### NEW QUESTION # 42

What is a benefit of using a performance assessment tool?

- A. Provides performance statistics in a structured postgres database

- B. Retrieves workload metrics from all storage systems
- **C. Provides automated performance statistics in chart and table format**
- D. Retrieves the performance archives using the Unity Data Collection

**Answer: C**

Explanation:

A performance assessment tool is used to evaluate the performance of storage systems and provide statistics that can be used to identify and troubleshoot performance issues. One of the benefits of using a performance assessment tool is that it provides automated performance statistics in chart and table format, making it easy to understand performance metrics and identify any potential issues. This allows the user to quickly identify and address any bottlenecks in the system, and make adjustments to improve performance.

**NEW QUESTION # 43**
