

FCSS_NST_SE-7.4 Examsfragen - FCSS_NST_SE-7.4 Dumps

Bitte glauben Sie, dass wir PrüfungFrage Team sehnen sich nach dem Bestehen der Fortinet FCSS_NST_SE-7.4 Prüfung genauso wie Sie. Vielleicht sorgen Sie jetzt um die Prüfungsvorbereitung. Wir helfen Ihnen, die Konfidenz zu erwerben. Durch die kontinuierliche Verbesserung unseres Teams können wir mit Stolz Ihnen mitteilen, dass die Fortinet FCSS_NST_SE-7.4 Prüfungsunterlagen von uns Ihnen Überraschung mitbringen können. Sie können zuerst unsere Demo kostenfrei herunterladen und schauen, welche Version der Fortinet FCSS_NST_SE-7.4 Prüfungsunterlagen für Sie am passendsten ist. Danach können Sie Ihre verstärkte IT-Fähigkeit und die Freude der Erwerbung der Fortinet FCSS_NST_SE-7.4 Zertifizierung erlangen!

Fortinet FCSS_NST_SE-7.4 Prüfungsplan:

Thema	Einzelheiten
Thema 1	System Troubleshooting: This part of the exam assesses the ability of Fortinet network and security professionals to diagnose and fix typical system-related problems within Fortinet solutions. It involves troubleshooting FortiGate-to-FortiGate Security Fabric issues, addressing automation stitch concerns, and detecting resource-related problems using integrated tools.
Thema 2	VPN: This section tests the knowledge of IT professionals, such as system engineers in diagnosing and resolving VPN-related issues. It emphasizes troubleshooting IPsec IKE versions 1 and 2 to ensure secure and reliable communication between networks or remote users.
Thema 3	Authentication: This section evaluates the proficiency of Fortinet network and security professionals in resolving both local and remote authentication issues.
Thema 4	Security Profiles: This segment of the exam tests the skills of IT professionals, such as network administrators in handling and troubleshooting security profile-related challenges.
Thema 5	Routing: This part of the exam examines the expertise of Fortinet network and security professionals, in routing enterprise traffic effectively.

FCSS_NST_SE-7.4 Übungsmaterialien & FCSS_NST_SE-7.4 realer Test & FCSS_NST_SE-7.4 Testvorbereitung

Die Ausbildungsmaterialien zur Fortinet FCSS_NST_SE-7.4 Zertifizierungsprüfung aus PrüfungFrage sind nicht nur der Grundstein auf dem Weg zu Ihrem Erfolg, sie können Ihnen auch dabei helfen, Ihre Fähigkeiten in der IT-Branche effektiver zu entfalten. Nach mehrjährigen Bemühungen beträgt die Hit-Rate von Fortinet FCSS_NST_SE-7.4 Zertifizierungsprüfung von PrüfungFrage bereits

100%. Wenn Sie die Zertifizierungsprüfung nicht bestehen, nachdem Sie unsere Fragenpool gekauft haben, werden wir alle Ihre bezahlten Summe zurückgeben.

Fortinet FCSS - Network Security 7.4 Support Engineer FCSS_NST_SE-7.4 Prüfungsfragen mit Lösungen (Q98-Q103):

98. Frage

Refer to the exhibits.

Exhibit 1

```
FGT-A # get router info bgp summary
...
```

Neighbor	V	AS	MsgRcvd	MsgSent	TblVer	InQ	OutQ	Up/Down	State/PfxRcd
192.168.37.202	4	65110	2500	2552	5	0	0	1d11h33m	0

Exhibit 2

```
FGT-B # show router bgp

config network
  edit 1
    set prefix 172.16.0.0 255.255.0.0
  next
end
```

Exhibit 3

```
FGT-B # diagnose ip address list | grep port3
IP=172.16.54.115->172.16.54.202/255.255.255.0 index=5 devname=port3
```

An administrator is attempting to advertise the network configured on port3. However, FGT-A is not receiving the prefix. Which two actions can the administrator take to fix this problem? (Choose two.)

