SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite

Sample Questions (Q14-Q19):

NEW QUESTION # 14

You are performing a Brownfield migration for a customer with live transactions in their SAP Ariba Production environment. The customer plans to introduce new required fields for contract workspaces that are associated with flex master data templates and enumeration lists. Based on the correct Brownfield process, what is the correct sequence of activities to avoid system errors or user disruption?

- A.
- **B.**
- C.
- D.

Answer: B

NEW QUESTION # 15

Which syntax is used for writing custom Validity Conditions?

- **A. Regular expression**
- B. Python
- C. Scheme
- D. XML

Answer: A

Explanation:

SAP Ariba uses an expression language based on Object-Graph Navigation Language (OGNL) to define custom validity conditions on fields. Within these expressions, regular expressions (regex) are supported to perform complex pattern validations, such as validating email formats or custom string structures. Other programming languages like Python, Scheme, or XML are not supported for this purpose. The use of regular expressions within SAP Ariba's validity conditions provides powerful, flexible validation capabilities, allowing administrators to enforce data quality rules precisely at the field level, consistent with official SAP Ariba documentation on validation expressions.

NEW QUESTION # 16

Which document outlines the roles and responsibilities for the SAP Deployment Lead assigned to your project?

- A. Onboard Resource Center
- B. Inline Help
- **C. Deployment Description**
- D. Partner Statement of Work

Answer: C

Explanation:

The Deployment Description document formally defines the scope, roles, and responsibilities of the SAP Deployment Lead within a specific SAP Ariba project. It provides clarity on tasks such as migration coordination, technical issue resolution, and stakeholder communication. Other documents like the Onboard Resource Center provide logistical support, the Partner Statement of Work focuses on partner deliverables, and Inline Help offers in-application guidance—not role definitions. The Deployment Description is the authoritative reference for deployment lead responsibilities.

NEW QUESTION # 17

Which of the following applies to Suite Integration?

- **A. Suite Integration is a key benefit of SAP Ariba Strategic Sourcing suite as they are natively integrated**
- B. Suite Integration represents the out of the box integration between SAP Ariba Strategic Sourcing suite and S/4HANA Public Cloud
- C. Suite Integration refers to the process of manually connecting SAP Ariba applications with third-party software solutions.

- D. Suite Integration is the activity to integrate SAP Ariba Buying and Invoicing with an SAP Ariba Strategic Sourcing suite solution

Answer: A

NEW QUESTION # 18

A standard field is not available in reporting. A Greenfield customer needs to be able to report on the data captured in that standard field. How can this be achieved?

- A. Create a custom field that can be marked reportable, default the custom field to the standard field value, publish, and then pull the field into reporting
- B. The system makes all fields reportable after a system refresh.
- C. Under Field Configurations, search for the field in the appropriate class, mark the field reportable, save and publish.
- D. All standard fields are reportable by default.

Answer: A

Explanation:

Some standard fields in SAP Ariba are not reportable by design and cannot be made reportable through configuration changes. Therecommended workaround is to create a custom field that is marked as reportable, then set its default value to the standard field's value using an expression. Once published, this custom field can be included in reports, effectively surfacing the data previously inaccessible for reporting. System refreshes do not convert non-reportable standard fields to reportable. Marking the original standard field as reportable is not possible if the option is disabled by design.

NEW QUESTION # 19

.....

If you cannot complete the task efficiently, we really recommend using C_ACDET_2506 learning materials. Through the assessment of your specific situation, we will provide you with a reasonable schedule, and provide the extensible version of C_ACDET_2506 exam training guide you can quickly grasp more knowledge in a shorter time. In the same time, you will do more than the people around you. This is what you can do with C_ACDET_2506 Test Guide. Our C_ACDET_2506 learning guide is for you to improve your efficiency and complete the tasks with a higher quality.

C_ACDET_2506 Reliable Test Materials: https://www.pass4surequiz.com/C_ACDET_2506-exam-quiz.html
