

Excellent VMCE_v12 Valid Test Simulator by Prep4sures

P.S. Free 2025 Veeam VMCE_v12 dumps are available on Google Drive shared by Prep4sures: <https://drive.google.com/open?id=1N3pUy5kzx0BRY3k1w2g-ooDGjokOasUr>

According to the research of the past exams and answers, Prep4sures provide you the latest Veeam VMCE_v12 exercises and answers, which have a very close similarity with real exam. Prep4sures can promise that you can 100% pass your first time to attend Veeam Certification VMCE_v12 Exam.

Veeam VMCE_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.
Topic 2	Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.
Topic 3	Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.
Topic 4	Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.
Topic 5	Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.
Topic 6	Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.
Topic 7	Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.
Topic 8	Data protection strategies: This section of the exam covers an overview of data protection strategies.
Topic 9	Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.
Topic 10	Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.

Topic 11	• Transport modes: This section aims to analyze different methods to collect and read data from the production environment.
Topic 12	• Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Topic 13	• Initial security considerations: This section defines ways and tools to secure the Veeam backup server.
Topic 14	• Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.
Topic 15	• Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.
Topic 16	• Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.

Exam VMCE_v12 Simulations - New VMCE_v12 Braindumps Pdf

There may be a lot of people feel that the preparation process for exams is hard and boring, and hard work does not necessarily mean good results, which is an important reason why many people are afraid of examinations. Today, our VMCE_v12 study materials will radically change this. High question hit rate makes you no longer aimless when preparing for the exam, so you just should review according to the content of our VMCE_v12 Study Materials prepared for you.

Veeam Certified Engineer v12 Sample Questions (Q58-Q63):

NEW QUESTION # 58

A Scale-out Backup Repository with one local extent has been configured as follows.

A daily VMware backup job retention is 31 days, keeping weekly GFS full backups for 14 weeks. It is Mar, 20. A file from a backup that occurred the week of Jan, 1 must be recovered. Where is the data?

- A. The archive tier
- **B. The capacity tier**
- C. The performance tier
- D. The data is no longer in the Scale-out Backup Repository

Answer: B

Explanation:

Based on the configuration shown in the image, backups older than 21 days are moved to the capacity tier.

Since the VMware backup job retention is set for 31 days and keeps weekly GFS full backups for 14 weeks, the backup from the week of January 1st is older than 21 days but within the 14-week GFS retention policy.

Therefore, as of March 20, the backup data you need to recover would be in the capacity tier, not on the local performance tier, because it has been offloaded to the object storage configured as the capacity tier to reduce long-term retention costs.

NEW QUESTION # 59

A backup administrator is asked to perform a file-level restore on a Windows VM for the first time since Veeam Backup & Replication has been installed and left unconfigured. Which of the following items would be used during this process?

- A. The FLR helper appliance configured for the Restore wizard
- B. The gateway server configured for the repository
- **C. The mount server configured for the repository**
- D. The guest interaction proxy configured for the backup job

Answer: C

Explanation:

Explanation

NEW QUESTION # 60

What describes an RPO?

- A. To clarify how many restore points need to be recovered at the same time
- **B. To confirm the data loss tolerance of a Business Unit or Organization**
- C. To determine the maximum length of time a workload or application can be down
- D. To confirm at what point a backup should be migrated to Object Storage

Answer: B

Explanation:

Recovery Point Objective (RPO) refers to the maximum acceptable amount of data loss measured in time. It is essentially the age of the files that must be recovered from backup storage for normal operations to resume after a failure or disaster. In other words, it defines the data loss tolerance of a business unit or organization. If an RPO is set to one hour, the system must back up at least every hour to meet the RPO.

NEW QUESTION # 61

After performing a failover to a disaster recovery site, it is decided that the VMs need to be failed back to the original production site and that any changes made during the failover should be discarded. Which option should be used?

- A. Undo failback
- B. Failback
- **C. Undo failover**
- D. Commit failback

Answer: C

Explanation:

Explanation

https://helpcenter.veeam.com/docs/backup/vsphere/undo_failover.html?ver=120

NEW QUESTION # 62

A Veeam administrator has been tasked to create a backup that will automatically make a copy of data on a different media type, while also being off site, without creating additional backup or backup copy jobs. The administrator has determined that a Scale-out Backup Repository can be used as part of the solution. How can this be accomplished?

- A. Add an archive tier to the Scale-out Backup Repository and enable the "Copy" option.
- B. Add an archive tier to the Scale-out Backup Repository and enable "GFS Tiering".
- **C. Add a capacity tier to the Scale-out Backup Repository and enable the "Copy" option.**
- D. Add a capacity tier to the Scale-out Backup Repository and enable the "Move" option.

Answer: C

Explanation:

By adding a capacity tier to the Scale-out Backup Repository and enabling the "Copy" option, the administrator can create a backup that automatically copies data to a different media type (object storage) and also ensures that the data is offsite. This is accomplished without creating additional backup or backup copy jobs. The "Copy" option allows for immediate copying of backups to the capacity tier, meeting the criteria specified.

NEW QUESTION # 63

.....

Our customer service is available all day, and your problems can be solved efficiently at any time. Last but not least, we can guarantee the security of the purchase process of VMCE_v12 Test Questions and the absolute confidentiality of customer information. You do not have to worry about these issues, because we know that this is a basic condition for us to establish a good business model. If you have any questions, you can always contact us online or email us. We will reply as soon as possible.
