

# Free PDF Quiz Trustable 1z0-1104-25 - Oracle Cloud Infrastructure 2025 Security Professional Passed

2025 Latest Actual4Labs 1z0-1104-25 PDF Dumps and 1z0-1104-25 Exam Engine Free Share: <https://drive.google.com/open?id=142yFvNRWjaR9HmKPPZUrQRkSdYCsS9Ur>

If you really want to get an international certificate, 1z0-1104-25 training quiz is really your best choice. Of course, 1z0-1104-25 preparation materials are global products that have been tested by users worldwide. You can be absolutely assured about the quality of the 1z0-1104-25 training quiz. Our company has hired the most professional team of experts at all costs to ensure that the content of 1z0-1104-25 guide questions is the most valuable. you really must get international certification!

## Oracle 1z0-1104-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>OCI Security Introduction: This section of the exam measures the skills of Cloud Security Professionals and covers the basics of security in Oracle Cloud Infrastructure. It introduces the shared security responsibility model, the core principles of security design, and the use of foundational security services to secure deployments on OCI.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Protecting Infrastructure - Network and Applications: This section of the exam measures the skills of Cloud Security Professionals and covers methods for securing networks and applications on OCI. Topics include network security groups, firewalls, and security lists, while also focusing on the use of load balancers for availability. The section further addresses the configuration of OCI certificates and web application firewalls to strengthen infrastructure security.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Implementing Identity and Access Management (IAM): This section of the exam measures skills of OCI Administrators and focuses on identity and access controls. It covers IAM domains, users, groups, and compartments, as well as the use of IAM policies to manage access to resources. Candidates are also tested on configuring dynamic groups, network sources, and tag-based access control, along with managing MFA, sign-on policies, and activity monitoring.</li></ul>

## How Actual4Labs 1z0-1104-25 Exam Practice Questions Can Help You in Exam Preparation?

Actual4Labs is regarded as an acclaimed 1z0-1104-25 dumps study material provider for certification exams that includes a range of helping materials, programs and pathways to ease your tensions of 1z0-1104-25 exam preparation. The prime objective in developing 1z0-1104-25 exam dumps is to provide you the unique opportunity of getting the best information in the possibly lesser content. It not only saves your time but also frees you from the hassle of going through tomes of books and other study material. Shorn of unnecessary burden, you better focus what is extremely important to pass exam; hence you increase your chances of success with 1z0-1104-25 Exam Questions than other that of candidates.

## Oracle Cloud Infrastructure 2025 Security Professional Sample Questions (Q38-Q43):

### NEW QUESTION # 38

#### Challenge 2

In deploying a new application, a cloud customer needs to reflect different security postures. If a security zone is enabled with the Maximum Security Zone recipe, the customer will be unable to create or update a resource in the security zone if the action violates the attached Maximum Security Zone policy.

As an application requirement, the customer requires a compute instance in the public subnet. You therefore, need to configure Custom Security Zones that allow the creation of compute instances in the public subnet.

Review the architecture diagram, which outlines the resources you'll need to address the requirement:

Preconfigured

To complete this requirement, you are provided with the following:

Access to an OCI tenancy, an assigned compartment, and OCI credentials

Required IAM policies

Task 5: Provision a Compute Instance

Provision a compute instance in the IAD-SP-PBT-PUBSNET-01 public subnet, where:

Name IAD-SP-PBT-1-VM-01

image: Oracle Linux 8

Shape VM: Standard, A1, Flex

Enter the OCID of the created compute instance in the text box below.

**Answer:**

Explanation:

See the solution below in Explanation.

Explanation:

To provision a compute instance named IAD-SP-PBT-1-VM-01 in the IAD-SP-PBT-PUBSNET-01 public subnet with the specified configuration (Oracle Linux 8 image, VM Standard A1 Flex shape), follow these steps based on the Oracle Cloud Infrastructure (OCI) Compute documentation.

Step-by-Step Solution for Task 5: Provision a Compute Instance

\* Log in to the OCI Console:

\* Use your OCI credentials to log in to the OCI Console (<https://console.us-ashburn-1.oraclecloud.com>).

\* Ensure you have access to the assigned compartment.

\* Navigate to Compute Instances:

\* From the OCI Console, click the navigation menu (hamburger icon) on the top left.

\* Under Compute, select Instances.

\* Create a New Compute Instance:

\* Click the Create Instance button.

\* Configure the Instance Details:

\* Name: Enter IAD-SP-PBT-1-VM-01.

\* Compartment: Select the assigned compartment.

\* Placement: Choose the availability domain (e.g., AD-1) based on your region's availability.

\* Select the Image:

\* Under Image and Shape, click Change Image.

\* Select Oracle Linux 8 from the platform images list.

\* Click Select Image.

\* Choose the Shape:

\* Click Change Shape.

\* Select VM Standard category.

\* Choose A1 Flex from the shape options.

\* Configure the OCPUs (e.g., 1 OCPU) and memory (e.g., 6 GB) as needed for A1 Flex, then click Select Shape.

\* Configure Networking:

\* Under Networking, ensure the Virtual Cloud Network is set to IAD-SP-PBT-VCN-01.

\* Set the Subnet to IAD-SP-PBT-PUBSNET-01 (public subnet with CIDR 10.0.1.0/24).

