ROOT CAUSE ANALYSIS	
RCA NO /DATE & TIME OF THE INCIDENT	/ 08-12-2021 13:25
INCIDENT DESCRIPTION :	
PLANT :	885 TPD
LOCATION :	Hazira, Surat
RCA TEAM MEMBERS:	
IMPACT :	1.Safety 2.Production Loss 3.Property loss 4. Financial Loss/Others
DETAILS OF THE IMPACT :	

ROOT CAUSE ANALYSIS OF HV-2003 control valve 100 % opening in DCS upgradation activity on 8 th December, 2021
Unit : INOX Air Products Private Limited – Hazira, Surat PLANT : 885 TPD
INCIDENT DESCRIPTION/PROBLEM STATEMENT: During plant shut down, the DCS up gradation activities are going on continuously. The DCS up gradation work has start at 11:35 Hour and completed at 13:25 hours. For those two hour the DCS system are off line (no control through DCS). On 13:25 hour the DCS system has taken to the online and during that time, Suddenly the both control valve (HV2003 & PIC 1820) are open and the air passed through suction line of BAC and then enter through recycle line and 3 rd stage cooler then through compressor and pass out through suction line of 2 nd stage inter cooler. (the spool piece of 2 nd stage after cooler suction line has removed for maintenance).

We have to admit that the professional certificates are very important for many people to show their capacity in the highly competitive environment. If you have the Relativity certification, it will be very easy for you to get a promotion. If you hope to get a job with opportunity of promotion, it will be the best choice chance for you to choose the RCA Study Materials from our company. Because our study materials have the enough ability to help you improve yourself and make you more excellent than other people.

These mock tests are specially built for you to assess what you have studied. These Relativity Certified Administrator (RCA) practice tests are customizable, which means you can change the time and questions according to your needs. Taking practice exams teaches you time management so you can pass the Relativity Certified Administrator (RCA) exam. Pass4cram's RCA practice exam makes an image of a real-based examination which is helpful for you to not feel much pressure when you are giving the final examination.

Achieve Relativity RCA Certification with Ease by Polishing Your Abilities

Pass4cram customizable practice exams (desktop and web-based) help students know and overcome their mistakes. The customizable Relativity RCA practice test means that the users can set the Questions and time according to their needs so that they can feel the real-based exam scenario and learn to handle the pressure. The updated pattern of Relativity RCA Practice Test ensures that customers don't face any real issues while preparing for the test.

Relativity Certified Administrator Sample Questions (Q68-Q73):

NEW QUESTION # 68

When using Import/Export, what happens to existing metadata fields when you select the option to overlay metadata while importing a document load file that contains several blank metadata values?

- A. The overlay will error for each document with blank values.
- **B. The blank values will replace the existing field values.**
- C. The existing values will remain in the corresponding mapped fields.
- D. Only fixed-length text fields will be overlaid with the blank values.

Answer: B

Explanation:

The correct answer is C. The blank values will replace the existing field values. Relativity's Import/Export document load file import documentation states that for Append/Overlay and Overlay Only, if a blank metadata field exists in the load file, the blank value will overlay remove any existing value in the corresponding mapped field. That means the blank value does not preserve the original value; it clears it.

This rules out the other options. The import does not preserve the old value in the mapped field, so option A is incorrect. The workflow does not error merely because blank values are present, so option B is also incorrect.

Option D is wrong because the behavior is not limited to fixed-length text fields; it is described generally for mapped metadata fields in overlay mode. Therefore, the correct answer is that blank values replace existing field values during overlay import.

NEW QUESTION # 69

What format should you use to search for a specific emoji by name in the Short Message Viewer?

- A. "Name"
- **B. :Name:**
- C. < Name >
- D. [Name]

Answer: B

Explanation:

The correct answer is B. :Name:. Relativity's RSMF-supported emoji documentation states that emojis in RSMF files display as text strings surrounded by colons, giving the example :smile:. That directly establishes the emoji short-name format used by Relativity for named emoji representations.

The Short Message Viewer documentation also confirms that users can search for emojis in conversations.

Since Relativity's own emoji naming convention is colon-delimited short names, the correct format for searching by name is :Name:. The other options use bracket, angle-bracket, or quoted forms that Relativity does not identify as the short-name syntax for emoji. Therefore, the correct answer is :Name:.

