Microsoft MB-335 Online Training Materials | MB-335 Valid Exam Cram

Our company is committed to the success of our customers. All company tenets are customer-oriented. Our MB-335 practice questions are created with the utmost profession for we are trained for this kind of MB-335 study prep with the experience and knowledge of professionals from leading organizations around the world. Our company MB-335 Exam Quiz is truly original question treasure created by specialist research and amended several times before publication.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q138-Q143):

NEW QUESTION # 138

A company uses Dynamics 365 Supply Chain Management.

The marketing group needs to be able to view a manufacturer's suggested retail price (MSRP) for a new bill of materials (BOM) item when the cost of the BOM item is calculated.

You need to configure the functionality.

What should you do?

- A. Set the sales price model field on the calculation group to item sales price.
- B. Use the category price rules to generate a trade agreement with the sales price.
- C. Add a profit setting percentage to the released BOM product.
- **D. Add a profit setting percentage to a calculation group.**
- E. Add a profit setting percentage to a cost group.

Answer: D

Explanation:

To view the manufacturer's suggested retail price (MSRP) for a new bill of materials (BOM) item, you need to configure a calculation group with a profit setting percentage. A calculation group is a group of settings that determine how the cost and sales price of a BOM item are calculated¹. A profit setting percentage is a percentage that is added to the cost of a BOM item to calculate the sales price². You can specify a profit setting percentage for each calculation group on the Calculation groups page³. When you calculate the cost and sales price of a BOM item, you must select a calculation group on the Calculations page. The calculation group determines the cost model and sales price model that are used for the BOM calculation. The cost model defines how the cost of the BOM item is calculated based on the cost categories and cost groups of the components and operations. The sales price model defines how the sales price of the BOM item is calculated based on the profit setting percentage and the cost model.

By using a calculation group with a profit setting percentage, you can view the MSRP for a new BOM item when you calculate its cost and sales price. The MSRP will be shown as the calculated sales price on the Calculate item cost page. You can also view the calculation details and see how the profit setting percentage is applied to the cost of the BOM item.

The other options are not correct, because they do not allow you to view the MSRP for a new BOM item when you calculate its cost. Setting the sales price model field on the calculation group to item sales price would use the existing sales price of the BOM item from the Item price page, instead of calculating a new sales price based on a profit setting percentage. Using the category price rules to generate a trade agreement with the sales price would create a trade agreement line for the BOM item based on its category, but it would not show the MSRP when you calculate its cost. Adding a profit setting percentage to the released BOM product or to a cost group would have no effect, because these entities do not affect how the sales price of a BOM item is calculated.

1: Calculation groups 2: Profit settings 3: Create or modify calculation groups : [BOM calculations] : [Cost models and sales price models] : [Calculate costs and prices for manufactured items] : [Category pricing rules]

NEW QUESTION # 139

You need to resolve the issue for UserG.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Item setup	Assign size and color.
Lifecycle state	Assign size and color.
	Assign Product Master constraints.
	Assign size and style.
	Assign product category.
Lifecycle state	Assign to the Product Variant. Set as inactive after the holiday season.
	Assign to the Product Master. Set as inactive after the holiday season.
	Assign to the Product Variant. Set as inactive after the holiday season.
	Assign to the Product Master. Set as active after the holiday season.
	Assign to the Product Variant. Set as active after the holiday season.

Answer:

Explanation:

Requirement	Action
Item setup	Assign size and color.
Lifecycle state	Assign size and color.
	Assign Product Master constraints.
	Assign size and style.

	Assign to the Product Variant. Set as inactive after the holiday season.
	Assign to the Product Master. Set as active after the holiday season.
	Assign to the Product Variant. Set as active after the holiday season.

NEW QUESTION # 140

A discrete manufacturer uses the time and attendance registration for production operations.

All employees register daily clock in and clock out times during a 40-hour, Monday through Friday workweek.

Pay periods are every two weeks. Workers are paid hourly.

The production manager will create work schedules with the following windows:

- * Mandatory work hours
- * Work hours during which employees can leave early without accruing absences
- * Work hours during which employees can work extra time

If a junior production worker works over 90 hours in a pay period, the worker will receive time and a half over 80 hours. If a senior production worker works over 90 hours in a pay period, the worker will receive double time over 80 hours.

