associate the product to an Ad Space Specification.**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Product Designer in Media Cloud allows modeling complex advertising products efficiently by associating them with Ad Space

Specifications, ensuring correct mapping to ad inventory. This approach streamlines product configuration for sales users. Creating custom objects or relying solely on Product page layouts is less efficient and lacks native support for media-specific attributes.

### NEW QUESTION # 58

Which two features should a Consultant keep in mind when proposing the use of JSON-based mapping over Object-based mapping for Contract templates?

Choose 2 answers

- A. The data to extract and merge into the template must exist in standard objects.
- B. JSON-mapping allows for filtering individual line items or repeatable content items to display in a document, but Object-based mapping does not.
- C. The Consultant can use the item section for any type of item list, not only for line items.
- D. Only Contract, Opportunity, Order, and Quote objects are supported when mapping fields in JSON-based mapping.
- E. Documents cannot display attribute data unless the Custom section in the document template is used.

**Answer: B,C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

JSON-based mapping offers greater flexibility, such as allowing the item section to include any list type, not just line items, and supports filtering for repeatable content in documents. Object-based mapping is more rigid and limited to standard object types.
