

# AB-730 Latest Exam Pdf - Standard AB-730 Answers

BTW, DOWNLOAD part of TrainingDumps AB-730 dumps from Cloud Storage: <https://drive.google.com/open?id=1TpzRX6nJwVm-Ru9xAWvUdD3-U9-c3IMP>

It is understandable that different people have different preference in terms of AB-730 study guide. Taking this into consideration, we have prepared three kinds of versions of our AB-730 preparation questions: PDF, online engine and software versions. The PDF version of AB-730 training materials is convenient for you to print, the software version can simulate the real exam and the online version can be used on all electronic devices. If you are hesitating about which version should you choose, you can download our AB-730 free demo first to get a firsthand experience before you make any decision.

If you have a dream to get the Microsoft certification? Why don't you begin to act? The first step is to pass AB-730 exam. Time will wait for no one. Only if you pass the AB-730 exam, can you get a better promotion. And if you want to pass it more efficiently, we must be the best partner for you. Because we are professional AB-730 Questions torrent provider, and our AB-730 training materials are worth trusting; because we make great efforts on our AB-730 learning guide, we do better and better in this field for more than ten years. Our AB-730 study guide is your best choice.

## Standard AB-730 Answers, AB-730 Practical Information

TrainingDumps AB-730 even guarantees that you will crack the AI Business Professional (AB-730) test on the first try by using our dumps. If you fail to achieve success in the AI Business Professional (AB-730) examination, then you can get a full refund according to terms and conditions. You can immediately start using our dumps after purchasing them. For better understanding of our three formats, read this article further.

### Microsoft AB-730 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• Manage prompts and conversations by using AI: This domain focuses on creating effective prompts, managing and sharing them, handling chat conversations, and creating and configuring custom Copilot agents with appropriate settings and knowledge bases.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Draft and analyze business content by using AI: This domain covers creating documents from prompts or existing files, generating summaries, transferring data between apps, using Copilot for meetings and collaboration, and leveraging memory for personalized assistance.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Understand generative AI fundamentals: This domain covers Microsoft 365 Copilot's operation, data privacy, context influence on responses, chat versus agent experiences, and feature differences across apps. It addresses responsible AI practices including risk identification, verification methods, and data protection restrictions.</li> </ul>

## Microsoft AI Business Professional Sample Questions (Q79-Q84):

### NEW QUESTION # 79

A colleague from another company shares a link to a prompt.

When you select the link, you receive the following response: "Prompt not found. Sorry, it looks like the prompt is no longer available." What is a possible cause of the response?

- A. The prompt contains a file that has a sensitivity label applied.
- B. The prompt contains a reference to a file that you do NOT have access to.
- C. The prompt is outside of your organization.
- D. The prompt is outdated.
- E. The prompt is a scheduled prompt.

**Answer: C**

Explanation:

Microsoft 365 Copilot operates within the security, compliance, and identity boundaries of a Microsoft 365 tenant. Shared prompts, prompt links, and Copilot artifacts are governed by organizational access controls and tenant isolation. If a prompt is created and shared from outside your organization, cross-tenant access may not be supported depending on the sharing configuration and administrative policies.

When a user attempts to open a prompt that resides in another organization's tenant without proper cross-tenant sharing permissions, Copilot cannot locate or validate the resource within the user's own environment.

As a result, the system displays a "Prompt not found" message.

Option B would typically result in an access or permissions error rather than the prompt being unavailable entirely. Sensitivity labels and scheduled prompts do not inherently cause a "not found" error. Therefore, the most likely cause is that the prompt exists outside your organization's tenant boundary and is not accessible to you.

### NEW QUESTION # 80

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Statements:

You can add a Microsoft Teams chat as a knowledge source to a Microsoft 365 Copilot agent.

The answer: Yes

You can add a Microsoft 365 Copilot conversation as a knowledge source to a Copilot agent.

The answer: No

You can use an image file, such as a JPG file, as a knowledge source for a Microsoft 365 Copilot agent.

The answer: NO

Microsoft 365 Copilot Agent Builder supports grounding agents in approved knowledge sources so responses are accurate and permission-trimmed. Teams chats can be used as a knowledge source: Microsoft Learn confirms you can ground an agent in Teams

data, including chat messages (and optionally scope to specific chats), enabling the agent to reference collaboration context when answering questions.

