

VMware 2V0-13.25 Vce Files - 2V0-13.25 Exam Flashcards

DOWNLOAD the newest VCE4Plus 2V0-13.25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1ouvM4V9PUD7ra0BoqrQQnpMQqVxCipJz>

People always tend to neglect the great power of accumulation, thus the 2V0-13.25 study materials can not only benefit one's learning process but also help people develop a good habit of preventing delays. We have full confidence to ensure that you will have an enjoyable study experience with our 2V0-13.25 Study Materials, which are designed to arouse your interest and help you pass the exam more easily. You will have a better understanding after reading the following advantages.

You may urgently need to attend 2V0-13.25 certificate exam and get the certificate to prove you are qualified for the job in some area. But what certificate is valuable and useful and can help you a lot? Passing the 2V0-13.25 test certification can help you prove that you are competent in some area and if you buy our 2V0-13.25 Study Materials you will pass the test almost without any problems for we are the trustful vendor of the 2V0-13.25 practice guide for years.

>> VMware 2V0-13.25 Vce Files <<

Buy VCE4Plus VMware 2V0-13.25 Valid Dumps Today and Get Free Updates for 1 year

Our website offer considerate 24/7 services with non-stopping care for you after purchasing our 2V0-13.25 practice materials. Although we cannot contact with each other face to face, but there are no disparate treatments and we treat every customer with consideration like we are around you at every stage during your review process. We will offer help insofar as I can. While our 2V0-13.25 practice materials are beneficiary even you lose your chance of winning this time. Full refund or other version switch is accessible.

VMware Cloud Foundation 9.0 Architect Sample Questions (Q19-Q24):

NEW QUESTION # 19

Which Broadcom solutions contribute to VMware's performance optimization?

- A. Broadcom RAID Controller
- B. Broadcom 25GbE Ethernet Adapter
- C. Broadcom NVMe SSD
- D. vSphere DRS

Answer: A,B,C

Explanation:

Broadcom 25GbE Ethernet Adapters, RAID Controllers, and NVMe SSDs contribute to performance optimization in VMware environments.

NEW QUESTION # 20

Which components are part of the VMware Cloud Foundation infrastructure stack?

- A. VMware vRealize Suite
- B. VMware vSphere
- C. VMware vRealize Automation
- D. VMware vSAN

Answer: A,B,D

Explanation:

VMware Cloud Foundation integrates vSphere, vSAN, and vRealize Suite to provide a unified infrastructure stack.

NEW QUESTION # 21

What actions are important when troubleshooting network slowness in VMware environments using Broadcom 10GbE Ethernet adapters?

- A. Verify NIC team settings
- B. Check for network congestion
- C. Enable Jumbo Frames
- D. Disable 10GbE adapter features

Answer: A,B,C

Explanation:

Checking for congestion, verifying NIC team settings, and enabling Jumbo Frames are essential troubleshooting steps.

NEW QUESTION # 22

Which VMware tools assist in cloud cost optimization in VMware Cloud Foundation?

- A. VMware vRealize Automation
- B. VMware vSAN
- C. VMware vSphere
- D. VMware vRealize Operations

Answer: A,D

Explanation:

vRealize Operations and vRealize Automation assist with cloud cost optimization.

NEW QUESTION # 23

An administrator is documenting the design for a new VMware Cloud Foundation (VCF) solution. During discovery workshops with the customer, the following information was shared with the architect:

All users and administrators of the solution will need to be authenticated using accounts in the corporate directory service.

The solution will need to be deployed across two geographically separate locations and run in an Active/Standby configuration where supported.

The management applications deployed as part of the solution will need to be recovered to the standby location in the event of a disaster.

All management applications will need to be deployed into a management tooling zone of the network, which is separated from the corporate network zone by multiple firewalls.

The corporate directory service is deployed in the corporate zone.

There is an internal organization policy that requires each application instance (management or end user) to detail the ports that access is required on through the firewall separately.

Firewall rule requests are processed manually one application instance at a time and typically take a minimum of 8 weeks to complete.

The customer also informed the architect that the new solution needs to be deployed and ready to start the organization's acceptance into service process within 3 months, as it is a dependency in the deployment of a business-critical application. When considering the design for the Cloud Automation and Operations products within the VCF solution, which three design decisions should the architect include based on this information? (Choose three.)

- A. The Cloud Automation and Operations products will be reconfigured to integrate with the Identity Broker solution instance at the standby site in case of a Disaster Recovery incident.
- **B. The Cloud Automation and Operations products will be integrated with a single instance of an Identity Broker solution at the primary site.**
- C. The Cloud Automation and Operations products will be integrated directly with the corporate directory service.
- **D. The Identity Broker solution will be connected with the corporate directory service for user authentication.**
- E. The Identity Broker solution will be deployed at the primary site and failed over to the standby site in case of a disaster.
- **F. The Identity Broker solution will be deployed at both the primary and standby site.**

Answer: B,D,F

Explanation:

In VMware Cloud Foundation (VCF) 5.2, Cloud Automation (e.g., Aria Automation) and Operations (e.g., Aria Operations) products rely on identity management for authentication. The customer's requirements—corporate directory authentication, Active/Standby across two sites, disaster recovery (DR), network zoning, slow firewall processes, and a 3-month deployment timeline—shape the design decisions. The architect must ensure authentication works efficiently across sites while meeting the timeline and DR needs. Let's evaluate:

Key Constraints and Context:

Authentication: All users/administrators use the corporate directory (e.g., Active Directory in the corporate zone).

