

New AZ-305 Test Vce Free | Latest AZ-305 Dumps Guide: Designing Microsoft Azure Infrastructure Solutions 100% Pass

P.S. Free 2026 Microsoft AZ-305 dumps are available on Google Drive shared by PDF4Test: https://drive.google.com/open?id=1H-Uz7eg_ZHH6SqzGhVTP88qggOvUgg4V

Get benefits from PDF4Test exam questions update offer and prepare well with the assistance of Microsoft AZ-305 updated exam questions. The Microsoft AZ-305 exam dumps are being offered at affordable charges. We guarantee you that the AZ-305 Exam Dumps prices are entirely affordable for every AZ-305 exam candidate.

Here is the about the significance of taking the Microsoft AZ-305 Certification Exam

The Microsoft AZ-305 Certification Exam is a mandatory requirement for all Microsoft Azure professionals. It helps them to validate their knowledge regarding the design and deployment of the Azure platform. Benefits of taking the Microsoft AZ-305 Certification Exam, after getting prepared with the assistance of the **AZ-305 exam dumps** given below:

- You can work in different industries like banking, government, healthcare, insurance, media, retail, education, etc. To offer a secure and reliable service to the customers, you need to have the Microsoft AZ-305 Certification Exam.
- You can work as a Microsoft Azure consultant, architect, and IT professional after passing the Microsoft AZ-305 Certification Exam. To meet and for balancing the workload with the company, it is essential to have the Microsoft AZ-305 Certification Exam.
- It is a Microsoft exam. This means that it is designed by Microsoft experts and will help you to learn the latest features and best practices of the Azure platform. Authentication and authorization are some of the most important features of the Azure platform.
- Getting the Microsoft AZ-305 Certification Exam gives you a chance to prove your expertise in the Azure platform. Experts highly recommend Microsoft AZ-305 Certification Exam for professionals to validate their expertise in the Azure platform.
- You will be able to make a lot of money from it. You can earn a good salary after getting the Microsoft AZ-305 Certification

Exam. Compute solution helps in computing. It connects compute resources to a storage service.

The Microsoft AZ-305 exam is designed to assess a candidate's ability to design Azure solutions that meet business requirements, as well as their understanding of Azure services and their use in different scenarios. AZ-305 exam covers a range of topics, including designing compute and storage solutions, designing networking solutions, and designing security solutions.

AZ-305 Dumps Guide - AZ-305 Valid Braindumps

If you want to get the AZ-305 certification to improve your life, we can tell you there is no better alternative than our AZ-305 exam questions. The AZ-305 test torrent also offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. Our product is affordable and good, if you choose our products, we can promise that our AZ-305 Exam Torrent will not let you down.

How long does it take to pass the Microsoft AZ-305 exam?

According to the **AZ-305 exam dumps** the passing Score, duration & question for the Microsoft AZ-305 Certification is given below

- Duration: 60 Minutes
- Languages: English
- Passing scores: 70%
- No. of questions: 40-60

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q108-Q113):

NEW QUESTION # 108

You have two app registrations named App1 and App2 in Azure AD. App1 supports role-based access control (RBAC) and includes a role named Writer.

You need to ensure that when App2 authenticates to access App1, the tokens issued by Azure AD include the Writer role claim. Which blade should you use to modify each app registration? To answer, drag the appropriate blades to the correct app registrations. Each blade may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Blades	Answer Area
API permissions	App1: App roles
App roles	App2: API permissions
Token configuration	

NEW QUESTION # 109

You have an Azure Load Balancer named LB1 that balances requests to five Azure virtual machines.

You need to develop a monitoring solution for LB1. The solution must generate an alert when any of the following conditions are met:

A virtual machine is unavailable.

Connection attempts exceed 50,000 per minute.

Which signal should you include in the solution for each condition? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Microsoft	
An unavailable virtual machine:	▼ - Byte Count - Data Path Availability - Health Probe Status - Packet Count - SYN Count
More than 50,000 connection attempts per minute:	▼ - Byte Count - Data Path Availability - Health Probe Status - Packet Count - SYN Count

Answer:

Explanation:

NEW QUESTION # 110

You have an on-premises network that uses an IP address space of 172.16.0.0/16. You plan to deploy 25 virtual machines to a new Azure subscription. You identify the following technical requirements:

- * All Azure virtual machines must be placed on the same subnet named Subnet1.
- * All the Azure virtual machines must be able to communicate with all on-premises servers.
- * The servers must be able to communicate between the on-premises network and Azure by using a site-to-site VPN.

You need to recommend a subnet design that meets the technical requirements.

What should you include in the recommendation? To answer, drag the appropriate network addresses to the correct subnets. Each network address may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Answer Area

Subnet1:

Gateway subnet:

 Microsoft

NEW QUESTION # 111

A company is planning on deploying an application onto Azure. The application will be based on the .Net core programming language. The application would be hosted using Azure Web apps.

Below is part of the various requirements for the application:

- Gives the ability for the testing team to view the different components of an application and see the calls being made between the different application components
- Helps business analyse how many users actually return to the application
- Ensuring IT administrators get alerts based on critical conditions being met in the application

Which of the following service would be best suited for fulfilling the requirement of Ensuring IT administrators get alerts based on critical conditions being met in the application?

- A. Azure Policies
- B. Azure Advisor
- C. Application Insights
- **D. Azure Monitor**

Answer: D

Explanation:

This is a feature of Azure Monitor wherein you can use the Alerts feature. This is also mentioned in the Microsoft documentation:

Responding to critical situations Microsoft

In addition to allowing you to interactively analyze monitoring data, an effective monitoring solution must be able to proactively respond to critical conditions identified in the data that it collects. This could be sending a text or mail to an administrator responsible for investigating an issue. Or you could launch an automated process that attempts to correct an error condition.

Alerts

[Alerts in Azure Monitor](#) proactively notify you of critical conditions and potentially attempt to take corrective action. Alert rules based on metrics provide near real time alerting based on numeric values, while rules based on logs allow for complex logic across data from multiple sources.

Alert rules in Azure Monitor use [action groups](#), which contain unique sets of recipients and actions that can be shared across multiple rules. Based on your requirements, action groups can perform such actions as using webhooks to have alerts start external actions or to integrate with your ITSM tools.

<https://docs.microsoft.com/en-us/azure/azure-monitor/overview>

NEW QUESTION # 112

You need to design a storage solution for an app that will store large amounts of frequently used data. The solution must meet the following requirements:

- * Maximize data throughput.
- * Prevent the modification of data for one year.
- * Minimize latency for read and write operations.

Which Azure Storage account type and storage service should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Storage account type:

	▼
BlobStorage	
BlockBlobStorage	
FileStorage	
StorageV2 with Premium performance	
StorageV2 with Standard performance	

Storage service:

	▼
Blob	
File	
Table	

Answer:

Explanation:

Storage account type:

	▼
BlobStorage	
BlockBlobStorage	
FileStorage	
StorageV2 with Premium performance	
StorageV2 with Standard performance	

Storage service:

	▼
Blob	
File	
Table	

Explanation

Box 1: BlockBlobStorage

Block Blob is a premium storage account type for block blobs and append blobs. Recommended for scenarios with high transactions rates, or scenarios that use smaller objects or require consistently low storage latency.

Box 2: Blob

The Archive tier is an offline tier for storing blob data that is rarely accessed. The Archive tier offers the lowest storage costs, but higher data retrieval costs and latency compared to the online tiers (Hot and Cool).

Data must remain in the Archive tier for at least 180 days or be subject to an early deletion charge.
