HP trained experts have made sure to help the potential applicants of HP HPE0-J68 certification to pass their HP HPE0-J68 exam on the first try. Our PDF format carries real HPE Storage Solutions exam dumps. You can use this format of HP HPE0-J68 Actual Questions on your smart devices.

HPE0-J68 exam is a certification exam that is designed to validate your knowledge and skills in HPE storage solutions. HPE0-J68 exam is intended for individuals who want to enhance their career prospects in this field and who want to demonstrate their expertise in designing, implementing, and managing HPE storage solutions. With the right preparation and study, you can pass HPE0-J68 exam and become certified in HPE storage solutions.

HP HPE0-J68 Exam covers a wide range of topics related to HPE storage solutions, including HPE storage architectures, HPE storage products and solutions, HPE storage networking, HPE storage performance and optimization, and HPE storage management and operations. HPE0-J68 exam consists of 60 multiple-choice questions, and candidates have 90 minutes to complete it. The passing score for the HPE0-J68 exam is 65%.

HPE0-J68 Exam Testking - HPE0-J68 Pass Test

You can see the demos of our HPE0-J68 exam questions which are part of the all titles selected from the test bank and the forms of the questions and answers and know the form of our software on the website pages of our study materials. The website pages list the important information about our HPE0-J68 real quiz. You can analyze the information the website pages provide carefully before you decide to buy our HPE0-J68 learning braindumps.

HPE Storage Solutions Sample Questions (Q176-Q181):

NEW QUESTION # 176

Drag and Drop Question

A customer wants to implement a new storage network, but wants to retain the ability to connect with legacy fiber channel-based components.

Drag the appropriate component to each box on the diagram to design a new storage network.

□

Answer:

Explanation:

□

NEW QUESTION # 177

A customer has a SAN infrastructure with the HPE C-class blade Enclosure ,and a mix of proliant G7,gen8 and Ge9 server .They require a new storage platform... How can you confirm the storage array will be supported in the existing environment?

- A. Document existing server and SAN information ,and consult SPOCK to ensure firmware compatibility
- B. Check recommended firmware levels in the HP SAN design reference guide to ensure firmware compatibility
- C. Design and array with the latest firmware ,and recommend that the customer engage HPE point Next to upgrade the existing hardware
- D. Design an array with older version of the firmware to ensure compatibility

Answer: A

Explanation:

To confirm that a new storage array will be supported in an existing environment that includes HPE C-class Blade Enclosures and a mix of ProLiant G7, Gen8, and Gen9 servers, the correct approach is to document the existing server and SAN information and consult the HPE SPOCK (Single Point of Connectivity Knowledge) tool. SPOCK is an HPE resource that provides detailed compatibility information for various HPE products, including firmware and software compatibility matrices. This ensures that the new storage array will work seamlessly with the existing infrastructure.

NEW QUESTION # 178

A customer environment includes:

10 DL380 Gen8 servers in a VMware Cluster

2 MSA storage arrays

2 8GB b-series fibre channel switches

The customer needs to replace their environment because it is end of life. They have limited budget. The customer is primarily concerned with management because they have limited IT staff, and they want to move away from fibre channel.

Which HPE Storage should you recommend?

- A. HPE StoreOnce
- B. HPE XP8
- C. HPE Primera
- D. HPE Nimble dHCI

Answer: D

Explanation:

In this scenario, the customer is looking to replace their existing environment, which includes servers, MSA storage arrays, and Fibre Channel switches. They are budget-conscious, have limited IT staff, and prefer to move away from Fibre Channel technology. The HPE Nimble dHCI (Option C) is the ideal solution to recommend.

HPE Nimble dHCI offers a converged infrastructure that simplifies management, making it easier for organizations with limited IT resources to maintain their environment. It is designed to be easy to deploy and manage, providing the benefits of both hyper-converged infrastructure (HCI) and traditional converged solutions. This solution integrates compute, storage, and networking with advanced data services, and it moves away from Fibre Channel by leveraging iSCSI or Ethernet-based connectivity. The Nimble dHCI also provides excellent performance and reliability at a lower cost, which aligns with the customer's budget constraints.

NEW QUESTION # 179

Recommend a software stack for changing a backup platform that includes pay-per-use, supports backup of virtualized workloads provided by HPE GreenLake, offers low RPO in minutes, supports HPE AUetra 9000, and integrates with DSCC.

- A. Zerto
- B. Veeam Backup and Recovery

- C. Recovery Manager Central
- **D. HPE GreenLake Backup and Recovery**

Answer: D

Explanation:

HPE GreenLake Backup and Recovery is the recommended software stack for a backup platform that includes a pay-per-use model, supports virtualized workloads, and integrates with the HPE Data Services Cloud Console (DSCC). This solution offers low Recovery Point Objectives (RPOs) in minutes, supports HPE Alletra 9000, and provides the flexibility and scalability needed for modern backup environments. It is part of the HPE GreenLake ecosystem, which provides cloud-like agility and economics with on-premises control.

NEW QUESTION # 180

A customer is looking for a centralized file-sharing solution that can provide print services in addition to 15TB of storage. Which solution component should you recommend?

- A. Disk enclosure with integrated SAS switch
- B. FC-based array
- C. FC switch
- **D. NAS**

Answer: D

Explanation:

For a customer seeking a centralized file-sharing solution that also provides print services and 15TB of storage, the ideal recommendation is NAS (Network Attached Storage).

NAS systems are specifically designed for file sharing and often come with integrated print server capabilities. They provide centralized storage that can be accessed by multiple clients over a network, making them suitable for environments requiring both file sharing and print services. NAS devices are scalable, making it easy to add additional storage capacity as needed, and they support a variety of file-sharing protocols, ensuring compatibility with different client operating systems.

NEW QUESTION # 181

.....

It is known to us that our HPE0-J68 study materials are enjoying a good reputation all over the world. Our study materials have been approved by thousands of candidates. You may have some doubts about our product or you may suspect the pass rate of it, but we will tell you clearly, it is totally unnecessary. If you still do not trust us, you can choose to download demo of our HPE0-J68 Test Torrent. The high quality and the perfect service system after sale of our HPE0-J68 exam questions have been approved by our local and international customers. So you can rest assured to buy.