Deployment: Active/Standby across two sites, with management apps in a separate tooling zone behind firewalls.

DR: Management apps must recover to the standby site.

Firewall Delays: 8-week minimum per rule, but deployment must occur within 12 weeks (3 months).

Identity Broker: In VCF, VMware Workspace ONE Access (or similar) acts as an identity broker, bridging VCF components with external directories (e.g., AD via LDAP/S).

Evaluation of Options:

Option A: The Cloud Automation and Operations products will be reconfigured to integrate with the Identity Broker solution instance at the standby site in case of a Disaster Recovery incident. This implies a single Identity Broker at the primary site, with reconfiguration to a standby instance post-DR. Reconfiguring products (e.g., updating SSO endpoints) during DR adds complexity and downtime, contradicting the Active/Standby goal of seamless failover. It's feasible but not optimal given the need for continuous operation and the 3-month timeline.

Option B: The Identity Broker solution will be deployed at both the primary and standby site. This is correct. Deploying Workspace ONE Access (or equivalent) at both sites supports Active/Standby by ensuring authentication availability at the primary site and immediate usability at the standby site post-DR. It aligns with VCF's multi-site HA capabilities and avoids reconfiguration delays, addressing the DR requirement efficiently within the timeline.

Option C: The Identity Broker solution will be connected with the corporate directory service for user authentication. This is correct. The requirement states all users/administrators authenticate via the corporate directory (in the corporate zone). An Identity Broker (e.g., Workspace ONE Access) connects to AD via LDAP/S, acting as a proxy between the management tooling zone and corporate zone. This satisfies the authentication need and simplifies firewall rules (one broker-to-AD connection vs. multiple app connections), critical given the 8-week delay.

Option D: The Identity Broker solution will be deployed at the primary site and failed over to the standby site in case of a disaster. This suggests a single Identity Broker with DR failover. While possible (e.g., via vSphere Replication), it risks authentication downtime during failover, conflicting with Active/Standby continuity. The 8-week firewall rule delay for the standby site's broker connection post-DR also jeopardizes the 3-month timeline and DR readiness, making this less viable than dual-site deployment (B).

Option E: The Cloud Automation and Operations products will be integrated with a single instance of an Identity Broker solution at the primary site. This is correct. Integrating Aria products with one Identity Broker instance at the primary site during initial deployment simplifies setup and meets the 3-month timeline. It leverages the broker deployed at the primary site (part of B) for authentication, minimizing firewall rules (one broker vs. multiple apps). Pairing this with a standby instance (B) ensures DR readiness.

without immediate complexity.

Option F: The Cloud Automation and Operations products will be integrated directly with the corporate directory service This is incorrect. Direct integration requires each product (e.g., Aria Automation, Operations) to connect to AD across the firewall, necessitating multiple rule requests. With an 8-week minimum per rule and several products, this exceeds the 3-month timeline. It also complicates DR, as each app would need re-pointing to a standby AD, violating efficiency and zoning policies.

Conclusion:

The three design decisions are:

B: Identity Broker at both sites ensures Active/Standby and DR readiness.

C: Connecting the broker to the corporate directory fulfills the authentication requirement and simplifies firewall rules.

E: Integrating products with a primary-site broker meets the 3-month deployment goal while leveraging B and C for DR.

This trio balances timeline, security, and DR needs in VCF 5.2.

NEW QUESTION # 24

.....

Every one, please pay attention to VCE4Plus platform. VMware 2V0-13.25 exam training is completely designed for the 2V0-13.25 examination with the high-quality and best accuracy. The questions of the 2V0-13.25 almost mirror the actual test and cover all most the main contents. Besides, the cost of the 2V0-13.25 Exam PDF is reasonable and affordable. With the help of the VMware 2V0-13.25 study material, your study will be efficiency. 100% pass is a little case for you.

2V0-13.25 Exam Flashcards: <https://www.vce4plus.com/VMware/2V0-13.25-valid-vce-dumps.html>

Each and every VMware 2V0-13.25 Exam Flashcards CBT is delivered 100% VMware 2V0-13.25 Exam Flashcards braindump free, VMware 2V0-13.25 Vce Files We have built a good reputation in the market, Choosing VCE4Plus as the 2V0-13.25 exam preparation assistance will be a great help for passing the Aruba VMware VCP-VCF Architect 2V0-13.25 exam, VMware 2V0-13.25 Vce Files The material for the study guides is developed with utmost care, keeping in mind the naive minds of the learners.

Hyper-V Security Model, You can approach them as complements to your usual preparation 2V0-13.25 regimen and in this article we'll take a look at both approaches, Each and every VMware CBT is delivered 100% VMware braindump free.

High Hit Rate 2V0-13.25 Vce Files Help You to Get Acquainted with Real 2V0-13.25 Exam Simulation

We have built a good reputation in the market, Choosing VCE4Plus as the 2V0-13.25 Exam Preparation assistance will be a great help for passing the Aruba VMware VCP-VCF Architect 2V0-13.25 exam.

The material for the study guides is developed with New 2V0-13.25 Test Simulator utmost care, keeping in mind the naive minds of the learners, You might have seen lots of advertisements about 2V0-13.25 latest exam reviews, all kinds of VMware 2V0-13.25 exam dumps are in the market, why you should choose us?
