Candidates are expected to have hands-on experience working with the platform, as well as a strong understanding of networking concepts and security best practices. PCNSE Exam consists of multiple-choice questions, as well as hands-on simulations that test candidates' ability to configure and troubleshoot various aspects of the platform.

Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q355-Q360):

NEW QUESTION # 355
How can a Palo Alto Networks firewall be configured to send syslog messages in a format compatible with non-standard syslog servers?

- A. Enable support for non-standard syslog messages under device management.
- B. Check the custom-format check box in the syslog server profile.
- C. Select a non-standard syslog server profile

- D. Create a custom log format under the syslog server profile.

Answer: D

Explanation:
To customize the format of the syslog messages that the firewall sends, select the Custom Log Format tab.

NEW QUESTION # 356
A firewall is configured with SSL Forward Proxy decryption and has the following four enterprise certificate authorities (Cas) i. Enterprise-Trusted-CA; which is verified as Forward Trust Certificate (The CA is also installed in the trusted store of the end-user browser and system) ii. Enterprise-Untrusted-CA, which is verified as Forward Untrust Certificate iii. Enterprise-lntermediate-CA iv. Enterprise-Root-CA which is verified only as Trusted Root CA An end-user visits https //www example-website com/ with a server certificate Common Name (CN) www example-website com The firewall does the SSL Forward Proxy decryption for the website and the server certificate is not trusted by the firewall The end-user's browser will show that the certificate for www.example-website.com was issued by which of the following?

- A. Enterprise-Root-CA which is a self-signed CA
- B. Enterprise-intermediate-CA which was. in turn, issued by Enterprise-Root-CA
- C. Enterprise-Untrusted-CA which is a self-signed CA
- D. Enterprise-Trusted-CA which is a self-signed CA

Answer: C

Explanation:
Explanation
https://docs.paloaltonetworks.com/pan-os/10-2/pan-os-admin/decryption/configure-ssl-forward-proxy Enterprise-Trusted-CA is installed in the trusted store of the end-user browser and system. So it should not lead to any certificate issue. The most possible that www.example-website.com is signed by not trusted certificate authority which leads to use Enterprise-Untrusted-CA, which is not trusted as well
