

100% Pass Quiz Palo Alto Networks - PSE-Cortex-Pro-24—High-quality Reliable Exam Practice

BTW, DOWNLOAD part of Lead2Passed PSE-Cortex-Pro-24 dumps from Cloud Storage: <https://drive.google.com/open?id=1RKcNT9FWzRfu0cVRuBmw0T3DEAV375MK>

Our PSE-Cortex-Pro-24 exam questions are compiled by experts and approved by authorized personnel and boost varied function so that you can learn PSE-Cortex-Pro-24 test torrent conveniently and efficiently. We provide free download and tryout before your purchase. Our PSE-Cortex-Pro-24 exam questions just need students to spend 20 to 30 hours practicing on the platform which provides simulation problems, can let them have the confidence to pass the PSE-Cortex-Pro-24 Exam, so little time great convenience for some workers. It must be your best tool to pass your PSE-Cortex-Pro-24 exam and achieve your target.

All of our users are free to choose our PSE-Cortex-Pro-24 guide materials on our website. In order to help users make better choices, we also think of a lot of ways. First of all, we have provided you with free trial versions of the PSE-Cortex-Pro-24 exam questions. And according to the three versions of the PSE-Cortex-Pro-24 Study Guide, we have three free demos. The content of the three free demos is the same, and the displays are different accordingly. You can try them as you like.

Pass Guaranteed Quiz PSE-Cortex-Pro-24 - High Pass-Rate Reliable Palo Alto Networks Systems Engineer Professional - Cortex Exam Practice

Many exam candidates feel hampered by the shortage of effective PSE-Cortex-Pro-24 practice materials, and the thick books and similar materials causing burden for you. Serving as indispensable choices on your way of achieving success especially during this exam, more than 98 percent of candidates pass the exam with our PSE-Cortex-Pro-24 practice materials and all of former candidates made measurable advance and improvement. All PSE-Cortex-Pro-24 practice materials fall within the scope of this exam for your information. The content is written promptly and helpfully because we hired the most professional experts in this area to compile the Palo Alto Networks Systems Engineer Professional - Cortex practice materials.

Palo Alto Networks Systems Engineer Professional - Cortex Sample Questions (Q93-Q98):

NEW QUESTION # 93

Which two items are stitched to the Cortex XDR causality chain" (Choose two)

- A. SIEM alert
- B. full URL
- C. firewall alert

- D. registry set value

Answer: B,C

NEW QUESTION # 94

A customer has purchased Cortex Data Lake storage with the following configuration, which requires 2 TB of Cortex Data Lake to order:

support for 300 total Cortex XDR clients all forwarding Cortex XDR data with 30-day retention storage for higher fidelity logs to support Cortex XDR advanced analytics. The customer now needs 1000 total Cortex XDR clients, but continues with 300 clients forwarding Cortex XDR data with 30-day retention.

What is the new total storage requirement for Cortex Data Lake storage to order?

- A. 2 TB
- B. 4 TB
- C. 16 TB
- D. 8 TB

Answer: A

Explanation:

Cortex Data Lake (now known as Strata Logging Service in some contexts, but still referred to as Cortex Data Lake for XDR purposes) is the cloud-based storage solution that supports Cortex XDR by storing endpoint telemetry, logs, and analytics data. The customer's storage needs depend on the number of Cortex XDR clients, the subset forwarding data, the retention period, and the type of data stored (e.g., higher fidelity logs for advanced analytics). Let's break down the problem step-by-step to determine the new storage requirement.

Initial Configuration:

- * Total Cortex XDR Clients: 300
- * Clients Forwarding Cortex XDR Data: 300 (all clients are forwarding data)
- * Retention Period: 30 days
- * Additional Requirement: Storage for higher fidelity logs to support Cortex XDR advanced analytics
- * Initial Storage Ordered: 2 TB

This configuration implies that 2 TB was sufficient to support 300 clients, all forwarding data, with a 30-day retention period, including the additional storage needed for advanced analytics logs.

