NEW QUESTION # 134

Which of the following statements about customer's quality expectations and acceptance criteria are true?

1. Customer's quality expectations form a specific and precise list of measurable criteria that a project product should meet in order to be acceptable to key stakeholders.
 2. Acceptance criteria are often expressed in broad terms as a means to gain common understanding of general quality requirements.
- A. Only 1 is true
 - B. Both 1 and 2 are true
 - C. Only 2 is true
 - D. Neither 1 or 2 are true

Answer: C

Explanation:

In PRINCE2, customer's quality expectations (CQEs) are a high-level statement of what the customer expects from the project and are often expressed in broad terms. They are not necessarily measurable on their own but provide a sense of general quality requirements. In contrast, acceptance criteria are specific and precise; they form the list of conditions that a project product must meet to be accepted by key stakeholders.

Therefore, statement 1 is false, and statement 2 correctly describes the customer's quality expectations.
