And as long as you focus on our Mule-Arch-202 Training Materials, we believe you will pass for sure for our Mule-Arch-202 practice braindumps are always the latest and valid for all of our customers.

### **Salesforce Certified MuleSoft Platform Integration Architect Sample Questions (Q147-Q152):**

#### **NEW QUESTION # 147**

Which statement is true about the network connections when a Mule application uses a JMS connector to interact with a JMS provider (message broker)?

- A. The Advanced Message Queuing Protocol (AMQP) can be used by the JMS connector to portably establish connections to various types of JMS providers
- B. For the Mule application to receive JMS messages, the JMS provider initiates a network connection to the Mule application's JMS connector and then the JMS provider pushes messages along this connection
- C. The JMS connector supports both sending and receiving JMS messages over the protocol determined by the JMS provider
- D. To complete sending a JMS message, the JMS connector must establish a network connection with the JMS message recipient

**Answer: C**

#### NEW QUESTION # 148

An organization has defined a common object model in Java to mediate the communication between different Mule applications in a consistent way. A Mule application is being built to use this common object model to process responses from a SOAP API and a REST API and then write the processed results to an order management system.

The developers want Anypoint Studio to utilize these common objects to assist in creating mappings for various transformation steps in the Mule application.

What is the most straightforward way to utilize these common objects to map between the inbound and outbound systems in the Mule application?

- A. Use the Transform Message component
- B. Use the Java module
- C. Use Idempotent Message Validator components
- D. Use JAXB (XML) and Jackson (JSON) data bindings

**Answer: A**

#### NEW QUESTION # 149

A Mule application is being designed to receive a CSV file nightly that contains millions of records from an external vendor over SFTP. The records from the file must be transformed and then written to a database. Records can be inserted into the database in any order.

In this use case, which combination of Mule components provides the most effective way to write these records to the database?

- A. Use a Batch Job scope to bulk-insert records into the database
- B. Use the DataWeave map function and an Async scope to insert records in-parallel into the database
- C. Use a Scatter-Gather router to bulk-insert records into the database
- D. Use a Parallel For Each scope to insert records in-parallel into the database

**Answer: A**

#### NEW QUESTION # 150

A developer has been tasked by the integration architect to build a solution based on the Streaming API. The developer has done some research and has found there are different implementations of the events in Salesforce (Push Topic Events, Change Data Capture, Generic Streaming, Platform Events), but is unsure of to proceed with the implementation. The developer asks the system architect for some guidance.

What should the architect consider when making the recommendation?

- A. Change Data Capture does not have record access support.
- B. Apex triggers can subscribe to Generic Events.
- C. Change Data Capture can be published from Apex.
- D. Push Topic Event can define a custom payload.

**Answer: D**

#### NEW QUESTION # 151

What is the primary role of MuleSoft-provided Maven plugins in CI/CD pipelines for Mule applications?

- A. To manage the deployment of applications across different environments.
- B. To automate the process of code reviews.
- C. To generate documentation for APIs.
- D. To provide security scanning of the codebase.

**Answer: A**

## NEW QUESTION # 152

.....
