## Latest JN0-336 Practice Materials | Valid JN0-336 Exam Simulator

Among all substantial practice materials with similar themes, our JN0-336 practice materials win a majority of credibility for promising customers who are willing to make progress in this line. With excellent quality at attractive price, our JN0-336 practice materials get high demand of orders in this fierce market with passing rate up to 98 to 100 percent all these years. We shall highly appreciate your acceptance of our JN0-336 practice materials and your decision will lead you to bright future with highly useful certificates. We have handled professional JN0-336 practice materials for over ten years. Our experts have many years' experience in this particular line of business, together with meticulous and professional attitude towards jobs.

## Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q83-Q88):

### NEW QUESTION # 83

You enable chassis clustering on two devices and assign a cluster ID and a node ID to each device. In this scenario, what is the correct order for rebooting the devices?

- A. Reboot the secondary device, then the primary device.
- B. Reboot only the primary device since the secondary will assign itself the correct cluster and node ID.
- C. Reboot the primary device, then the secondary device.
- D. Reboot only the secondary device since the primary will assign itself the correct cluster and node ID.

**Answer: A**

Explanation:

When chassis clustering is enabled and IDs are assigned, it is typically recommended to first reboot the secondary device. This allows the secondary device to fully integrate and recognize its role and settings within the cluster without affecting the ongoing traffic that the primary device might be handling.

Once the secondary device has successfully rebooted and is operational within the cluster, the primary device can then be rebooted. This ensures that the primary device's reboot does not cause any network downtime, as the secondary device, now fully operational, can take over the traffic and roles as needed.

### NEW QUESTION # 84

Which two types of SSL proxy are available on SRX Series devices? (Choose two.)

- A. DNS proxy
- B. server-protection
- C. Web proxy
- D. client-protection

**Answer: B,D**

Explanation:

Based on SSL proxy is a feature that allows SRX Series devices to decrypt and inspect SSL/TLS traffic for security purposes.

According to SRX Series devices support two types of SSL proxy:

Client-protection SSL proxy also known as forward proxy - The SRX Series device resides between the internal client and outside server. It decrypts and inspects traffic from internal users to the web.

Server-protection SSL proxy also known as reverse proxy - The SRX Series device resides between outside clients and internal servers. It decrypts and inspects traffic from web users to internal servers.

### NEW QUESTION # 85

Which two statements are true about Juniper ATP Cloud? (Choose two.)

- A. Juniper ATP Cloud does not use antivirus software packages to protect against zero-day threats.
- B. Juniper ATP Cloud uses antivirus software packages to protect against zero-day threats.
- C. Juniper ATP Cloud only uses one antivirus software package to analyze files.
- D. Juniper ATP Cloud uses multiple antivirus software packages to analyze files.

**Answer: A,D**

Explanation:

Two statements that are true about Juniper ATP Cloud are:

Juniper ATP Cloud uses multiple antivirus software packages to analyze files: Juniper ATP Cloud is a cloud-based service that provides advanced threat prevention and detection for your network. It integrates with SRX Series firewalls and MX Series routers to analyze files and network traffic for signs of malicious activity. Juniper ATP Cloud uses multiple antivirus software packages from different vendors to scan files for known malware signatures and provide a comprehensive verdict based on their results.

Juniper ATP Cloud does not use antivirus software packages to protect against zero-day threats: Juniper ATP Cloud protects against zero-day threats by using dynamic analysis, not antivirus software packages.

Dynamic analysis is a method of executing files in a sandbox environment and observing their behavior and network interactions.

Dynamic analysis can uncover unknown malware that may evade static analysis or signature-based detection methods.

### NEW QUESTION # 86

You have deployed an SRX300 Series device and determined that files have stopped being scanned. In this scenario, what is a reason for this problem?

- A. The infected host communicated with a command-and-control server, but it did not download malware.
- B. The file is too small to have a virus.
- C. The software license is a free model and only scans executable type files.
- **D. You have exceeded the maximum files submission for your SRX platform size.**

**Answer: D**

Explanation:

You have exceeded the maximum files submission for your SRX platform size: This statement is correct because file scanning on SRX300 Series device has a limit on the number of files that can be submitted per minute based on the platform size<sup>3</sup>. For example, SRX320 has a limit of 10 files per minute<sup>3</sup>.

### NEW QUESTION # 87

On which three Hypervisors is vSRX supported? (Choose three.)

- A. Citrix Hypervisor
- B. Oracle VM
- **C. VMware ESXi**
- **D. Hyper-V**
- **E. KVM**

**Answer: C,D,E**

Explanation:

vSRX is a virtual firewall that runs as a software instance on a hypervisor. A hypervisor is a software layer that allows multiple virtual machines to run on a single physical host. vSRX supports three hypervisors: VMware ESXi, Hyper-V, and KVM. VMware ESXi is a hypervisor that runs on x86 servers and supports various operating systems and applications. Hyper-V is a hypervisor that runs on Windows Server and supports Windows and Linux virtual machines. KVM (Kernel-based Virtual Machine) is a hypervisor that runs on Linux and supports Linux, Windows, and other operating systems.
