Case Study 1 - Contoso, Ltd

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and branch offices in London and Seattle.

Contoso has a partnership with a company named Fabrikam, Inc. Fabrikam has an Azure Active Directory (Azure AD) tenant named fabrikam.com.

Existing Environment. Existing Environment

The on-premises network of Contoso contains an Active Directory domain named contoso.com.

The domain contains an organizational unit (OU) named Contoso\_Resources. The Contoso\_Resources OU contains all users and computers.

The contoso.com Active Directory domain contains the users shown in the following table.

Existing Environment. Microsoft 365/Azure Environment

Contoso has an Azure AD tenant named contoso.com that has the following associated licenses:

- \* Microsoft Office 365 Enterprise E5
- \* Enterprise Mobility + Security

- \* The users in the Seattle office have the Yammer Enterprise license unassigned.

Security defaults are disabled for contoso.com.

- \* Implement self-service password reset (SSPR).

- \* Simplify license allocation for new users added to the tenant.
- \* Collaborate with the users at Fabrikam on a joint marketing campaign.

- \* Configure the User administrator role to require justification and approval to activate.
  - \* Implement a custom line-of-business Azure web app named App1. App1 will be accessible from the internet and authenticated by using Azure AD accounts.
  - \* For new users in the marketing department, implement an automated approval workflow to provide access to a Microsoft SharePoint Online site, group, and app.
- Contoso plans to acquire a company named Adatum Corporation. One hundred new Adatum users will be created in an Active Directory OU named Adatum. The users will be located in London and Seattle.

  - \* License allocation for new users must be assigned automatically based on the location of the user.
  - \* Fabrikam users must have access to the marketing department's SharePoint site for a maximum of 90 days.
  - \* Administrative actions performed in Azure AD must be audited. Audit logs must be retained for one year.
  - \* The helpdesk administrators must be able to manage licenses for only the users in their respective office.
  - \* Users must be forced to change their password if there is a probability that the users' identity was compromised.