- A. Modify the prefix using the network command from 172.16.0.0/16 to 172.16.54.0/24.
- B. Manually add the BGP route on FGT-A.
- C. Use the set network-import-check disable command.
- D. Restart BGP using a soft reset to force both peers to exchange their complete BGP routing tables.

Antwort: A,C

99. Frage

Refer to the exhibit, which shows the output of the BGP database.

```
router info bgp network
0 BGP table version is 3, local router ID is 1.1.1.1
us codes: s suppressed, d damped, h history, * valid, > best, i - internal,
          S Stale
in codes: i - IGP, e - EGP, ? - incomplete

network      Next Hop      Metric LocPrf Weight RouteTag Path
10.0.0.0/0    100.64.2.254      0      100      0      0 ? <-/->
              100.64.2.1      32768   0 ? <-/1>
10.2.2.1/32   100.64.2.1        32768   0 ? <-/1>
10.8.8.8/32   100.64.2.254      100      0      0 ? <-/1>
10.20.30.0/24 172.16.54.115     0      100      0      0 i <-/1>

1 number of prefixes 4
```

Which two statements are correct? (Choose two.)

- A. The advertised prefix of 10.20.30.0/24 is being advertised through the redistribution of another routing protocol.
- B. The advertised prefix of 10.20.30.0/24 was configured using the network command.
- C. The output shows all prefixes advertised by all neighbors as well as the local router.

- D. The first four prefixes are being advertised using a legacy route advertisement.

Antwort: B,C

100. Frage

Refer to the exhibit, which shows the partial output of diagnose hardware sysinfo memory.

# diagnose hardware sysinfo memory		
MemTotal:	2055916	kB
MemFree:	708880	kB
Buffers:	22140	kB
Cached:	641364	kB
SwapCached	0	kB
Active:	726352	kB
Inactive:	98908	kB

An administrator is troubleshooting a high memory issue.

Which two memory allocations can help the administrator pinpoint the issue? (Choose two.)

- A. The I/O cache, which has 641364 kB of memory allocated to it.
- B. The 98908 kB of memory that will never be used.
- C. The unused cache page, which is represented by the value indicated next to the Inactive heading.
- D. The user space, which has 708880 kB of physical memory that is not used by the system.

Antwort: A,C

Begründung:

The I/O cache ("Cached"): At 641 364 kB this shows how much memory is tied up in filesystem page caching, and is immediately reclaimable under pressure.

The unused cache pages ("Inactive"): The Inactive figure (98 908 kB) represents pages that were cached but haven't been used recently - another pool of memory the OS can free when needed.

101. Frage

In which two states is a given session categorized as ephemeral? (Choose two.)

- A. A UDP session with only one packet received
- B. A UOP session with packets sent and received
- C. A TCP session waiting for FIN ACK
- D. A TCP session waiting for the SYN ACK

Antwort: A,D

102. Frage

Which three common FortiGate-to-collector-agent connectivity issues can you identify using the FSSO real-time debug? (Choose three.)

- A. Inability to reach IP address of the collector agent.
- B. Refused connection. Potential mismatch of TCP port.
- C. Mismatched pre-shared password.
- D. Incompatible collector agent software version.
- E. Log is full on the collector agent.

Antwort: A,B,C

103. Frage

Die Schulungsunterlagen zur Fortinet FCSS_NST_SE-7.4 Zertifizierungsprüfung von PrüfungFrage sind am besten. Wir sind bei den Kandidaten sehr beliebt. Wenn Sie die Schulungsunterlagen zur Fortinet FCSS_NST_SE-7.4 Zertifizierungsprüfung von PrüfungFrage zur PrüfungFrage benutzen, geben wir Ihnen eine 100%-Pass-Garantie. Sonst erstatteten wir Ihnen die gesamte Summe zurück, um Ihre Interessen zu schützen. Unser PrüfungFrage ist ganz zuverlässig.
