

通過率高的Mule-Dev-202題庫最新資訊，真實還原Salesforce Mule-Dev-202考試內容

P.S. NewDumps在Google Drive上分享了免費的2026 Salesforce Mule-Dev-202考試題庫：https://drive.google.com/open?id=1m9G1DGugincTBSzesBhjyWg_dwQB2dQ

我們NewDumps的IT認證考題擁有多年的培訓經驗，NewDumps Salesforce的Mule-Dev-202考試培訓資料是個值得信賴的產品，我們的IT精英團隊不斷為廣大考生提供最新版的Mule-Dev-202考試培訓資料，我們的工作人員作出了巨大努力，以確保你們在考試中總是取得好成績，可以肯定的是，NewDumps Salesforce的Mule-Dev-202考試材料是為你提供最實際的IT認證材料。

為什麼NewDumps Salesforce的Mule-Dev-202考試培訓資料與別的培訓資料相比，它更受廣大考生的歡迎呢，第一，這是共鳴的問題，我們必須真正瞭解考生的需求，而且要比任何網站都要全面到位。第二，專注，為了做好我們決定完成的事情，必須放棄所有不重要的機會。第三，人們的確會用表面來判斷一個東西的好壞，我們或許擁有最優秀最高品質的產品，但如果以粗製濫造的方式展示出來，自然會被列為粗製濫造的產品，如果以既有創意又很專業的方式呈現，那麼我們將得到最高的效果。NewDumps Salesforce的Mule-Dev-202考試培訓資料就是這樣成功的培訓資料，舍它其誰？

Mule-Dev-202證照資訊，Mule-Dev-202測試

上帝是很公平的，每個人都是不完美的。就好比我，平時不努力，老大徒傷悲。現在的IT行業競爭壓力不言而喻大家都知道，每個人都想通過IT認證來提升自身的價值，我也是，可是這種對我們來說是太難太難了，所學的專業知識早就忘了，惡補那是不現實的，還好我在互聯網上看到了NewDumps Salesforce的Mule-Dev-202考試培訓資料，有了它我就不用擔心我得考試了，NewDumps Salesforce的Mule-Dev-202考試培訓資料真的很好，它的內容覆蓋面廣，而且針對性強，絕對比我自己復習去準備考試好，如果你也是IT行業中的一員，那就趕緊將NewDumps Salesforce的Mule-Dev-202考試培訓資料加入購物車吧，不要猶豫，不要徘徊，NewDumps Salesforce的Mule-Dev-202考試培訓資料絕對是成功最好的伴侶。

最新的 Salesforce MuleSoft Mule-Dev-202 免費考試真題 (Q27-Q32):

問題 #27

Northern Trail Outfitters publishes REST APIs to Anypoint Exchange. They write the REST APIs using RAML and share these APIs with internal and external users.

In which language or languages can a user download these APIs?

- A. RAML only
- B. RAML, OAS, and Apiary
- C. RAML and Apiary only
- D. RAML and OAS only

答案：D

解題說明：

Users can download REST APIs published to Anypoint Exchange in the following languages:

RAML (RESTful API Modeling Language):

RAML is a modeling language for defining APIs, used by MuleSoft for creating REST APIs.

OAS (OpenAPI Specification):

OAS, also known as Swagger, is another widely-used standard for defining APIs.

MuleSoft supports both RAML and OAS formats, allowing users to choose between these two standards when downloading API definitions.

問題 #28

AnyAirlines has a MuleSoft Composer flow between NetSuite and Salesforce. One of the data elements coming from NetSuite is a string that needs to be put into a Boolean field in a Salesforce object.

Which Composer function should be used to change the datatype of the value?

- A. today()
- B. fromBooleanToString()
- C. substitute()
- D. fromStringToBoolean()

答案: D

解題說明:

To convert a string from NetSuite into a Boolean field in a Salesforce object within MuleSoft Composer, you should use the `fromStringToBoolean()` function:

Function Purpose:

The `fromStringToBoolean()` function is specifically designed to convert string values to Boolean values. It interprets common Boolean strings like "true", "false", "yes", "no" and converts them into their corresponding Boolean values.

Usage:

Within MuleSoft Composer, use this function in a transformation step to ensure the data coming from NetSuite (as a string) is correctly transformed into a Boolean value before it is mapped to the Salesforce object.

Example:

If the string value from NetSuite is "true", `fromStringToBoolean("true")` will convert this to `true` in the Boolean field in Salesforce.

問題 #29

Northern Trail Outfitters (NTO) has a new business channel that requires exposing their existing non- MuleSoft APIs to the public.

They do not have an Anypoint Flex Gateway.

The NTO digital channel team wants to leverage Anypoint Platform as its API management tool.

What is the most time-efficient mechanism of securing their backend systems?

- A. Use a basic endpoint with a configured consumer endpoint.
- B. Create a proxy in front of each existing API.
- C. Expose each endpoint as a basic endpoint.
- D. Rewrite the existing APIs using MuleSoft.

答案: B

解題說明:

To expose existing non-MuleSoft APIs and secure them efficiently using Anypoint Platform, you can create API proxies. This approach provides several benefits:

API Proxy Creation:

Creating a proxy involves setting up an intermediary that forwards requests to the existing backend APIs. This allows you to leverage Anypoint Platform's API management capabilities without rewriting the existing APIs.

Proxies can be created quickly and configured to apply various security and governance policies.

Security and Management:

By creating a proxy, you can secure the APIs using Anypoint Platform's features such as rate limiting, authentication, and monitoring. This method is time-efficient and leverages the robust security features of the Anypoint Platform without significant redevelopment effort.

問題 #30

The MuleSoft development team at Northern Trail Outfitters creates a Mule application that interacts with several APIs and RPA processes. The team needs to share this application with other teams to help them create similar applications. How should the Mule application be published in Anypoint Exchange to meet this requirement?

- A. Custom asset
- B. Connector asset
- C. API asset
- **D. Template asset**

答案： D

解題說明：

To share a Mule application that interacts with several APIs and RPA processes with other teams for creating similar applications, publishing it as a Template asset is the best approach:

Template Asset:

A Template in Anypoint Exchange is designed to provide a reusable solution that can be easily adapted for different use cases. It includes predefined integration logic and configurations that can be used as a starting point for new projects.

By publishing the Mule application as a Template, other teams can leverage this pre-built solution, customize it to their specific needs, and ensure consistency in integration practices across the organization.

問題 #31

Northern Trail Outfitters (NTO) uses Flow Orchestration to automate quote development. The "Review Quote" work item is performed by their team of technical writers but can be fulfilled by any technical writer on the team.

How can NTO ensure the "Review Quote" work item is assigned to the correct Salesforce user?

- **A. Create a Group for the team of Salesforce Users and assign the work item to the group.**
- B. Use backend steps to automate work item assignment to the next available technical writer.
- C. Use MuleSoft RPA to review the document and submit it for approval if no issues are found.
- D. Create a user collection variable and assign the work item to the user collection.

答案： A

解題說明：

To ensure the "Review Quote" work item is assigned to the correct Salesforce user within the team of technical writers, the following approach can be used:

Creating a Group:

Create a Group in Salesforce that includes all the technical writers who are eligible to perform the "Review Quote" work item. This group acts as a collective resource pool.

Assigning the Work Item to the Group:

When the "Review Quote" work item is created in Flow Orchestration, assign it to the group rather than an individual user.

Salesforce will then allow any available technical writer within the group to pick up and complete the task.

Ensuring Flexibility and Availability:

This method ensures that the work item can be completed by any technical writer in the team, providing flexibility and improving the chances of timely completion by utilizing the group's collective availability.