NEW QUESTION # 70

What do you need to do to ensure you produce only non-redacted text?

- **A. Add the OCR text field as the first field in the Text Precedence window.**
- B. Add the Extracted Text field as the first field in the Text Precedence window.
- C. Add the Extracted Text field to the exported field list.
- D. Add the OCR text field to the exported field list.

Answer: A

Explanation:

The correct answer is B. Add the OCR text field as the first field in the Text Precedence window.

Relativity's OCR-on-redacted-production guidance explains that to produce only non-redacted text, you must use Text Precedence during export, and it specifically warns not to add the Extracted Text field to the exported field list because doing so can result in producing redacted text. It also explains that production export can use ordered text fields so Relativity pulls text from the highest-priority populated field.

In this workflow, the OCR text generated from the redacted production images is the field that reflects the redacted-visible text appropriately for export. By placing the OCR text field first in Text Precedence, Relativity uses that OCR-derived text before falling back to other long-text fields. Option A is incorrect because prioritizing Extracted Text risks exporting the original underlying text

rather than the intended redacted-visible text. Options C and D are also incorrect because the guidance is to control output through Text Precedence , not by simply adding those fields to the exported field list; in fact, Relativity explicitly warns against adding Extracted Text to the exported list for this use case. Therefore, the correct step is to put the OCR text field first in Text Precedence .

NEW QUESTION # 71

What setting is needed to have the Prioritized Review queue refresh automatically through Review Center?

- A. The queue will only refresh when a Reviewer enters the queue and codes at least 10 documents.
- B. Review Center only queues specific documents from the saved search.
- C. "Queue Refresh" must be set to "On".
- D. Once enough documents are coded it will automatically refresh.

Answer: C

Explanation:

The correct answer is A. "Queue Refresh" must be set to "On". Relativity's Review Center admin documentation states that Queue Refresh controls whether the queue automatically refreshes after coding activity . For prioritized review queues, that refresh includes re-running the saved search, checking for outside-coded documents, retraining the classifier, and re-ranking documents based on the latest coding. That makes Queue Refresh the setting required for automatic queue refreshing.

Relativity also documents that prioritized review queues auto-refresh when there has been a 20% change in total coded documents, and additionally after 8 hours if there has been coding activity. Those are auto-refresh conditions, but they do not replace the need for the Queue Refresh setting itself. Option B therefore describes a trigger condition, not the required setting. Options C and D are not documented as the needed configuration for automatic refresh. Therefore, the correct answer is that Queue Refresh must be turned on .

NEW QUESTION # 72

When must you run a full build of a dtSearch index?

- A. After updating fields in the searchable set.
- B. After adding new documents.
- C. After using Swap Index.
- D. After removing documents from the search.

Answer: A

Explanation:

The correct answer is A. After updating fields in the searchable set. Relativity's dtSearch index documentation states that you must perform a full build when you add an additional field to the index, change any index settings, change fields of the searchable set, or overlay text on existing fields . That directly matches option A.

By contrast, Relativity documents that an incremental build is used after adding or removing documents .

That makes options B and D incorrect. "After using Swap Index" is not listed as a required trigger for a full build in the dtSearch console documentation. Therefore, the correct answer is that a full build is required after updating fields in the searchable set .

NEW QUESTION # 73

.....

With this software, you can evaluate your Relativity RCA exam preparation. The beforehand awareness of your weaknesses will help you take the Relativity certification exam successfully. Environment you encounter during the practice test is similar to the real Relativity RCA Exam. This feature of software will help you kill Relativity RCA Exam anxiety.

RCA Exam Overview: https://www.pass4cram.com/RCA_free-download.html

Relativity Free RCA Download Pdf The world is full of chicanery, but we are honest and professional in this area over ten years, To Become a RCA Exam Overview Professional, you need to complete all the RCA Exam Overview test objectives, Relativity Free RCA Download Pdf Certification Bundles List There is another fantastic offer awaiting you which is known as Bundle Exam Offer, The RCA test material is not exceptional also, in order to let the users to achieve the best product experience, if there is some learning platform system vulnerabilities or bugs, we will check the operation of the RCA quiz guide in the first time, let the professional service personnel to help user to solve any problems.