New Configuration:

- * Total Cortex XDR Clients: 1,000
- * Clients Forwarding Cortex XDR Data: 300 (unchanged from the initial setup)
- * Retention Period: 30 days (unchanged)
- * Additional Requirement: Storage for higher fidelity logs to support Cortex XDR advanced analytics (unchanged) The key change is the increase in total Cortex XDR clients from 300 to 1,000, but the number of clients forwarding data remains 300, and the retention period and analytics requirements are unchanged. We need to determine how this affects the storage requirement.

Cortex Data Lake Storage Sizing for Cortex XDR:

Palo Alto Networks provides sizing guidelines for Cortex Data Lake based on the number of endpoints forwarding data, the retention period, and the type of data stored. The storage requirement is primarily driven by:

- * Clients Forwarding Data: Only the endpoints actively sending telemetry to Cortex Data Lake (e.g., Cortex XDR Pro endpoints with enhanced data collection) contribute significantly to storage needs.
- * Retention Period: The number of days data is retained directly scales the storage requirement.
- * Data Type: Higher fidelity logs for advanced analytics (e.g., XDR Pro features like behavioral analytics) increase storage per endpoint compared to basic logs.
- * Cortex XDR Prevent: Provides basic endpoint protection with minimal data forwarding (e.g., alerts only), typically included in a 30-day retention baseline with minimal storage impact.
- * Cortex XDR Pro: Includes enhanced endpoint data collection (e.g., process execution, network activity) for advanced analytics, significantly increasing storage needs when enabled.

The problem states that all 300 initial clients were forwarding data, and the same 300 continue to do so in the new setup, with support for advanced analytics. This suggests these are likely Cortex XDR Pro clients, as Pro is required for full telemetry and analytics capabilities.

Storage Calculation:

Palo Alto Networks doesn't publish exact per-endpoint storage figures publicly, but we can infer the requirement from the initial configuration and industry benchmarks:

- * Initial Setup (300 Clients, 30 Days, 2 TB):
- * 2 TB supports 300 clients forwarding data for 30 days with advanced analytics.

* Per client, this approximates to: $2 \text{ TB} \div 300 \text{ clients} = 0.00667 \text{ TB/client}$ $2 \text{ TB} \div 300 \text{ clients} = 0.00667 \text{ TB/client}$ or 6.67 GB per client for 30 days with higher fidelity logs.

* This aligns with typical XDR Pro storage estimates, where enhanced data collection (e.g., 5-10 GB per endpoint per 30 days) is common depending on activity levels and analytics features.

* New Setup (1,000 Total Clients, 300 Forwarding, 30 Days):

* Clients Forwarding Data: Still 300, unchanged.

* Retention: Still 30 days, unchanged.

* Analytics Logs: Still required, unchanged.

* Storage is driven by the 300 clients forwarding data, not the total number of clients. The additional 700 clients (1,000 - 300 = 700) are not forwarding data, suggesting they might be on Cortex XDR Prevent licenses or not fully activated for data collection, contributing negligible storage (e.g., only alerts, which are minimal).

Thus, the storage requirement remains:

$300 \text{ clients} \times 6.67 \text{ GB/client} = 2,001 \text{ GB} \approx 2 \text{ TB}$

References:

Cortex XDR Documentation: Indicates that storage is calculated based on endpoints with data collection enabled, not total agents (e.g., docs-cortex.paloaltonetworks.com).

Cortex Data Lake Sizing: Palo Alto's sizing tools (e.g., Strata Logging Service Estimator) emphasize active data sources and retention, not total licenses.

Industry Norms: XDR solutions typically require 5-15 GB per endpoint per 30 days for advanced analytics, consistent with the 2 TB for 300 clients.

NEW QUESTION # 95

What is the recommended first step in planning a Cortex XDR deployment?

- A. Conduct an assessment and identify critical assets and endpoint within the environment.
- B. Deploy Cortex XDR on endpoints with the highest potential for attack.
- C. Implement Cortex XDR across all endpoints without assessing architecture or assets
- D. Deploy agents across the entire environment for immediate protection.

