We have to admit that the exam of gaining the AZ-140 certification is not easy for a lot of people, especial these people who have no enough time. If you also look forward to change your present boring life, maybe trying your best to have the AZ-140 latest questions are a good choice for you. Now it is time for you to take an exam for getting the certification. If you have any worry about the AZ-140 Exam, do not worry, we are glad to help you. Because the AZ-140 cram simulator from our company are very useful for you to pass the AZ-140 exam and get the certification.

Microsoft AZ-140 exam is part of the Microsoft Certified: Azure for Operators Associate certification track. Candidates who pass AZ-140 exam demonstrate their ability to deploy and manage virtual desktops and applications in the cloud using Microsoft Azure Virtual Desktop. They also gain recognition as experts in virtual desktop infrastructure, which is a growing field as more organizations adopt cloud-based solutions for their IT needs.

Microsoft AZ-140 Certification Exam covers a wide range of topics related to Azure Virtual Desktop, including planning and deploying virtual desktop infrastructure, configuring virtual machine settings, managing user profiles, configuring remote access, configuring security, and monitoring and optimizing Azure Virtual Desktop environments. Candidates are required to have a deep understanding of these topics to pass the exam.

By Achieving the Microsoft AZ-140 You will Get the Job

For the recognition of skills and knowledge, more career opportunities, professional development, and higher salary potential, the Microsoft AZ-140 certification exam is the proven way to achieve these tasks quickly. Overall, we can say that with the Configuring and Operating Microsoft Azure Virtual Desktop (AZ-140) exam you can gain a competitive edge in your job search and advance your career in the tech industry.

Microsoft AZ-140 exam is designed for IT professionals who want to specialize in configuring and operating Microsoft Azure Virtual Desktop. AZ-140 exam measures the skills and knowledge required to manage, monitor, and maintain virtual desktop environments in the cloud. Passing AZ-140 Exam validates the expertise of professionals in designing and implementing virtual desktop infrastructure solutions using Microsoft Azure technologies.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q165-Q170):

NEW QUESTION # 165

Hotspot Question

You have an Azure Virtual Desktop host pool that contains 20 Windows 11 session hosts.

You create a Windows Defender Application Control (WDAC) policy named Policy1.xml.

You need to deploy Policy1.xml to the session hosts.

How should you prepare the policy, and to where should you copy the policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

To prepare the policy:

- ☐ Compress Policy1.xml.
- ☐ Convert Policy1.xml to its binary form.
- ☐ Digitally sign Policy1.xml.

Copy the policy to:

- ☐ C:\Windows\System32\AppLocker
- ☐ C:\Windows\System32\Configuration
- ☐ C:\Windows\System32\Codeintegrity\CiPolicies\Active
- ☐ C:\Windows\SystemResources\Windows\UI.AccountsControl

Answer:

Explanation:

Answer Area

To prepare the policy:

- Compress Policy1.xml.
- Convert Policy1.xml to its binary form.
- Digitally sign Policy1.xml.

Copy the policy to:

- C:\Windows\System32\AppLocker
- C:\Windows\System32\Configuration
- C:\Windows\System32\CodeIntegrity\CiPolicies\Active
- C:\Windows\SystemResources\Windows\UI.AccountsControl

Explanation:

NEW QUESTION # 166

You have a Windows Virtual Desktop host pool that has a max session limit of 15. Disconnected sessions are signed out immediately.

The session hosts for the host pool are shown in the following exhibit.

Name ↑↓	Status ↑↓	Drain mode ↑↓	Assigned User ↑↓	Active sessions	Resource group ↑↓
WVD-0	Available	Off	-	11	rg-wvd
WVD-1	Available	Off	-	2	RG-WVD
WVD-2	Available	On	-	0	RG-WVD
WVD-3	Available	Off	-	15	RG-WVD
WVD-5	Available	On	-	0	RG-WVD
WVD-6	Available	Off	-	13	RG-WVD
WVD-4	Unavailable	Off	-	0	RG-WVD

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

The host pool type is [answer choice].

pooled
personal with direct assignment
personal with automatic assignment

New sessions can occur on [answer choice] only.

WVD-0, WVD-1, and WVD-6
WVD-0, WVD-1, WVD-3, and WVD-6
WVD-0, WVD-1, WVD-2, WVD-5, and WVD-6

Answer:

Explanation:

The host pool type is [answer choice].

New sessions can occur on [answer choice] only.

NEW QUESTION # 167

Hotspot Question

You have an Azure subscription named Subscription1 that contains the users shown in the following table.

Name	Member of
User1	Group1, Group3
User2	Group2, Group3

Subscription1 contains the Azure Virtual Desktop host pools shown in the following table.

