GIAC Certified Incident Handler Sample Questions (Q184-Q189):

NEW QUESTION # 184

You work as a System Engineer for Cyber World Inc. Your company has a single Active Directory domain. All servers in the domain run Windows Server 2008. The Microsoft Hyper-V server role has been installed on one of the servers, namely uC1. uC1 hosts twelve virtual machines. You have been given the task to configure the Shutdown option for uC1, so that each virtual machine shuts down before the main Hyper-V server shuts down.

Which of the following actions will you perform to accomplish the task?

- A. Create a batch file to shut down the guest operating system before the server shuts down.
- B. Create a logon script to shut down the guest operating system before the server shuts down.
- **C. Enable the Shut Down the Guest Operating System option in the Automatic Stop Action Properties on each virtual machine.**
- D. Manually shut down each of the guest operating systems before the server shuts down.