You need to configure the system for these requirements.

Where should you configure this functionality? To answer, drag the appropriate forms to the correct requirements. Each form may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Forms	Requirement	Form
Workers	Configure the overtime calculations.	
Flex groups	Configure the periods of time that a worker can choose whether to work.	
Worker groups		
Calendar working times		

Answer:

Explanation:

Forms	Requirement	Form
Workers	Configure the overtime calculations.	Workers
Flex groups	Configure the periods of time that a worker can choose whether to work.	Flex groups
Worker groups		
Calendar working times		

NEW QUESTION # 141

You work for a gem wholesaler that sells raw diamonds. Diamonds are purchased and sold in individual boxes but weighed and inventoried in carats.

You are setting up a catch weight item for diamonds. Each box of diamonds must be tracked by its individual container weight.

You need to set up this item as a full visibility catch weight item.

Which two steps must you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Assign the item a Tracking dimension group with active serial number control
- B. Assign it a Serial number group with per qty. defined as 1.
- C. Assign a Tracking dimension group with batch number as the only active tracking dimension.
- D. Create an inter-class unit of measure conversion between boxes and carats.

Answer: A,D

Explanation:

* A catch weight item is an item that is sold by one unit of measure but is managed in inventory by a different unit of measure¹. For example, diamonds are sold by boxes but weighed by carats. A full visibility catch weight item is a catch weight item that requires the weight of each individual container to be tracked². For example, each box of diamonds must have its own weight recorded.

* To set up a catch weight item for diamonds, you must do the following steps²:

* Assign the item a Tracking dimension group with active serial number control. This enables the item to be tracked by serial numbers, which represent the individual containers of the item.

Each serial number will have its own weight associated with it.

* Assign the item a Serial number group with per qty. defined as 1. This ensures that each container of the item has a unique serial number and that only one container can be assigned to a serial number.

* Create an inter-class unit of measure conversion between boxes and carats. This defines the

* relationship between the sales unit and the inventory unit of the item. The conversion factor can be based on a nominal weight or an average weight of the containers.

NEW QUESTION # 142

A manufacturing company uses Dynamics 365 Supply Chain Management. The company operates three eight-hour shifts per day, Monday through Friday.

The company purchased equipment for a new process that cannot be performed with existing equipment. This specialized equipment performs only this unique task. The machinery must always be monitored and controlled by a worker.

The machine must be added to the existing production line and be ready as soon as possible. Future planned production orders must not overload the running maximums of the new machine.

You need to configure the system.

Which four actions must you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Assign the machine resource to the route operation and approve the route version.
- Add the machine as a resource and set the Exclusive checkbox to **Yes**.
- Add the machine as a resource and set the Finite capacity checkbox to **Yes**.
- Create a capability for the machining functions and assign it to the machine.
- Create a working time template.
- Assign a working time calendar to the resource.

Answer area

Answer:

Explanation:

Actions

- Assign the machine resource to the route operation and approve the route version.
- Add the machine as a resource and set the Exclusive checkbox to **Yes**.
- Add the machine as a resource and set the Finite capacity checkbox to **Yes**.
- Create a capability for the machining functions and assign it to the machine.
- Create a working time template.
- Assign a working time calendar to the resource.

Answer area

- Add the machine as a resource and set the Finite capacity checkbox to **Yes**.
- Create a capability for the machining functions and assign it to the machine.
- Create a working time template.
- Assign a working time calendar to the resource.

Explanation:

Actions

- Assign the machine resource to the route operation and approve the route version.
- Add the machine as a resource and set the Exclusive checkbox to **Yes**.

Answer area

- Add the machine as a resource and set the Finite capacity checkbox to **Yes**.
- Create a capability for the machining functions and assign it to the machine.
- Create a working time template.
- Assign a working time calendar to the resource.

NEW QUESTION # 143

.....

We are dedicated to help you pass the exam and gain the corresponding certificate successful. MB-335 exam cram is high-quality, and you can pass your exam by using them. In addition, MB-335 exam braindumps cover most of knowledge points for the exam, and you can also improve your ability in the process of learning. You can obtain the download link and password within ten minutes, so that you can begin your learning right away. We have free update for 365 days if you buying MB-335 Exam Materials, the update version for MB-335 exam cram will be sent to your email automatically.
