Latest AZ-700 Demo & Reliable AZ-700 Test Sims

We have three formats of study materials for your leaning as convenient as possible. Our AZ-700question torrent can simulate the real operation test environment to help you pass this test. You just need to choose suitable version of our AZ-700 guide question you want, fill right email then pay by credit card. It only needs several minutes later that you will receive products via email. After your purchase, 7*24*365 Day Online Intimate Service of AZ-700 question torrent is waiting for you. We believe that you don't encounter failures anytime you want to learn our AZ-700 guide torrent.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q96-Q101):

NEW QUESTION # 96

You need to plan the deployment of LBGW1. The solution must support the planned changes.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 97

You need to restrict traffic from VMSScaleSet1 to VMSScaleSet2. The solution must meet the virtual networking requirements.

What is the minimum number of custom NSG rules and NSG assignments required? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 2: One NSG

The minimum requirement is one NSG. You could attach the NSG to VMSScaleSet1 and restrict outbound traffic, or you could attach the NSG to VMSScaleSet2 and restrict inbound traffic. Either way you would need two custom NSG rules.

Box 1: Two custom rules

With the NSG attached to VMSScaleSet2, you would need to create a custom rule blocking all traffic from VMSScaleSet1. Then you would need to create another custom rule with a higher priority than the first rule that allows traffic on port 443.

The default rules in the NSG will allow all other traffic to VMSScaleSet2.

NEW QUESTION # 98

You have two Azure virtual networks named Hub1 and Spoke1. Hub1 connects to an on-premises network by using a Site-to-Site VPN connection.

You are implementing peering between Hub1 and Spoke1.

You need to ensure that a virtual machine connected to Spoke1 can connect to the on-premises network through Hub1.

How should you complete the PowerShell script? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/architecture/reference-architectures/hybrid-networking/hub-spoke?tabs=cli#virtual-network-peering>

NEW QUESTION # 99

You are implementing the Virtual network requirements for Vnet6.

What is the minimum number of subnets and service endpoints you should create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 100

You have an Azure subscription that contains two virtual networks named Vnet1 and Vnet2.

You register a public DNS zone named fabrikam.com. The zone is configured as shown in the Public DNS Zone exhibit.

You have a private DNS zone named fabrikam.com. The zone is configured as shown in the Private DNS Zone exhibit.

You have a virtual network link configured as shown in the Virtual Network Link exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Yes

DNS queries from the internet use the public DNS zone. In the public DNS zone, www.fabrikam.com is a CNAME record that resolves to appservice1.fabrikam.com which resolves to 131.107.1.1.

Box 2: No

DNS queries from the internet use the public DNS zone. There is no DNS record for server1.fabrikam.com in the public DNS zone.

Box 3: No

The private DNS zone is linked to VNet1, not VNet2. Therefore, resources in VNet2 cannot query the private DNS zone.

NEW QUESTION # 101

.....

As you know, when choosing a learning product, what we should value most is its content. The content of AZ-700 study materials is absolutely rich. Our company collected a lot of information, and then our team of experts really spent a lot of energy to analyze and sort out this information. If you buy our AZ-700 Exam Questions, then you will find that the information compiled is all about the keypoints and the latest. And we always keep on updating our AZ-700 training quiz.

Latest AZ-700 Demo: https://www.dumpcollection.com/AZ-700_braindumps.html

There are several possibilities to get ready for Latest AZ-700 Demo - Designing and Implementing Microsoft Azure Networking Solutions training test, but using good tools is the most effective method, Passing the test certification can prove your outstanding major ability in some area and if you want to pass the test smoothly you'd better buy our AZ-700 test guide, As one of high-quality and authoritative exam, passing valid Microsoft Latest AZ-700 Demo exam is a long and tough task for most IT professionals, especially for people who have no enough time to prepare the Latest AZ-700 Demo - Designing and Implementing Microsoft Azure Networking Solutions test questions.

However, being able to come up with possible solutions to reduce the risks associated with each service and protocol is a step in the right direction, We will live up to your trust and keep advancing on our AZ-700 Study Materials.
