Quiz 2026 OCPE Category-7A-General-and-Household-Pest-Control: Pesticide Applicator Category 7A General and Household Pest Control Exam – The Best Latest Guide Files

Different from general education training software, our Category-7A-General-and-Household-Pest-Control exam questions just need students to spend 20 to 30 hours practicing on the platform which provides simulation problems, can let them have the confidence to pass the Category-7A-General-and-Household-Pest-Control exam, so little time great convenience for some workers, how efficiency it is. Time is money, in today's increasingly pay attention to efficiency, we should use time in the right place, with low time get high scores in return, the Category-7A-General-and-Household-Pest-Control Latest Exam torrents are very good to do this.

OCPE Pesticide Applicator Category 7A General and Household Pest Control Exam Sample Questions (Q69-Q74):

NEW QUESTION # 69

The EPA approves the label for a pesticide. The State of New Jersey:

- A. Can put additional restrictions on the way it can be used
- B. Cannot change the use thereof in any way
- C. Can modify a pesticide's use allowing for additional uses or higher rates of application

Answer: A

Explanation:

The EPA approves pesticide labels under FIFRA, setting federal standards for use. However, states like New Jersey have the authority to impose stricter regulations if needed to protect local environments or public health. According to NJDEP Pesticide Control Program guidelines, the state can add restrictions, such as limiting application rates, requiring additional safety measures, or restricting use in certain areas (e.g., near schools or water bodies). Option A is incorrect because states can impose additional rules. Option B is incorrect because states cannot expand uses or increase rates beyond the EPA-approved label without a special local need (SLN) registration under Section 24(c) of FIFRA, which is not the same as a general modification. Option C aligns with New Jersey's authority to enforce stricter standards.

NEW QUESTION # 70

Pest infestations tend to be ___ a house or apartment.

- A. Uniformly distributed throughout
- B. Restrained to entryways in
- C. Focused on specific areas in

Answer: C

Explanation:

Pests like roaches, ants, or bedbugs tend to concentrate in specific areas where conditions are favorable, such as kitchens (food sources), bathrooms (moisture), or bedrooms (for bedbugs). The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Pest Behavior) explains that infestations are focused on specific areas based on pest biology and environmental factors. Option A (uniformly distributed) is incorrect, as pests do not spread evenly. Option B (restrained to entryways) is too limited, as infestations often occur deeper inside structures.

NEW QUESTION # 71

Lice infestations are best treated by a:

- A. Doctor or public health official
- B. Heat treatment
- C. Residual pesticide treatment

Answer: A

Explanation:

Lice infestations (e.g., head lice) are a public health concern and are best treated by a doctor or public health official using FDA-approved pediculicides or non-chemical methods like combing. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Lice) notes that lice treatments are typically medical, not structural pest control, and fall outside the scope of Category 7A applicators. Option B (residual pesticide treatment) is not appropriate for lice on humans. Option C (heat treatment) may be used for items like bedding but not directly for lice infestations on people.

NEW QUESTION # 72

The IPM style of pest control includes:

- A. A reduction of pesticide use
- B. Pre-established pesticide applications according to a schedule
- C. One-time reactive pesticide applications

Answer: A

Explanation:

Integrated Pest Management (IPM) focuses on sustainable pest control by minimizing pesticide use and integrating multiple control methods (e.g., cultural, mechanical, biological). The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 4: IPM) highlights that IPM aims for a reduction of pesticide use through prevention and non-chemical methods. Option A (pre-established applications) contradicts IPM's reactive, need-based approach. Option B (one-time reactive applications) may be part of IPM but does not capture its broader goal of reducing pesticide reliance.

NEW QUESTION # 73

At multi-family residences, the applicator business shall provide a notice to each occupied unit how far in advance?

- A. 48 hours
- B. 24 hours
- C. Prior to treatment

Answer: C

Explanation:

NJDEP regulations (N.J.A.C. 7:30-9.13) require that multi-family residences receive notice prior to treatment, but the exact timeframe is not specified as 24 or 48 hours in the regulation. Best practice, as noted in the General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 2:

Notification Requirements), is to provide notice in advance, typically at least 24 hours, but the regulation itself uses the general term "prior." Option B (24 hours) and Option C (48 hours) are specific timeframes not mandated by the regulation.

NEW QUESTION # 74

.....

All questions on our Category-7A-General-and-Household-Pest-Control exam questions are strictly in accordance with the knowledge points on newest test syllabus. Also, our experts are capable of predicating the difficult knowledge parts of the Category-7A-General-and-Household-Pest-Control exam according to the test syllabus. We have tried our best to simply the difficult questions of our Category-7A-General-and-Household-Pest-Control Practice Engine to be understood by the customers all over the world. No matter the students, office staffs, even someone who know nothing about this subject can totally study it without difficulty.