\* Enable Assign a public IPv4 address to allow external connectivity.

\* Leave the default security list or assign a custom one if configured previously.

\* Set Up SSH Access:

\* Under Add SSH Keys, either:

\* Upload your public SSH key file, or

\* Paste your public SSH key manually.

\* This ensures you can access the instance via SSH.

\* Launch the Instance:

\* Click Create to provision the compute instance.

\* Wait for the instance to reach the Running state (this may take a few minutes).

\* Note the Instance OCID:

\* Once the instance is running, go to the instance details page for IAD-SP-PBT-1-VM-01.

\* Copy the OCID displayed (e.g., ocid1.instance.oc1..unique\_string).

OCID of the Created Compute Instance

\* Enter the OCID of the created compute instance (IAD-SP-PBT-1-VM-01) into the text box. The exact OCID will be available after Step 9 (e.g., ocid1.instance.oc1..unique\_string).

Notes

\* Ensure the security zone IAD\_SAP-PBT-CSZ-01 and its associated recipe IAD-SP-PBT-CSP-01 allow compute instance creation in the public subnet (10.0.1.0/24).

\* Verify network connectivity by testing SSH access using the public IP assigned to the instance.

A company has implemented OCI IAM policies with multiple levels of compartments. A policy attached to a parent compartment grants "manage virtual-network-family" permissions. A policy attached to a child compartment grants "use virtual-network-family" permissions.

According to OCI IAM policy inheritance, how does the OCI IAM policy engine resolve the permissions for a user attempting to perform an operation that requires 'manage' permissions in the child compartment?

- A. The operation is denied due to conflicting policies.
- B. The policy in the parent compartment takes precedence, and the user is granted "manage" permissions.
- C. The policy in the child compartment takes precedence, and the user is granted "use" permissions only.

**Answer: B**

#### NEW QUESTION # 40

Task 3: Create a Master Encryption Key

Note: OCI Vault to store the key required by this task is created in the root compartment as PBI\_Vault\_SP Create an RSA Master Encryption Key (MEK), where:

Key name: PBT-CERT-MEK-01-`<username>`

For example, if your username is 99008677-lab.user01, then the MEK name should be PBT-CERT-MEK-0199008677labuser01

Ensure you eliminate special characters from the user name.

Key shape: 4096 bits

Enter the OCID of the Master Encryption Key created in the provided text box:

**Answer:**

Explanation:

See the solution below in Explanation.

Explanation:

Task 3: Create a Master Encryption Key

Step 1: Access the OCI Vault

\* Log in to the OCI Console.

\* Navigate to Identity & Security > Vault.

\* Select the root compartment.

\* Locate and click on the vault named PBI\_Vault\_SP.

Step 2: Create the Master Encryption Key

\* In the PBI\_Vault\_SP vault details page, under Resources, click Keys.

\* Click Create Key.

\* Enter the following details:

\* Name: Replace `<username>` with your username (e.g., if your username is 99008677-lab.user01, remove special characters like - and . to get 99008677labuser01, then use PBT-CERT-MEK-0199008677labuser01).

- \* Key Shape: SelectRSAwith4096 bits.
  - \* Protection Mode: SelectHSM(Hardware Security Module) if available, orSoftwareif HSM is not required (based on vault capabilities).
  - \* Compartment: Ensure it's set to the root compartment (where PBI\_Vault\_SP resides).
  - \* Leave other settings (e.g., key usage) as default unless specified.
  - \* ClickCreate Keyand wait for the key to be generated.
- Step 3: Retrieve and Enter the OCID
- \* After the key is created, go to theKeyssection under PBI\_Vault\_SP.
  - \* Click on the key named PBT-CERT-MEK-01<username> (e.g., PBT-CERT-MEK-0199008677labuser01).
  - \* Copy theOCID(a long string starting with ocid1.key., unique to your tenancy) from the key details page.
  - \* Enter the copied OCID exactly as it appears into the provided text box.

#### NEW QUESTION # 41

"A business has a hybrid cloud infrastructure with Oracle Linux instances running in OCI and on-premises. They want to reduce the amount of bandwidth used when patching systems. Which component of OS Management Hub can help to reduce the bandwidth usage for patching?"

- A. Management agents
- B. Dynamic groups
- C. Management stations
- D. Profiles"

**Answer: D**

#### NEW QUESTION # 42

In Oracle Cloud Infrastructure (OCI), bare metal instances provide customers with direct access to the underlying hardware. To mitigate security risks when a customer terminates a bare metal instance, OCI utilizes Root-of-Trust hardware. What is the primary function of the Root-of-Trust hardware in this context?"

- A. It eliminates the need for hypervisors, reducing the potential attack surface.
- B. It ensures all non-volatile memory on the terminated instance is securely wiped before reuse.
- C. It guarantees complete isolation between customer workloads on different instances.
- D. It automatically encrypts data at rest on the bare metal instance.

**Answer: B**

#### NEW QUESTION # 43

.....

Similarly, Actual4Labs offers up to 1 year of free Oracle 1z0-1104-25 exam questions updates if in any case, the content of Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) certification test changes. Actual4Labs provides its product in three main formats i.e., Oracle 1z0-1104-25 Dumps PDF, Web-Based Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) Practice Test, and Desktop 1z0-1104-25 Practice Exam Software.