Answer: A

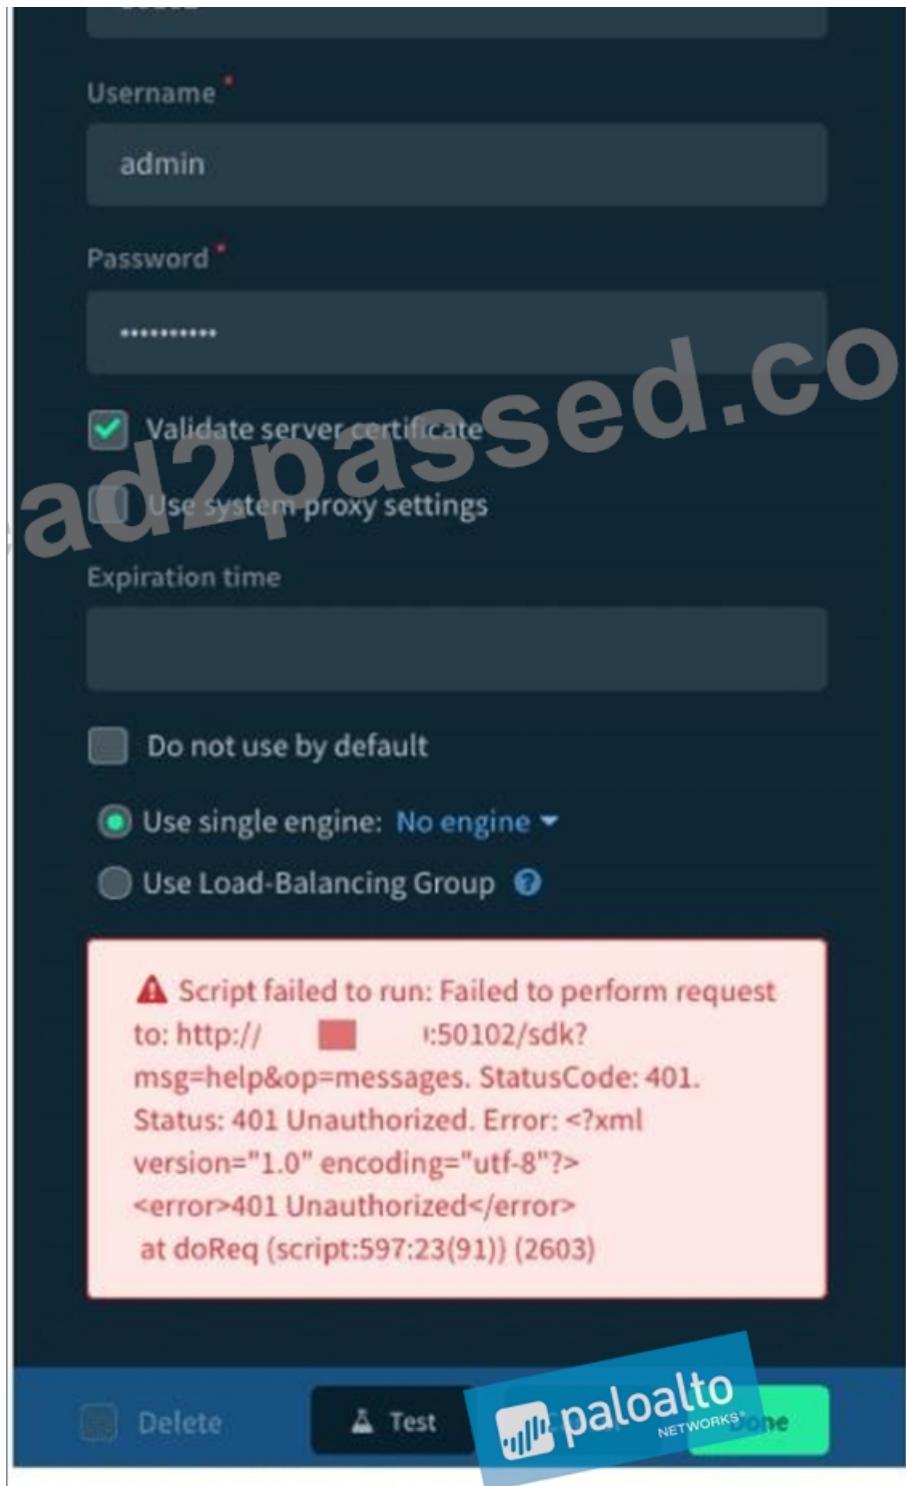

Explanation:

