SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q37-Q42):

NEW QUESTION # 37

What are future features with which AI agents are expected to facilitate the Quote to Cash process?

Note: There are 2 correct answers to this question.

- A. Recommend working-capital strategies to treasury.
- B. Automatically solve dispute cases without supervision.
- C. Proactively cut business ties with unreliable customers.
- D. Identify high-risk collections transactions.

Answer: A,D

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

As SAP moves toward "Autonomous Finance," AI agents are expected to evolve from simple automation to proactive decision support within the Quote-to-Cash (Q2C) and Treasury cycles. One key future feature is the ability for AI to identify high-risk collections transactions before they become problematic. By analyzing vast amounts of historical payment behavior, external credit scores, and market trends, AI can flag specific customers or invoices that are likely to result in a dispute or late payment, allowing the collections team to intervene early.

Another advanced capability is the use of AI to recommend working-capital strategies to treasury. In this scenario, the AI agent analyzes the company's current cash position, upcoming payables, and projected receivables to suggest the most efficient use of capital—such as whether to take advantage of early payment discounts or to invest excess liquidity. While AI will significantly assist in solving dispute cases (Option A), doing so "without supervision" is generally not the goal for complex financial disputes, as human oversight remains critical for relationship management. Similarly, cutting ties with customers (Option B) remains a strategic human decision. The value of AI in SAP's roadmap lies in its ability to provide predictive "risk identification" and "strategic recommendations" to enhance human decision-making.

NEW QUESTION # 38

Which of the following is a benefit of using SAP Analytics Cloud?

- A. Limited data visualization
- B. Real-time insights and predictive analytics
- C. Manual data integration
- D. No support for financial reporting

Answer: B
