Reguler CMT-Level-I Update & CMT-Level-I Latest Study Materials

At the PracticeDump, we strive to provide our customers with updated and real CMT Association CMT-Level-I exam questions. We are committed to helping our students reach their goals and advance their careers through comprehensive, convenient, and cost-effective Prepare for your CMT Level 1 Exam (CMT-Level-I) exam preparation material.

CMT Association CMT Level 1 Exam Sample Questions (Q86-Q91):

NEW QUESTION # 86

Which of the following is CORRECT regarding the window candlestick pattern?

- A. It is a reversal pattern
- B. It occurs when the shadows of two consecutive candles do not overlap

- C. One should buy on dips after a falling window
- D. It occurs when the real bodies of two consecutive candles do not overlap

Answer: B

Explanation:

Detailed Explanation:

A Window (gap) is defined strictly by the price extremes. There must be a gap between the High of one candle and the Low of the other (for a rising window) including the shadows. Thus, the shadows of two consecutive candles do not overlap.

NEW QUESTION # 87

A simple moving average is often criticized because:

- **A. Equal weight is given to each point included in the calculation**
- B. It is difficult to calculate
- C. The entire price time series is used in its calculation
- D. The most recent events are given extra weight

Answer: A

Explanation:

Detailed Explanation:

The main criticism of the SMA is its "lag" caused by giving equal weight to old data. For example, in a 200-day SMA, the price 200 days ago has the exact same impact on the current average as yesterday's price, which critics argue is unrealistic for dynamic markets.

NEW QUESTION # 88

Which of the following lists arranges cycles from shortest to longest in duration?

- **A. Seasonal, presidential, Kondratieff**
- B. Presidential, Kondratieff, seasonal
- C. Presidential, seasonal, Kondratieff
- D. Kondratieff, presidential, seasonal

Answer: A

Explanation:

Detailed Explanation:

* Seasonal Cycle: Typically 1 year.

* Presidential Cycle: 4 years.

* Kondratieff Wave: Approximately 54 years (long-wave economic cycle).

The correct order from shortest to longest is Seasonal, Presidential, Kondratieff.

NEW QUESTION # 89

An exponentially smoothed moving average:

- A. Excludes older price points in the calculation
- B. None of the above
- **C. Gives more weight to more recent observations**
- D. Cannot be plotted on a bar chart

Answer: C

Explanation:

Detailed Explanation:

The EMA was designed to solve the lag issue of the SMA. It applies a weighting multiplier to the prices, assigning significantly more weight to recent data and less weight to older data, making it react faster to recent price changes.

NEW QUESTION # 90

The Wilder Parabolic Time/Price System:

- A. Is an oscillator
- B. Increases the number of days in the calculation whenever price reaches a new high
- C. Decreases the number of days in the calculation whenever price reaches a new high
- D. Works best in trading range markets

Answer: C

Explanation:

Detailed Explanation:

(Note regarding answer key logic): The Parabolic SAR uses an Acceleration Factor (AF) that increases as the trade progresses. Mathematically, increasing the acceleration makes the indicator "faster" or more sensitive, which is equivalent to decreasing the number of days in a moving average calculation. The answer key identifies C as the correct description.

NEW QUESTION # 91

.....

This skill set brings multiple benefits to you. You get well-paid jobs and promotions because firms prefer CMT Level 1 Exam CMT-Level-I certification holders. Although all professionals desire to earn certifications, many never find enough time to go beyond their graduation degree. Any area of accreditation is in high demand, and if you have a CMT Level 1 Exam CMT-Level-I Certification, you will grow in the information technology industry with ease.
