In the era of rapid changes in the knowledge economy, do you worry that you will be left behind? Let's start by passing the NCP-CI-Azure exam. Getting a NCP-CI-Azure certificate is something that many people dream about and it will also bring you extra knowledge and economic benefits. The NCP-CI-Azure latest question we provide all candidates that that is compiled by experts who have good knowledge of exam, and they are very experience in compile study materials. Not only that, our team checks the update every day, in order to keep the latest information of NCP-CI-Azure Exam Question.

Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.
Topic 2	<ul style="list-style-type: none">Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.
Topic 3	<ul style="list-style-type: none">Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.

Topic 4	<ul style="list-style-type: none"> • Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.

NCP-CI-Azure Online Training & Latest NCP-CI-Azure Exam Questions

Before you really attend the NCP-CI-Azure exam and choose your materials, we want to remind you of the importance of holding a certificate like this one. Obtaining a NCP-CI-Azure certificate like this one can help you master a lot of agreeable outcomes in the future, like higher salary, the opportunities to promotion and being trusted by the superiors and colleagues. All these agreeable outcomes are no longer dreams for you. And with the aid of our NCP-CI-Azure Exam Preparation to improve your grade and change your states of life and get amazing changes in career, everything is possible. It all starts from our NCP-CI-Azure learning questions.

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q59-Q64):

NEW QUESTION # 59

A company wants NC2 networking components to be created manually with the correct naming conversation. To achieve this the administrator manually creates the PC and Host VNets in Azure.

What additional Azure Network components must the administrator manually create?

- A. NAT Gateways, Delegated Subnets, Flow Gateway Subnets, VNet Peers
- B. NAT Gateways, Delegated Subnets, Flow Gateway Subnets, Transit VPC
- C. Internet Gateways, Delegated Subnets, Flow Gateway Subnets, VNet Peers
- D. internet Gateways, Private Endpoints, Flow Gateway Subnets, VNet Peers

Answer: A

Explanation:

NAT Gateways: Necessary for providing outbound internet access to resources in the private subnet. It ensures that the virtual network can communicate with external services securely.

Delegated Subnets: Required for deploying specific Azure services within the virtual network, allowing controlled access and management of the resources within these subnets.

Flow Gateway Subnets: These subnets are used for managing traffic flow within the network, ensuring efficient routing and connectivity between different parts of the NC2 infrastructure.

VNet Peers: Establish connections between different virtual networks within Azure, enabling seamless communication and resource sharing across various parts of the NC2 deployment.

NEW QUESTION # 60

An administrator is tasked to identify the firewall requirement and submit the port request to the requirement team before the clusters deployment.

Which requirement should the administrator ensure is implement on the corporate firewall?

- A. ICMP can disable but the connectivity should be enabled between the CVMs, Prism Element, and Prism Central.
- B. ICMP and connectivity can be disabled between the CVMs, Prism Element, and Prism Central
- C. Allow uni-directional internet Control Message Protocol (ICMP) traffic between the CVMs, femer and Prism Central.
- D. Allow bi-directional Internet Control Message Protocol (ICMP) traffic between the CVMs, Prism Element, and Prism Central.

Answer: D

Explanation:

* ICMP Traffic: ICMP is essential for network diagnostics and troubleshooting, such as ping and traceroute, which help in monitoring the connectivity and health of the network.

* Bi-Directional Traffic: Allowing bi-directional ICMP traffic ensures that all nodes (CVMs, Prism Element, and Prism Central) can both send and receive diagnostic messages, which is crucial for maintaining proper communication and network stability.

NEW QUESTION # 61

NC2 Azure API calls are failing and MCM no longer shows telemetry or health of the cluster.

Where should the administrator look first?

- A. Log into Prism and check alerts and notifications
- **B. Check whitelisting of Outbound Communication**
- C. SSH into the NC2 Azure CVMs
- D. Check VPN/ExpressRoute

Answer: B

Explanation:

Outbound Communication Whitelisting: For NC2 Azure API calls and telemetry data to function correctly, certain outbound communications must be allowed. If these communications are not whitelisted, API calls can fail, and telemetry or health data might not be reported correctly.

First Check: Given the symptoms (failing API calls and missing telemetry), the first step should be to ensure that all necessary outbound communications are correctly whitelisted. This includes ensuring that endpoints and services required for NC2 operation are accessible.

NEW QUESTION # 62

An administrator has been asked to create a cluster to support new workloads.

What are the maximum number of nodes supported in an NC2 on Azure environment?

- A. 28 nodes
- **B. 18 nodes**
- C. 14 nodes
- D. 24 nodes

Answer: B

Explanation:

* NC2 Cluster Node Limit: NC2 on Azure has specific limitations regarding the maximum number of nodes supported in a single cluster.

* Maximum Nodes: According to the current NC2 on Azure guidelines, a single cluster can support up to 18 nodes.

* Workload Support: This limitation ensures optimal performance and management of resources within the Azure environment.

* Comparison of Options:

* 14 nodes: Less than the maximum supported.

* 24 nodes and 28 nodes: Exceed the maximum supported, potentially leading to performance and management issues.

* Conclusion: For supporting new workloads, the maximum number of nodes in an NC2 on Azure environment is 18.

NEW QUESTION # 63

What will be observed in the NC2 cluster when terminating a node from the Azure portal?

- A. NC2 will shutdown the node.
- B. NC2 will terminate the node from the cluster.
- C. NC2 will continue re-provisioning the node.
- **D. NC2 will mark the node as degraded.**

Answer: D

Explanation:

Node Termination Observation: When a node is terminated from the Azure portal, the NC2 cluster will detect that the node is no longer operational.

Marking as Degraded: NC2 will mark the node as degraded, indicating that the node is not functioning as expected. This status allows administrators to take necessary actions to resolve the issue, such as provisioning a new node or addressing the degradation cause.

NEW QUESTION # 64

.....

For one thing, the most advanced operation system in our company which can assure you the fastest delivery speed on our NCP-CI-Azure exam questions, and your personal information will be encrypted automatically by our operation system. For another thing, with our NCP-CI-Azure actual exam, you can just feel free to practice the questions in our training materials on all kinds of electronic devices. In addition, under the help of our NCP-CI-Azure Exam Questions, the pass rate among our customers has reached as high as 98% to 100%. We are look forward to become your learning partner in the near future.
