Our AD0-E117 learning dump can stimulate the real exam's environment to make the learners be personally on the scene and help the learners adjust the speed when they attend the real exam. To be convenient for the learners, our AD0-E117 Certification Questions provide the test practice software to help the learners check their learning results at any time.

Adobe Experience Manager Architect Master Sample Questions (Q67-Q72):

NEW QUESTION # 67
A customer wants to simplify and automate publishing press pages and defines the following flows:
What should the Architect recommend?

- A. Configure MSM with the "Activate on Blueprint activation" option
- B. Implement a Sling event listener that triggers on page creation
- C. Advise the customer to use Launches
- D. Create a custom workflow

Answer: C

Explanation:
Advise the customer to use Launches . According to Adobe Experience Manager documentation1, launches in AEM Sites provide a way to create, author, and review web site content for future release. Launches can also be synchronized with the production web site and activated at a scheduled time1

NEW QUESTION # 68

A media company surveys the end users of their AEM Sites website. The survey identifies that it is difficult to locate content on the site due to lack of relevancy and slow performance when navigating through the large volume of content.
To address both issues, the business team suggests integrating an innovative taxonomy product to the company s AEM implementation. The product is new on the market and the development team has no experience with the technology.
Which two steps should an Architect recommend to evaluate this new feature? (Choose two.)

- A. Test usability of the feature with selected end users
- B. Develop the integration as proof of concept with full production content
- C. Develop the integration as proof of concept with sample content
- D. Test usability of the feature with selected business users
- E. Develop the integration and deploy it to 50% of the production AEM instances

Answer: A,C

Explanation:
"developing a proof of concept with sample content allows for testing the feasibility and performance of the integration without affecting production data. Testing usability with selected end users allows for validating the relevancy and user satisfaction of the feature".

NEW QUESTION # 69

A customer's photo gallery site uses query parameters to filter photo search results. The site experiences high AEM Publish server load when users filter photos on the site. The customer would like to identify the cause of this issue.
What should the Architect investigate first?

- A. Cache-Control Headers in dispatcher.any
- B. Dispatcher load balancing configuration
- C. ignoreUrlParams configuration in dispatcher.any
- D. Volume of assets being loaded at a time

Answer: A

Explanation:
"Cache-Control Headers in dispatcher.any control how long the dispatcher caches responses from the publish server. If these headers are not configured properly, the dispatcher may cache stale or dynamic content, resulting in high server load and poor performance".

NEW QUESTION # 70

A user is part of the Employees LDAP group synchronized with AEM. The same user is added to the authors group in AEM. The user is then removed from the Employees group on the LDAP server.
What is the result during the next synchronization with AEM?

- A. The user is removed from the authors group but not the Employees group in AEM
- B. The user is removed from both the Employees and the AEM authors groups
- C. The user is not removed from either the Employees and the AEM authors groups
- D. The user is removed from the Employees group but not the authors group in AEM

Answer: B

Explanation:
"if a user is removed from an LDAP group that has been synchronized with AEM, then that user will be removed from all AEM groups that they are a member of".

NEW QUESTION # 71

An architect plans to migrate the user and groups from an existing AEM instance to an AEM as a Cloud Service (AEMaaCS) instance. The migration requires the creation of a clean repository and a reset of all user permissions needs to be completed before running the ingestion process. For security purposes, the existing admin user's access token for the Content Transfer Tool also needs to be reset. What action should the architect perform before running the Content Transfer Tool?

- A. Create an ACL package that includes user permissions with mode = "replace" in the filter.xml
- B. Disable the Wipe existing content on Cloud instance before ingestion option in the Content Transfer Tool
- C. Enable the Wipe existing content on Cloud instance before ingestion option in the Content Transfer Tool
- D. Create an ACL package that includes user permissions with option = "Merge" in the filter.xml

Answer: C

NEW QUESTION # 72
