They work together and put all their expertise to ensure the top standard of Channel Partner Program Managing Microsoft Teams MS-700 valid dumps. Now the Managing Microsoft Teams MS-700 exam dumps have become the first choice of Microsoft MS-700 Exam candidates. With the top-notch and updated Microsoft MS-700 test questions you can pass your Managing Microsoft Teams MS-700 exam successfully

Microsoft MS-700: Exam Features

When you talk about the Microsoft MS-700 test, things are pretty straightforward. Starting with the exam itself, the students will have to attempt 40 to 60 questions presented in various formats and they will need to answer those items within 180 minutes. Basically, the questions will be of the multiple-choice, active screen, and build list types if to name a few. All of the test questions will cover the content that contains the following topics:

- Managing Chat, Calling, and Meetings;
- Managing Policies for Teams and Apps.
- Planning a Microsoft Teams Environment and Configuring It;

As you can see, you cannot take this test lightly. You will need to answer all the questions as quickly as possible to ensure that you don't run out of time and to earn 700 points, which is the passing rate. Please note that you can take Microsoft MS-700 in English only and register via Pearson VUE. This means that you have to know the language well and create an account on the platform if you don't have one.

Microsoft Teams is a popular collaboration platform used by millions of businesses worldwide. It is a powerful tool that enables teams to work together, share ideas, and communicate effectively. However, managing Microsoft Teams effectively requires a unique set of skills and knowledge. This is where the Microsoft MS-700 certification exam comes in. It is designed to test the candidate's ability to manage Microsoft Teams effectively and ensure that they have the skills and knowledge required to do so.

candidate's ability to plan, configure, and manage Teams effectively, ensuring that teams can collaborate efficiently and securely.

Microsoft Managing Microsoft Teams Sample Questions (Q353-Q358):

NEW QUESTION # 353

SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section.

This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g. copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab.

Username and password.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username:

Task 3

Adele Vance is a member of your company's technology adoption team.

You need to provide only Adele with the ability to turn on and off Teams preview features.

To complete this task, sign in to the Microsoft 365 portal.

Answer:

Explanation:

Teams supports the ability to allow selected users to enable Public Preview features in the desktop and browser clients for an early view of functionality. You'll need to create a new update policy in the Teams admin center and assign it to the people you want to access public preview.

Step 1: In Microsoft Teams admin center select Teams->Update policies

The screenshot displays the Microsoft Teams admin center interface. The left sidebar contains navigation options: Dashboard, Teams, Manage teams, Teams policies, Update policies (selected), Team templates, Devices, Locations, Users, Meetings, Messaging policies, Teams apps, Voice, Policy packages, Analytics & reports, and Org-wide settings. The main content area is titled 'Update policies' and includes a description: 'Update policies are used to manage Teams and Office preview users that will see pre-release or preview features in the Teams app. You can use the Global (Org-wide default) policy and customize it, or create one or more custom policies for your users. Learn more'. Below this is a 'Update policies summary' card showing 1 Default policy and 1 Custom policy. To the right is a 'User statistics' card showing 0 Custom policies and 25 Default policies. A table below lists the policies:

Name	Description	Custom policy	Preview features
Test Teams: Users	A policy to test new Teams...	Yes	On
Global (Org-wide default)		No	Off

Step 2: Click Add

New update policy

Name
Test Teams Users

Description
A policy to test new Teams features before they are generally available.

Show preview features
 On

Apply Cancel

Step 3: Set Show preview features to On, and click Apply.

Step 4: In Microsoft Teams admin center select Users, and Adele.

Once the new update policy is saved, it can be assigned to user accounts.

You can do this by editing user accounts through the Teams admin center and editing the set of policies assigned to the account.

Step 5: In the Edit user policies window select Update policy and select the policy you defined.

NEW QUESTION # 354

Your company has a Microsoft 365 subscription that uses Phone System.

You need to configure Microsoft Teams to meet the following requirements:

- * Ensure that calls to the company's sales department are routed to multiple users in the sales department.
- * Ensure that calls to the company's marketing department are routed to multiple users in the marketing department.
- * Outside of business hours, ensure that calls from PSTN users receive a custom greeting.
- * During business hours, ensure that calls from PSTN users can be received by the sales and marketing department users.

What is the minimum number of auto attendants and call queues you should configure to meet the requirements? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 356

Your company uses Microsoft Teams.

All the teams used by the company's legal department must meet the following compliance requirements:

- Each team must expire 365 days after it is created.
- All team content must be deleted when the team expires.
- An administrator must be able to restore deleted team content for 30

days.

What should you do?

- A. From the Azure Active Directory admin center, configure Microsoft 365 Groups expiration.
- B. From the Microsoft Teams admin center, modify the team's policy.
- C. From the Microsoft 365 admin center, modify the Office 365 group settings.
- D. From the Microsoft 365 compliance center, create a retention policy.

Answer: A

Explanation:

An administrator will have to enable the expiration policy and set the properties for it to take effect. To enable it, go to Azure Active Directory > Groups > Expiration.

<https://docs.microsoft.com/en-US/microsoftteams/network-planner>

NEW QUESTION # 357

You have a Microsoft 365 subscription that uses Microsoft Teams. The subscription contains 1,000 users in the groups shown in the following table.

Name	Requirement
Group1	Full access to chat, calling, apps, and meetings in Microsoft Teams must be provided.
Group2	Access to external participants must be prevented. Video conferencing and screen sharing must be disabled. Private meetings must be disabled. Specific apps must be installed automatically.

You need to configure Microsoft Teams to meet the requirements. The solution must minimize administrative effort.

What should you use?

- A. Microsoft Teams policies
- B. Meetings policies
- C. app setup policies
- D. policy packages

Answer: D
