Why Do You Need Valid and Updated Fortinet FCSS_ADA_AR-6.7 Exam Dumps?

Our industry experts are constantly adding new content to FCSS_ADA_AR-6.7 test dumps based on constantly changing syllabus and industry development breakthroughs. We also hired dedicated IT staff to continuously update our question bank daily, so no matter when you buy FCSS_ADA_AR-6.7 Study Materials, what you learn is the most advanced. Even if you fail to pass the exam, as long as you are willing to continue to use our FCSS_ADA_AR-6.7 test answers, we will still provide you with the benefits of free updates within a year.

Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q35-Q40):

NEW QUESTION # 35

Manually remediating incidents in FortiSIEM is beneficial when:

- A. There is no internet connection?
- B. An incident is unique or complex and requires human judgment?
- C. The FortiSIEM software is due for an update?
- D. Incidents occur outside business hours?

Answer: B

NEW QUESTION # 36

Refer to the exhibit.

Edit SubPattern

Name: WMI

Filters:

Paren	Attribute	Operator	Value	Paren	Next	Row
☐	Event Type	-	PH_DEV_MON_WMI_PING_STAT	☐	AND	☐

Aggregate:

Paren	Attribute	Operator	Value	Paren	Next	Row
☐	COUNT(Matched Events)	>=	3	☐	AND	☐
☐	AVG(Avg Round Trip Time)	>=	100	☐	AND	☐
☐	AVG(Avg Round Trip Time)	>=	1.50*STAT_AVG(AVG(Avg Round Trip Time):129)	☐	AND	☐

Group By:

Attribute	Row	Move
Host Name	☐	☐

The window for this rule is 30 minutes.

What is this rule tracking?

- A. A sudden 1.50 times increase in WMI response times over a 30-minute time window
- B. A sudden 150% increase in WMI response times over a 30-minute time window**
- C. A sudden 75% increase in WMI response times over a 30-minute time window
- D. A sudden 50% increase in WMI response times over a 30-minute time window

Answer: B

Explanation:

The rule is tracking a sudden increase in WMI response times over a 30-minute window. The key detail here is the increase factor.

The term 1.50 times increase means the new value is 150% of the previous baseline.

A 1.50x increase corresponds to a 150% increase, since the new value is original + 150% of original.

NEW QUESTION # 37

Refer to the exhibit.

PROCESS	UPTIME
phParser	DOWN
phAgentManager	DOWN
phCheckpoint	DOWN
phDiscover	DOWN
phEventPackager	DOWN
phPerfMonitor	DOWN
phEventForwarder	DOWN
phMonitor	13:04
phMonitorAgent	DOWN
Rsyslogd	DOWN

An administrator deploys a new collector for the first time, and notices that all the processes except the phMonitor are down. How can the administrator bring the processes up?

- A. Rebooting the collector will bring up the processes.
- B. The administrator needs to run the command `phtools - start` all on the collector.
- C. The collector was not deployed properly and must be redeployed.
- **D. The processes will come up after the collector is registered to the supervisor.**

Answer: D

Explanation:

When a FortiSIEM collector is deployed for the first time, most of its processes remain down until it is successfully registered with the supervisor.

The `phMonitor` process is running because it monitors system health, but other services remain inactive until the collector establishes communication with the supervisor.

Once the collector registers to the supervisor, it receives configurations and policies, and its processes will start automatically.

NEW QUESTION # 38

Why can collectors not be defined before the worker upload address is set on the supervisor?

- A. To ensure that the service provider has deployed at least one worker along with a supervisor
- B. Collectors can only upload data to a worker, and the supervisor is not a worker
- **C. Collectors receive the worker upload address during the registration process**
- D. To ensure that the service provider has deployed a NFS server

Answer: C

NEW QUESTION # 39

FortiSOAR is primarily used for:

- A. Storing large amounts of data?
- B. Designing network topologies?
- **C. Automating response actions to security incidents?**
- D. Streamlining administrative tasks like adding new users?

Answer: C

NEW QUESTION # 40

.....

The software keeps track of the previous FCSS—Advanced Analytics 6.7 Architect (FCSS_ADA_AR-6.7) practice exam attempts and shows the changes of each attempt. You don't need to wait days or weeks to get your performance report. The software displays the result of the Fortinet FCSS_ADA_AR-6.7 Practice Test immediately, which is an excellent way to understand which area needs more attention.
