- A. wavelength
- B. amplitude
- C. frequency
- D. period

Answer: A

NEW QUESTION # 14
AC is more easily distributed than DC. This is because:

- A. AC can be transmitted using lighter wires.
- B. AC can be transformed from a low voltage to a high voltage and back again with a transformer. DC cannot.
- C. Wires have less resistance if they are carrying AC
- D. DC needs wires to be totally insulated, while AC wires can be bare, hung from insulator on pylons.

Answer: B

Explanation:
Explanation
AC can be transformed from a low voltage to a high voltage and back again with a transformer, while DC cannot. This makes it easier to distribute AC electricity over long distances and is why it is used more widely than DC electricity. A and B are also true, as wires carrying AC can be bare and don't need to be totally insulated. Wires have less resistance when carrying AC electricity, which is why it is more efficient than DC.

NEW QUESTION # 15
Which one of the following is an overall consideration for physical security?

- A. Apply the technology
- B. Apply the solution
- C. Identify the problem
- D. Define the problem

Answer: D

Explanation:
Explanation

Defining the problem is an important overall consideration for physical security. This process involves identifying and analyzing the threats and vulnerabilities that could potentially affect the security of the system, as well as determining what steps need to be taken to mitigate these risks. This process should be done before any other steps are taken to ensure physical security, as it helps to ensure that the security measures are tailored to the specific needs of the system.

NEW QUESTION # 16
True or False: Human error is a major cause of data center downtime

- A. True
- B. False

Answer: A

Explanation:
Explanation
Human error is a major cause of data center downtime. Human mistakes are one of the top causes of data center outages, accounting for around one-third of all downtime incidents. Common causes of human error in data centers include misconfiguration, inadequate maintenance, and improper security practices. To reduce the risk of human error, it is important to ensure that data center staff receive proper training, have adequate access control measures in place, and are familiar with best practices for data center operations.
