Valid CrowdStrike CCFA-200b Exam Cost - CCFA-200b Valid Test Format

To upgrade skills, hundreds of candidates attempt the CrowdStrike Certified Falcon Administrator - 2024 Version (CCFA-200b) certification exam and try to be smart and more efficient than the rest. In that case, they are now finding ways by which they can get help to crack the CrowdStrike Certified Falcon Administrator - 2024 Version (CCFA-200b) certification exams. Let's discuss the sources that can prove to be a major help if you are planning to take the exam.

CrowdStrike Certified Falcon Administrator - 2024 Version Sample Questions (Q90-Q95):

NEW QUESTION # 90

After agent installation, an agent opens a permanent ___ connection over port 443 and keeps that connection open until the endpoint is turned off or the network connection is terminated.

- A. SSH
- B. HTTP
- C. TCP
- **D. TLS**

Answer: D

Explanation:

After agent installation, an agent opens a permanent TLS connection over port 443 and keeps that connection open until the endpoint is turned off or the network connection is terminated. TLS (Transport Layer Security) is a protocol that provides secure and encrypted communication between the agent and the Falcon cloud. Port 443 is the standard port for HTTPS (Hypertext Transfer Protocol Secure) traffic. The agent uses this connection to send and receive data, commands, policies, and updates from the Falcon cloud.

NEW QUESTION # 91

You are evaluating the most appropriate Prevention Policy Machine Learning slider settings for your environment. In your testing phase, you configure the Detection slider as Aggressive. After running the sensor with this configuration for 1 week of testing, which Audit report should you review to determine the best Machine Learning slider settings for your organization?

- A. Prevention Hashes Ignored
- B. Prevention Policy Audit Trail
- **C. Machine-Learning Prevention Monitoring**
- D. Prevention Policy Debug

Answer: C

Explanation:

Audit logs --> Machine-learning prevention monitoring It shows the count of ML expected detections based on the detection levels for a defined time period and the list of files that would be detected on each detection level.

NEW QUESTION # 92

What will happen to a host that is not part of any group which has a prevention policy assigned to it?

- A. The host will send a notification to the Falcon Administrator to assign a prevention policy
- B. The host will apply a sensor-based policy to prevent a majority of known threats
- C. The host will disable the falcon sensor
- **D. The host will apply the default prevention policy**

Answer: D

NEW QUESTION # 93

In order to exercise manual control over the sensor upgrade process, as well as prevent unauthorized users from uninstalling or upgrading the sensor, which settings in the Sensor Update Policy would meet this criteria?

- A. Sensor version set to N-2 and Bulk maintenance mode is turned on
- B. Sensor version updates off and Uninstall and maintenance protection turned off
- **C. Sensor version fixed and Uninstall and maintenance protection turned on**
- D. Sensor version set to N-1 and Bulk maintenance mode is turned on

Answer: C

Explanation:

In order to exercise manual control over the sensor upgrade process, as well as prevent unauthorized users from uninstalling or upgrading the sensor, the administrator should set the Sensor version to fixed and turn on the Uninstall and maintenance protection setting in the Sensor Update Policy. This will allow the administrator to specify which sensor version will be used by the hosts using this policy, and also require a maintenance token to uninstall or upgrade the sensor. The other options are either incorrect or not sufficient to meet this criteria.

NEW QUESTION # 94

How are user permissions set in Falcon?

- A. Permissions are token-based. Users request access to a defined set of permissions and an administrator adds their token to the set of permissions
- B. Permissions are assigned to a User Group and then users are assigned to that group, thereby inheriting those permissions
- C. An administrator selects individual granular permissions from the Falcon Permissions List during user creation
- **D. Pre-defined permissions are assigned to sets called roles. Users can be assigned multiple roles based on job function and they assume a cumulative set of permissions based on those assignments**

Answer: D

Explanation:

User permissions are set in Falcon by assigning pre-defined permissions to sets called roles.

Users can be assigned multiple roles based on job function and they assume a cumulative set of permissions based on those assignments. Roles are collections of permissions that define what users can see and do in Falcon. Permissions are granular actions that allow users to access specific features or functions in Falcon. For example, a user who is assigned both the Falcon Administrator role and the Falcon Investigator role will have all the permissions from both roles.

NEW QUESTION # 95

.....

In order to save you a lot of installation troubles, we have carried out the online engine of the CCFA-200b latest exam guide which does not need to download and install. This kind of learning method is convenient and suitable for quick pace of life. But you must have a browser on your device. Also, you must open the online engine of the study materials in a network environment for the first time. In addition, the CCFA-200b Study Dumps don't occupy the memory of your computer. When the online engine is running, it just needs to occupy little running memory. At the same time, all operation of the online engine of the CCFA-200b training practice is very flexible as long as the network is stable.
