# Insurance Licensing PA-Life-Accident-and-Health Fragen Antworten, PA-Life-Accident-and-Health Exam Fragen

Die Zuverlässigkeit basiert sich auf die hohe Qualität, deshalb ist unsere Insurance Licensing PA-Life-Accident-and-Health vertrauenswürdig. Allein die mit einer Höhe von fast 100% Bestehensquote überzeugen Sie vielleicht nicht. Dann laden Sie bitte die kostenlose Demos der Insurance Licensing PA-Life-Accident-and-Health herunter und probieren! Um verschiedene Gewohnheiten der Prüfungsteilnehmer anzupassen, bieten wir insgesamt 3 Versionen von Insurance Licensing PA-Life-Accident-and-Health. Nach den Informationen über die Ermäßigung u.a. können Sie auf unserer Webseite online erkundigen.

## Insurance Licensing Pennsylvania Life, Accident and Health Exam PA-Life-Accident-and-Health Prüfungsfragen mit Lösungen (Q68-Q73):

### 68. Frage

An applicant purchases a life Insurance policy to avoid the forced sale of assets upon his death. What is this action called?

- A. Estate conservation.
- B. Buy-sell funding.
- C. Capital retention.
- D. Capital liquidation.

**Antwort: A**

Begründung:

Estate conservation refers to the use of life insurance to preserve an estate's value by providing liquidity at death. In Pennsylvania insurance education, this concept is emphasized as a key personal and business use of life insurance. When an insured purchases life insurance to avoid the forced sale of assets—such as real estate, a business, or investments—the goal is to ensure that estate taxes, debts, and expenses can be paid without liquidating valuable property.

Life insurance proceeds provide immediate cash to heirs or the estate, allowing assets to be retained rather than sold under unfavorable conditions. This strategy is commonly used in estate planning to protect family wealth and business continuity.

The other options are incorrect. Buy-sell funding relates to business ownership transfers. Capital retention is not the correct planning term. Capital liquidation refers to selling assets, which is the opposite of the stated goal. Therefore, the correct and verified answer under Pennsylvania Life Insurance principles is B. Estate conservation.

### 69. Frage

A producer who knowingly submits a FALSE statement in support of a claim may be found guilty of

- A. coercion.
- B. twisting.
- C. rebating.
- D. fraud.

**Antwort: D**

Begründung:

In Pennsylvania insurance law, fraud occurs when a producer knowingly submits false information in support of an insurance claim. This includes falsifying facts, exaggerating losses, or providing misleading documentation with the intent to deceive the insurer.

Pennsylvania Life, Accident, and Health Insurance regulations treat fraud as a serious offense because it undermines the integrity of the insurance system and results in financial harm. Producers found guilty of fraud may face license suspension or revocation, fines, and potential criminal prosecution.

The other options are incorrect. Twisting involves misrepresenting policies to induce replacement. Coercion involves forcing someone to purchase insurance. Rebating involves offering unauthorized inducements.

Because knowingly submitting a false statement to support a claim is clearly defined as fraud, option D is the correct answer.

### 70. Frage

Nearly every life insurer in the United States belongs to the

- A. Medical Information Bureau.
- B. National Association of Insurance Commissioners.

- C. Securities Exchange Commission.
- D. Centers for Medicare and Medicaid Services.

**Antwort: A**

Begründung:

Nearly every life insurer in the United States belongs to the Medical Information Bureau (MIB). The MIB is a cooperative data-sharing service that helps insurers assess risk and prevent fraud by providing underwriting information through a shared database of medical and health-related information collected during previous insurance applications.

### 71. Frage

An insured added a cost of living rider to his life insurance policy to ensure his death benefit increases in accordance with

- A. the stock index.
- **B. the inflation index.**
- C. family growth.
- D. his salary.

**Antwort: B**

Begründung:

In Pennsylvania Life Insurance policies, a Cost of Living Rider (COLA rider) is designed to protect the policy's death benefit from the eroding effects of inflation. This rider automatically increases the policy's face amount over time based on changes in a recognized inflation index, ensuring that the purchasing power of the death benefit remains consistent.

Pennsylvania insurance study materials emphasize that inflation can significantly reduce the real value of a fixed death benefit over long periods. The COLA rider addresses this concern by periodically adjusting the death benefit upward, typically in alignment with consumer price measurements. These increases usually occur without requiring additional evidence of insurability, although they may result in increased premiums.

The rider does not adjust benefits based on the insured's salary, family growth, or stock market performance.

Salary and family size are personal financial considerations, not standardized economic indicators. Likewise, stock indexes are too volatile and speculative for insurance benefit adjustments. Instead, inflation indexes provide a stable, objective measure of rising costs.

Therefore, under Pennsylvania Life Insurance provisions, the COLA rider ensures death benefit increases in accordance with the inflation index, making option B the correct and verified answer.

### 72. Frage

Which is considered an expense factor in a life insurance premium?

- A. aggregate claim amounts
- B. policy loan interest
- **C. commission**
- D. Interest from investments

**Antwort: C**

Begründung:

In Pennsylvania life insurance pricing, premiums are calculated based on three major factors: mortality, interest, and expenses. Commissions paid to insurance producers are considered a direct expense factor in the premium calculation. These costs are necessary for policy distribution and servicing and are included in the insurer's operating expenses.

Policy loan interest is charged to policy owners who borrow against cash value and does not factor into premium calculations.

Interest from investments is part of the interest factor, which helps reduce premiums rather than increase them. Aggregate claim amounts relate to the mortality factor, reflecting expected death benefits paid by the insurer. Pennsylvania-approved insurance education materials clearly classify commissions as an expense component, making option C the correct and verified answer.
