Our EAEP2201 study guide stand the test of time and harsh market, convey their sense of proficiency with passing rate up to 98 to 100 percent. Easily being got across by exam whichever level you are, our EAEP2201 simulating questions have won worldwide praise and acceptance as a result. They are 100 percent guaranteed practice materials. Though at first a lot of our new customers didn't believe our EAEP2201 Exam Questions, but they have become the supporters now.

Esri EAEP2201: Enterprise Administration Professional 2201 is an industry-recognized certification that validates the skills and knowledge required for administering ArcGIS Enterprise systems. EAEP2201 exam tests the abilities of professionals who manage complex geospatial infrastructure and ensure its effective functioning. Being an Esri Enterprise Administration Professional (EEAP) demonstrates a high level of expertise in designing, configuring, and maintaining ArcGIS-based solutions.

To prepare for the EAEP2201 exam, candidates should have a strong understanding of Esri software and GIS concepts, as well as hands-on experience with enterprise GIS systems. Esri recommends that candidates have at least two years of experience working with enterprise GIS systems before attempting the exam. Additionally, candidates should have experience with server operating systems, database management systems, and web application development.

Esri EAEP2201 Certification Exam is a challenging exam that requires a strong understanding of enterprise GIS systems and their administration. EAEP2201 exam is designed to test the knowledge and skills of GIS professionals who are responsible for the administration of Esri enterprise systems. EAEP2201 exam is an excellent way for GIS professionals to demonstrate their expertise in the administration of enterprise GIS systems and to advance their careers in the GIS industry.

Quiz Esri - EAEP2201 Perfect Exam Dumps Collection

Our EAEP2201 practice materials are suitable for a variety of levels of users, no matter you are in a kind of cultural level, even if you only have high cultural level, you can find in our EAEP2201 study materials suitable for their own learning methods. So, for every user of our study materials are a great opportunity, a variety of types to choose from, more and more students also choose our EAEP2201 Study Materials, then why are you hesitating?

Esri Enterprise Administration Professional 2201 Sample Questions (Q39-Q44):

NEW QUESTION # 39

An organization has an ArcGIS Enterprise deployment but does not have access to ArcGIS Online. The GIS administrator wants to create a web page that is easy to navigate by non-GIS users but allows these users to interact with, download, and create apps from data.

Which option should the GIS administrator use?

- A. ArcGIS Hub
- **B. ArcGIS Enterprise Sites**
- C. ArcGIS Experience Builder

Answer: B

Explanation:

ArcGIS Enterprise Sites is a capability within ArcGIS Enterprise that enables organizations to create tailored web pages for sharing data and content. These sites are designed to be user-friendly for non-GIS users, allowing them to interact with, download, and create applications from the organization's data. Since the organization does not have access to ArcGIS Online, ArcGIS Enterprise Sites provides the necessary functionality within their existing deployment.

ArcGIS Hub (Option A) is a separate product that requires ArcGIS Online. ArcGIS Experience Builder (Option C) is a tool for creating web applications but does not provide the comprehensive site-building capabilities needed for this scenario.

NEW QUESTION # 40

A GIS administrator must automate certain data workflows and administrative tasks in ArcGIS Enterprise.

The administrator must meet several requirements:

- * The processes and methods must be well and thoroughly documented
 - * An option must be provided to modify the processes on the fly
 - * Scripts and processes must be shared to different individuals throughout the ArcGIS Enterprise organization
- Which ArcGIS Server role should be used to meet these requirements?

- A. ArcGIS GeoEvent Server
- **B. ArcGIS Workflow Manager Server**
- C. ArcGIS Notebook Server

Answer: B

NEW QUESTION # 41

Multiple users report that a map service is experiencing negative performance. Upon review of ArcGIS Monitor data, the GIS analyst finds the following:

- * The minimum number of instances is 2 and the maximum is 8 for that service.
- * The data is in a publication Enterprise Geodatabase with no system usage in excess of 50%.
- * At the p75 level of requests, the map service time is 10 times longer than the service time at the p25 level.
- * The number of instances in use at the p50 level is 8.
- * The maximum % of physical memory in use is 40%, and the maximum % of virtual memory in use is 44% on the ArcGIS Server.
- * The maximum % CPU utilization observed is 53%.

What is causing the issue?

- A. The maximum instance setting is too low for the demand on the underperforming map service.
- B. The client is an Android device, and the ArcGIS Server is a Linux virtual machine.
- **C. The network connection between the database server and ArcGIS Server is saturated.**

Answer: C

NEW QUESTION # 42

Multiple users report that a map service is experiencing negative performance. Upon review of ArcGIS Monitor data, the GIS analyst finds the following:

- * The minimum number of instances is 2 and the maximum is 8 for that service.
- * The data is in a publication Enterprise Geodatabase with no system usage in excess of 50%.
- * At the p75 level of requests, the map service time is 10 times longer than the service time at the p25 level.
- * The number of instances in use at the p50 level is 8.
- * The maximum % of physical memory in use is 40%, and the maximum % of virtual memory in use is 44% on the ArcGIS Server.
- * The maximum % CPU utilization observed is 53%.

What is causing the issue?

- A. The network connection between the database server and ArcGIS Server is saturated.
- B. The client is an Android device, and the ArcGIS Server is a Linux virtual machine.
- C. The maximum instance setting is too low for the demand on the underperforming map service.

Answer: C

Explanation:

The ArcGIS Monitor data indicates that the map service is reaching its maximum configured instances (8) at the median usage level (p50), suggesting that the service cannot scale to meet higher demand. The significant increase in service time at the p75 level further supports that the service is under-provisioned. Since system resources like CPU and memory are not fully utilized, the bottleneck is likely due to the instance configuration. Increasing the maximum number of instances would allow the service to handle more concurrent requests, improving performance.

There is no evidence of network saturation or client-specific issues affecting performance in this scenario.

Reference Source: ArcGIS Monitor documentation on service instance management and performance tuning

NEW QUESTION # 43

A GIS administrator must determine which type of service to use when publishing a new basemap for the organization. The basemap must meet several requirements:

- * Support offline workflows
- * Use as little storage space as possible
- * High-resolution display
- * Easily incorporate data updates periodically made to a feature service Which service type should be used?

- A. Dynamic map service
- B. Cached map service
- C. Vector tile service

Answer: A

NEW QUESTION # 44

.....

The software version is one of the three versions of our EAEP2201 exam prep. The software version has many functions which are different with other versions'. On the one hand, the software version of EAEP2201 test questions can simulate the real examination for all users. By actually simulating the test environment, you will have the opportunity to learn and correct self-shortcoming in study course. On the other hand, although you can just apply the software version of EAEP2201 training guide in the windows operation system.