A Copilot conversation itself is not a supported "knowledge source" option; knowledge sources are configured from items like SharePoint content, Teams, email, websites, uploaded files, and connectors-not prior chat transcripts.

Finally, JPG images are not supported as knowledge-source file types. Microsoft's supported file types for agent knowledge include documents like .doc/.docx, .pdf, .ppt/.pptx, .txt, and Excel formats (.xls/.xlsx), but not image formats. Therefore, you cannot use a JPG as a knowledge source for a Copilot agent.

## NEW QUESTION # 81

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Yes

Yes - Prompt injection can cause data exposure and unintended system behavior Prompt injection in Microsoft 365 (M365) Copilot is a significant security risk that can lead to unauthorized data exposure and unintended system behavior. Through techniques like indirect prompt injection, attackers can embed hidden instructions in documents, emails, or websites that Copilot parses, causing it to override its intended, safe behavior and act on malicious commands.

Box 2: Yes

Yes - Prompt injection can be used to embed malicious or harmful instructions.

Box 3: Yes

Yes - Prompt injection is a security vulnerability unique to generative AI systems that interpret and respond to natural language inputs.

Prompt Injection is one of the most significant shifts in the "threat model" because it turns natural language into a potential delivery mechanism for malicious commands.

In the context of M365 Copilot, this risk is unique because the AI has access to your sensitive organizational data (emails, files, chats).

## NEW QUESTION # 82

You are a project coordinator for a small consulting firm.

You are responsible for tracking client communications, managing project timelines, and preparing weekly status updates for internal stakeholders.

You have a Microsoft 365 Copilot license.

You create an agent to help you monitor project milestones, follow up on client emails, and generate weekly summary reports.

With whom can you share the agent?

- A. only Microsoft Teams channel members
- B. the people in your organization and people that have personal Microsoft accounts
- C. any person who has a valid email address
- **D. only the people in your organization**

**Answer: D**

Explanation:

When you create a custom agent using a Microsoft 365 Copilot license (typically through the Agent Builder), you can share it with the following people within your organization:

Specific Users: You can share the agent directly with up to 98 named individuals by entering their name or email address.

Security Groups: You can share with specific Entra ID Security Groups to grant access to a predefined team.

Everyone in Your Organization: You can make the agent available to anyone in your tenant via a sharing link.

Incorrect:

[not C]

You are not limited to only sharing agents with Microsoft Teams channel members. While agents can be created for specific Teams channels, you can also share them directly with specific users or groups within your organization, or publish them for wider organizational access.

### NEW QUESTION # 83

You are a merchandiser who is planning for the upcoming season.

You prompt Microsoft 365 Copilot to suggest which products to stock based on historical sales data. Without reviewing the suggestions or checking current market trends, you place a large order based solely on the output of Copilot.

What is this an example of?

- A. overreliance
- B. verification
- C. prompt injection
- D. fabrication

**Answer: A**

Explanation:

Comprehensive and Detailed 150 to 200 words of Explanation Microsoft AI Business professional documents:

This scenario is an example of overreliance. Microsoft's AI guidance highlights that Copilot is an assistive tool that can accelerate analysis and drafting, but users remain responsible for validating outputs-especially for high-impact business decisions. Overreliance occurs when someone treats AI output as authoritative and acts on it without applying judgment, cross-checking sources, or validating against current conditions.

Here, the merchandiser uses Copilot to generate stocking recommendations from historical sales data, then places a large order without reviewing the suggestions or incorporating current market trends. Even if the historical data is accurate, demand can shift due to seasonality changes, competitor actions, pricing, supply constraints, macroeconomic factors, or new product launches. Copilot's recommendations should be treated as a starting point for decision-making, not the final decision.

Option A (verification) is the opposite behavior-checking accuracy before acting. Option C (fabrication) would involve Copilot inventing facts; the prompt doesn't indicate fictional data, only unvalidated reliance.

Option D (prompt injection) involves malicious instructions embedded in content to manipulate the model, which is not described here.

Therefore, the best answer is overreliance.

### NEW QUESTION # 84

.....

APP test engine of Microsoft AB-730 exam is popular with at least 60% candidates since all most certification candidates are fashion and easy to adapt to this new studying method. Someone thinks that APP test engine of AB-730 exam is convenient to use any time anywhere. Also part of candidates thinks that this version can simulate the real scene with the real test. If you can open the browser you can learn. Also if you want to learn offline, you should not clear the cache after downloading and installing the APP test engine of AB-730 Exam.