Name	Session host in host pool	Session host public inbound ports
Pool1	P1-0.contoso.com	None
Pool2	P2-0.contoso.com	None

Subscription1 contains the Azure Virtual Desktop application groups shown in the following table.

Name	Host pool	Application group type
AppGroup1	Pool1	Desktop
AppGroup2	Pool2	Desktop

You perform the role assignments shown in the following table.

Role	To group	For resource
Desktop Virtualization Reader	Group3	Subscription1
Desktop Virtualization User Session Operator	Group1	Pool1
Desktop Virtualization User	Group3	AppGroup2
Virtual Machine User Login	Group1	P1-0.contoso.com

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

User1 can connect to the P1-0.contoso.com session host.

☐
☐

User2 can connect to the P1-0.contoso.com session host.

☐
☐

User2 can connect to the P2-0.contoso.com session host.

☐
☐

Answer:

Explanation:

User1 can connect to the P1-0.contoso.com session host.	☒	☐
User2 can connect to the P1-0.contoso.com session host.	☐	☒
User2 can connect to the P2-0.contoso.com session host.	☒	☐

Explanation:

Box 1: Yes

The P1-0.contoso.com session host is in Pool1.

Group1 has the Desktop Virtualization User Session Operator role for Pool1.

User1 is member of Group1.

Desktop Virtualization User Session Operator

The Desktop Virtualization User Session Operator role allows users to send messages, disconnect sessions, and use the "logoff" function to sign sessions out of the session host.

However, this role doesn't let users perform session host management like removing session host, changing drain mode, and so on.

This role can see assignments, but can't modify admins.

We recommend you assign this role to specific host pools. If you give this permission at a resource group level, the admin will have read permission on all host pools under a resource group.

Box 2: No

User2 is member of Group2 and Group3. Those do not give access to the P1-0.contoso.com session host in Pool1.

Box 3: Yes

User2, as a member of Group3, is a Desktop Virtualization User for AppGroup2. Pool2 is in AppGroup2. The P2-0.contoso.com session host is in Pool2.

Desktop Virtualization User -

The Desktop Virtualization User role allows users to use the applications in an application group.

NEW QUESTION # 168

Hotspot Question

You plan to deploy Azure Virtual Desktop.

Users have the devices shown in the following table.

Type	Platform
Tablet	Windows 10 Pro
Phone	Android
Laptop	macOS

From which device types can the users connect to Azure Virtual Desktop resources by using the Remote Desktop client app and the Remote Desktop web client? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area 

Remote Desktop client app:

▼
Tablet only
Tablet and phone only
Tablet and laptop only
Tablet, phone, and laptop

Remote Desktop web client:

▼
Tablet only
Tablet and phone only
Tablet and laptop only
Tablet, phone, and laptop

Answer:

Explanation:

Answer Area

Remote Desktop client app:

▼
Tablet only
Tablet and phone only
Tablet and laptop only
Tablet, phone, and laptop

Remote Desktop web client:

▼
Tablet only
Tablet and phone only
Tablet and laptop only
Tablet, phone, and laptop

Explanation:

There are RDC apps in Windows, Android, and MacOS stores.

For the web client, you'll need a PC running Windows, macOS, ChromeOS, or Linux. Mobile devices aren't supported at this time.

<https://learn.microsoft.com/en-us/windows-server/remote/remote-desktop-services/clients/remote-desktop-web-client>

NEW QUESTION # 169

You have an Azure subscription that contains a user named User1.

The subscription uses the Azure Virtual Desktop host pools shown in the following table.

Name	Type	Session host operating system	Number of hosts
Pool1	Pooled	Windows Server 2019 Datacenter	2
Pool2	Pooled	Windows 10 Enterprise multi-session	10
Pool3	Personal	Windows 11 Enterprise	10

You need to ensure that User1 can create RemoteApp app groups that will be used to stream a suite of custom apps from the host pools. The solution must meet the following requirements:

- * The apps must be available to the users in all the pools.
- * The principle of least privilege must be followed.
- * Administrative effort must be minimized.

Which role should you assign to User1, and what is the minimum number of app groups that User1 should create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Role:  

- Desktop Virtualization Application Group Contributor
- Desktop Virtualization Contributor
- Desktop Virtualization Host Pool Contributor
- Desktop Virtualization Workplace Contributor

Number of app groups: 

- 1
- 2
- 3
- 22

Answer:

Explanation:

Answer Area

Role:  

- Desktop Virtualization Application Group Contributor
- Desktop Virtualization Contributor
- Desktop Virtualization Host Pool Contributor
- Desktop Virtualization Workplace Contributor

Number of app groups: 

- 1
- 2
- 3
- 22
