APMG-International ISO-IEC-27001-Foundation Exam | ISO-IEC-27001-

Foundation合格率書籍 - 最高のものをあげる ISO-IEC-27001-Foundation 模擬試験

当社Topexamは常に業界標準を順守しています。最新のISO-IEC-27001-Foundation実際のダンプの定期的な試験問題に精通している専門家の助けを借りて。彼らはあなたの知識に飢えた心を満たすことができます。また、ISO-IEC-27001-Foundation試験クイズは品質保証されています。ここ数年、お客様に高品質のISO-IEC-27001-Foundation実践教材を提供することに専念することで、すべてのコンテンツが実践と記憶に不可欠な部分であることを保証できます。

APMG-International ISO/IEC 27001 (2022) Foundation Exam 認定 ISO-IEC-27001-Foundation 試験問題 (Q51-Q56):

質問 # 51

Identify the missing words in the following sentence.

The organization shall establish, implement, maintain and [?] an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

- A. communicate the importance of
- B. report on
- C. continually improve
- D. enforce standards for

正解: C

解説:

Clause 4.4 of ISO/IEC 27001:2022 states:

"The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document." This requirement highlights that an ISMS is not static; it must evolve continuously to adapt to new risks, technologies, and business changes. Options A, C, and D are not mentioned in the clause. The continual improvement cycle is central to ISO standards, aligning with the Plan-Do-Check-Act (PDCA) model.

Thus, the missing words are "continually improve."

質問 # 52

Which item is required to be considered when defining the scope and boundaries of the information security management system?

- A. The regular activities necessary to maintain and improve the ISMS
- B. The level of quality to which the ISMS must adhere
- C. The dependencies between activities performed by the organization
- D. The lessons learned from the information security experiences of other organizations

正解: C

解説:

Clause 4.3 (Determining the scope of the ISMS) requires consideration of:

"the external and internal issues referred to in 4.1; the requirements referred to in 4.2; and interfaces and dependencies between activities performed by the organization, and those that are performed by other organizations." This confirms that dependencies between activities are a required factor when defining scope. Options B (quality levels), C (lessons learned), and D (regular activities for improvement) are not scope requirements, though they may be relevant in planning or improvement processes.

Thus, the verified answer is A: Dependencies between activities performed by the organization.

質問 # 53

What international standard provides guidance on the integration of ISO/IEC 27001 and the IT Service Management standard?

- A. ISO/IEC 27013
- B. ISO/IEC 20000-1
- C. None of the above
- D. ISO/IEC 27002

正解: A

解説:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27013 standards:

ISO/IEC 27013 is titled:

"Information technology - Security techniques - Guidance on the integrated implementation of ISO/IEC 27001 and ISO/IEC 20000-1."

This standard provides organizations with specific advice on how to integrate an Information Security Management System (ISMS) with an IT Service Management System (ITSMS). ISO/IEC 20000-1 is the IT Service Management requirements standard, but integration guidance is provided in 27013. ISO/IEC 27002 (A) is guidance for controls, not integration. Option D is incorrect since ISO/IEC 27013 explicitly exists for this purpose.

Therefore, the correct verified answer is: ISO/IEC 27013.

質問 # 54

Which ISMS documentation is part of the minimum scope of documented information required to be managed and controlled?

- A. A statement of correspondence between other ISO standards and the ISMS
- B. Third party information security awareness materials
- C. Records of management decisions related to continual improvement
- D. The budget assigned to operate the ISMS and its related allocations

正解: C

解説:

Clause 7.5 (Documented Information) specifies that organizations must maintain documentation necessary for the effectiveness of the ISMS. Additionally, Clause 9.3 (Management Review) requires "records of decisions related to continual improvement opportunities" as an output of management review. This is a core requirement and forms part of the documented information that must be retained and controlled. Third-party materials (B), budgets (C), and cross-reference statements to other ISO standards (D) are not required by ISO/IEC 27001. Only documents that directly demonstrate compliance, decision-making, and continual improvement are mandated. Therefore, the verified minimum required documentation includes records of management review decisions related to continual improvement, confirming answer: A.

質問 # 55

Which information is required to be included in the Statement of Applicability?

- A. The criteria against which risk will be evaluated
- B. The scope and boundaries of the ISMS
- C. The justification for including each information security control
- D. The risk assessment approach of the organization

正解: C

解説:

Clause 6.1.3 (d) requires that the organization "produce a Statement of Applicability that contains the necessary controls (see Annex A), and justification for inclusions, whether they are implemented or not, and the justification for exclusions." This is the defining requirement of the SoA: it documents which Annex A controls are relevant, which are implemented, and the justification for inclusion/exclusion. While the ISMS scope (A) is documented in Clause 4.3, and risk evaluation criteria (C) are defined in Clause 6.1.2, these do not belong in the SoA. The SoA does not describe the full risk assessment approach (B); that is part of the risk assessment methodology.

Therefore, the mandatory requirement for the SoA is justification for including (or excluding) each information security control.