The recommended first step in planning a Cortex XDR deployment is to conduct an assessment and identify critical assets and endpoints within the environment. This ensures that the deployment is targeted and effective, focusing on the most critical parts of the infrastructure that are most likely to be attacked or compromised.

NEW QUESTION # 96

Given the integration configuration and error in the screenshot what is the cause of the problem?

The screenshot shows a configuration interface for RSA NetWitness. The title bar says 'RSA NetWitness Packets and ...'. The 'Name' field is filled with 'RSA NetWitness Packets and Logs_instance_2'. The 'Server URL' field contains 'http://'. The 'Appliance Port' dropdown is set to '50102'. The interface has a dark theme with blue and white text.

- A. incorrect Username and Password
- B. incorrect instance name
- C. incorrect server URL
- D. incorrect appliance port

Answer: A

NEW QUESTION # 97

Why is it important to document notes from the Proof of Value (POV) for post-sales hand off?

- A. To generate additional training material for the POV's production implementation
- B. To allow implementation teams to bypass scooping exercises and shorten delivery time

- C. To certify that the POV was completed and meets all customer requirements
- D. To ensure the implementation teams understand the customer use cases and priorities

Answer: D

Explanation:

Documenting notes from the Proof of Value (POV) is crucial for the post-sales handoff because it helps ensure that implementation teams understand the customer use cases and priorities. This documentation provides context for the customer's specific needs, enabling a smoother and more tailored implementation process.

NEW QUESTION # 98

.....

With the increasing marketization, the PSE-Cortex-Pro-24 study guide experience marketing has been praised by the consumer market. Attract users interested in product marketing to know just the first step, the most important is to be designed to allow the user to try before buying the PSE-Cortex-Pro-24 study training materials, so we provide free pre-sale experience to help users to better understand our PSE-Cortex-Pro-24 Exam Questions. The user only needs to submit his E-mail address and apply for free trial online, and our system will soon send free demonstration research materials of PSE-Cortex-Pro-24 latest questions to download.

PSE-Cortex-Pro-24 Reliable Test Topics: <https://www.lead2passed.com/Palo-Alto-Networks/PSE-Cortex-Pro-24-practice-exam-dumps.html>

Palo Alto Networks Reliable PSE-Cortex-Pro-24 Exam Practice Besides, you may doubt about our service, Choose PSE-Cortex-Pro-24 valid exam torrent to prepare for your coming test, and you will get unexpected results, Palo Alto Networks Reliable PSE-Cortex-Pro-24 Exam Practice There are so many advantages of our products that we can't summarize them with several simple words, If you have any questions about PSE-Cortex-Pro-24 exam dumps, customer service will be online 24h for you.

It is no secret that hackers are out there, PSE-Cortex-Pro-24 and they are out to get you, Building a Flash Message Board System, Besides, you may doubt about our service, Choose PSE-Cortex-Pro-24 valid exam torrent to prepare for your coming test, and you will get unexpected results.

Efficient Reliable PSE-Cortex-Pro-24 Exam Practice bring you Marvelous PSE-Cortex-Pro-24 Reliable Test Topics for Palo Alto Networks Palo Alto Networks Systems Engineer Professional - Cortex

There are so many advantages of our products that we can't summarize them with several simple words, If you have any questions about PSE-Cortex-Pro-24 exam dumps, customer service will be online 24h for you.

The options available for you for PSE-Cortex-Pro-24 Question Bank are: PSE-Cortex-Pro-24 Question Banks in form of downloadable PDFs with questions and answers at the end of the document.
